Retells the history and legends of New England's lighthouses and their keepers from the Maritimes to Montauk

NJ Lighthouse Calendar Arcadia Publishing

This pictorial guide provides a photographic tour of the last 400 years of Rhode Island lighthouse history. More than thirty lighthouse stations are described, from Watch Hill, near the Connecticut border in the south, to the inner harbor of Providence. The lighthouse station locations are identified using navigational charts and their characteristics, including date established, tower structure, optics, and fog signals. Also included are the dozen or so lighthouses that no longer exist. Probably not as well known, images and characteristics of these aids are similarly discussed. Over 300 images, some more than 130 years old, show the original towers and stations, accompanied by present-day photographs that compare the development and evolution of these lighthouses. Many of the images found on these pages have been collected from historical resources and are being published for the first time. This book is a must-have for the lighthouse enthusiast, maritime buff, and anyone who is interested in Rhode Island history.

For those looking for guide and reference. Not another coffee table display of lighthouses, but a companion of travel.

An iconic feature of the Maine coast (and in a few places inland), lighthouses have served as important navigational aids but also as art subjects and tourist attractions and advertising symbols. This highly illustrated third volume in Historic New England's new series explores the lives and legends of lighthouse keepers, shares tales of maritime disasters, explores the architecture of lighthouses, and discusses efforts to preserve lighthouses themselves. It also examines the influence of Maine's lighthouses, from literature to paintings and photographs to tabletop models and all sorts of practical bric-a-brac. They were key to the development of the tourist trade in Maine (beyond facilitating safe landings), and they are a ubiquitous symbol on corporate logos, advertising symbols, souvenirs, and collectibles from the past to the present. The ten chapters are from a variety of

contributors, and each chapter is richly illustrated with photographs and ephemera culled from private and public collections. The fold-out covers feature daytime postcards of Maine lighthouses at the front and nighttime postcards at the back.

Here is an indispensable addition to the lighthouse enthusiast's library, required reading for those interested in New England maritime history, and a delight for anyone who enjoys coastal Massachusetts. More than 800 images, many never before published, include historic plans that describe the details of these aids to navigation, and archival and contemporary photos that trace through their history. The book covers all the lighthouses and lightships that marked the shores (exclusive of Cape Cod and the Islands) and guided mariners through the challenging waters surrounding Massachusetts. This volume also explores the interiors of towers, shows the lantern rooms of rarely-visited lighthouses and gives fascinating facts about these beacons over their 200-year history.

"Coast Calendar," says its Pulitzer Prize-winning author, "is the story of the work and play, the human nature and the weather, the fauna and flora, the ups and downs in a sample, all-around Maine family that mixes farming of the sea with farming of the land." It is Robert P. Tristram Coffin's delightful chronicle of a year on the Maine coast. It is the world of coastal Maine, but it is a wider world, too. Perhaps the deep frost and special swing of the stars and the sweep of the sea belong to Maine, but the fine day-to-day detail of living in tune with the seasons and nature will stir memories for many of a way of life that is rapidly passing. Robert P. Tristram Coffin was a descendant of the original English settlers of Maine and an acclaimed historian of his time. He was also a poet and essayist and was awarded the Pulitzer Prize for poetry in 1935. He attended Bowdoin College in Maine and later taught there while writing many of his thirty-seven books.

Author James Claflin combines an extensively researched text with this exquisite collection of many previously unpublished images to tell the story of a state dependent upon its coastal commerce. *Lighthouses and Life Saving along the Massachusetts Coast* is a unique tribute to the men and women who protected mariners from shipping disasters. With a variety of vintage images from private as well as museum collections, this rare glimpse into the lives of the dedicated workers who protected thousands of vessels plying the dangerous waters of Massachusetts Bay and Nantucket Sound is a visual journey to an earlier era in our nation's history. From Cape Ann to New Bedford, residents of Massachusetts have relied heavily on the sea for employment, trade, and nourishment. The task of lighting and protecting the coasts was taken on by the U. S. Lighthouse Establishment and the U. S. Life-Saving Service. Within these pages, see the Cape Ann lighthouse keeper proudly posed in his uniform, the Cape Cod life savers launching their surf-boat through the breakers toward the shipwreck, and the Boston Bay lighthouse keeper's family returning by skiff from their brief excursion to town.

Lighthouses and Life Saving along the Maine and New Hampshire Coast is a unique tribute to the men and women who protected mariners as they traveled along New England's rocky coastline. With thousands of vessels plying the dangerous waters, the chance of a shipping disaster was always great. Hundreds of shipwrecks did indeed occur off the coast with startling losses. Through descriptive text and a variety of vintage images from private as well as museum collections, we get a rare glimpse into the lives of the dedicated government men and women. Author James Claflin combines an extensively researched text with this exquisite collection of previously unpublished images to tell the story of an area heavily dependent on its coastal commerce. The task of lighting and protecting the coasts was taken on by the U.S. Light-House Establishment and the U.S. Life-Saving Service, later merged to become the U.S. Coast Guard. Within these pages, see the Boon Island Lighthouse keeper, his family alongside, as he proudly poses in his uniform; life savers at Hunniwells Beach station as they pull through a blinding snowstorm to rescue the crew of a stranded schooner; and the way of life on an offshore lightship. Lighthouses and Life Saving along the Maine and New Hampshire Coast is a visual journey into our nation's maritime history.

Minot's Ledge Lighthouse, off Boston's South Shore near the towns of Cohasset and Scituate, has a fascinating history replete with heroism, tragedy, and triumph. Widely known as the "I Love You Light" after its famous 1-4-3 flash characteristic, it has sparked the imaginations of lighthouse lovers around the world. The present (1860) tower is one of the classic examples of a granite wave-swept lighthouse and has withstood the battering of countless storms. It stands today as a testament to its designers and builders and as a monument to the brave keepers who stood watch for nearly a century.

Description: For ships at sea, the flash of a lighthouse beacon is both a warning of a dangerous shore and a welcome, as its distinctive flashes tell its location, and, thus, your own at sea. Light keepers and their families lived in isolated places, often risking their lives in an effort to save others. This lonely, romantic history imbues lights with a special sense of place captured by Paul Rezendes in his very appealing photographs of New England Lighthouses. Lighthouses were built on the Hudson River in New York between 1826 to 1921 to help guide freight and passenger traffic. One of the most famous was the iconic Statue of Liberty. This fascinating history with photos will bring the time of traffic along the river alive. Set against the backdrop of purple mountains, lush hillsides, and tidal wetlands, the lighthouses of the Hudson River were built between 1826 and 1921 to improve navigational safety on a river teeming with freight and passenger traffic. Unlike the towering beacons of the seacoasts, these river lighthouses were architecturally diverse, ranging from short conical towers to elaborate Victorian houses. Operated by men and women who at times risked and lost their lives in service of safe navigation, these beacons have overseen more than a century of extraordinary technological and social change. Of the dozens of historic lighthouses and beacons that once dotted the Hudson River, just eight remain, including the iconic Statue of Liberty, New York Harbor's great monument to freedom and immigration, which served as an official lighthouse between 1886 and 1902. Hudson River Lighthouses invites readers to explore these unique icons and their fascinating stories.

This is a reissue of one of Edward Rowe Snow's most enduring classics. First published in 1945, it relates the histories of over fifty of the region's lighthouses in rich detail. Snow gives special emphasis to the story of heroine Abbie Burgess at Maine's Matinicus Rock Light, to the rich histories of Boston Light and Minot's Ledge Light. Modern day lighthouse expert Jeremy D'Entremont has provided extensive annotations to Snow's chapters, bringing the information about each lighthouse up to date.

Lighthouses and Life Saving along the Connecticut and Rhode Island Coast is the third in a series of

titles offering a unique tribute to the men and women who protected the mariners as they traveled along New England's rocky coastline. Thousands of vessels faced the dangers of the rugged sea which caused hundreds of shipwrecks off the coast with devastating losses. Author James Clafin combines a thoroughly descriptive text with this diverse collection of over two hundred vintage images, from private as well as museum collections, to create an illustrated history of an area strongly reliant on its coastal trade. The U.S. Light-House Establishment and the U.S. Life-Saving Service, which later merged to become the U.S. Coast Guard, assumed the responsibility of lighting and protecting the coasts. Inside, you will see the lighthouse keeper at Bullock's Point Light as he surveys the damage from the Hurricane of 1938, witness the life savers at Block Island's Sandy Point Station where first word of the wreck of the steamer Larchmont was received, and experience life on an offshore lightship. The book guides you through the days of the life savers-the work they performed, their rescues, and the evolution of their architecture through the years.

#### **From Guiding Lights to Beacons for Business**

The definitive series on the history of New England lighthouses continues with Rhode Island's thirty beacons. Here are just a few of the fascinating entries compiled by D'Entremont, New England's foremost lighthouse authority: A feud between two keepers at Whale Rock Light led to a harrowing life-and-death chase. The hurricane of 1938 devastated the state's lighthouses. The keepers at Plum Beach Light off North Kingstown miraculously escaped with their lives; others weren't so lucky. Ida Lewis lived at Newport's Lime Rock Light for more than 60 years and became one of the world's most celebrated lightkeepers. The keeper and his family at Block Island North Light aided the survivors of one of New England's worst shipwrecks, the Larchmont disaster of 1907. Pomham Rocks Light on the Providence River was home to a famous fish-catching cat.

#### **Lighthouses of Southern New England**

New England's foremost maritime historian continues his definitive series about the storms, shipwrecks, and heroic lighthouse keepers of the Maine Coast. This is the fourth book in D'Entremont's "Lighthouse Treasury" series, following volumes on Connecticut, Rhode Island, and Massachusetts. More than sixty lights are detailed here, from those at the New Hampshire border all the way down east to West Quoddy Light, which despite its name is the easternmost light in the USA. Each chapter features a treasury of historic photos and all the stories of the keepers and the storms they battled, the wrecks they tried valiantly to save.
