From the

precolonial
period to
today, Julien
Bokilo
analyzes the
effectiveness

of social and economic measures undertaken for the development of the Republic of Congo with regard to all of sub-Saharan Africa. This documented and unprecedented sociohistorical study feeds on new perspectives in public policy planning, development and implementation. • The knowledge of specificities of poverty and exclusion in the African

companies; • The possibility of making the correlation and the transposition of the principles of the public policies on the African facts, the case of the reintegration of the native populations and the albinos. In addition, the relevance of this work is in the fact that it tackles the question of the struggle against the poverty and the exclusion, which are problems whose recurrence is

quasi endemic and alarming in process of the socio-economic and political development process of African countries. Also, in an economic context of unprecedented crisis in Republic of Congo and in the surrounding countries, the economic zone of the central Africa sub-area mainly, the social policies are of an interest somehow crucial for their capacities to

suppress the harmful effects of the recessions. In fact, this work really meets a scientific expectation, as it is based on verifiable arguments, because founded on the theory and the facts.

La sociologie irresponsable, incertaine, inutilisable ? Cette image est en train de changer. On découvre que le dynamisme

d'une institution, d'une entreprise ne dépend pas seulement du caractère de son chef, de la conjoncture économique, de l'aide du ciel ou du tempérament national, mais d'un certain nombre de principes d'organisation . Ces principes sont exposés ici de manière accessible, illustrés par l'analyse d'une douzaine de cas français et étrangers. Il ne s'agit pas de chercher des modèles mais de

dévoiler une attitude et des outils qui permettent de comprendre comment une organisation se constitue et peut se transformer. Cette initiation peut être prolongée avec profit par l'ouvrage collectif Les Nouvelles Approches sociologiques des organisations (Seuil, 3e édition, 2005).
Cultural Entrepreneurship in Africa
Routledge
The Sociology of Organizational Change

discusses organizational change and its implementation, focusing on economic growth, specification and attainment of profitability targets, and entrepreneurial behavior. This book describes the three alternative methods of introducing change—introduction without warning, introduction preceded by information, and introduction with employee participation. The topics

covered include the need for constant change; change, equilibrium and homeostasis; sources of resistance to change; and hierarchical variations in attitudes to change. The organizational and psychological factors; techniques for implementing change; and managerial succession and the organizational climate are likewise deliberated in this text. This publication is

useful to students studying for the Diploma in Management Studies, professional examinations of the Institute of Personnel Management, and university courses in sociology. Sociologie des organisations. Initiation théorique suivie de douze cas pratiques (La) Springer Nature La sociologie des organisations est un domaine central de la sociologie. L'ouvrage s'attache à

considérer les grands courants théoriques en sociologie des organisations comme des visions spécifiques du comportement de l'homme au travail. Il propose un regard réflexif sur l'origine de la discipline, son évolution, et son actualité, en mobilisant l'apport de la sociologie pour interroger des thématiques contemporaines (« lean management », « entreprise libérée », « new public management

» en particulier). **The Logic of Organizational Disorder** Routledge The noted military historian presents an illuminating study of trench warfare during WWI—and how it influenced the French Army's evolution. Michel Goya's *Flesh and Steel* during the Great War is a major contribution to our understanding of the French Army's experience on the Western Front, and

how that experience impacted the future of its military theory and practice. Goya explores the way in which the senior commanders and ordinary soldiers responded to the extraordinary challenges posed by the mass industrial warfare of the early twentieth century. In 1914 the French army went to war with a flawed doctrine, brightly-colored uniforms and

a dire shortage of modern, heavy artillery. How then, over four years of relentless, attritional warfare, did it become the great, industrialized army that emerged victorious in 1918? To show how this change occurred, the author examines the pre-war ethos and organization of the army. He describes in telling detail how, through a process of analysis and

innovation, the French army underwent the deepest and fastest transformation in its history. Introduction to Organizational Theory Elsevier This book, in its second edition, continues to present the main models of Sociology that have been conceptualised to apprehend the world of organisations. From the theories of bureaucracy and human relations to contemporary

approaches, this book focuses on all the key aspects of Sociology of an organisation. The concepts defined are marked by the consideration of modes of rationality, types of cooperation, of networks and power games, of systems of decision-making and logics of action. The book cites the contributions made and the definitions given by the great Sociologists like Max

Weber, Talcott Parsons, Michel Crozier, Renaud Sainsanlieu, to help the students understand the topics more clearly. This second edition is enriched with studies of discussed cases, charts, and of extracts of texts pertinent to the productive system, to the public sphere and the associative fact. The book is intended for the undergraduate students of sociology. It will also be of

interest to those who, on a personal or professional level, wish to understand better how companies, administrations, etc. function. *Introduction à la sociologie des organisations* BRILL This book examines similarities and differences in 31 European governments' responses to the COVID-19 pandemic. The COVID-19 pandemic hit Europe in early 2020. It spread across the continent

during the Spring while anxious electorates were treated to news reports about health systems under duress and frustrated attempts by public procurement officials to obtain adequate supplies of medical and protective equipment. Over the next 15-18 months considered by this book, national responses exhibited both similarities and profound variations as the different

endeavours to regulate social interactions constituted a stress test for political systems across Europe.

On the Normal and the Pathological

Indiana University Press
Using a variety of theoretical frameworks drawn from the social sciences, the contributions in this edited collection offer a critical perspective on the dominant paradigms used in contemporary financial

activities. Through a detailed study of the organisation and functioning of financial intermediaries and institutions, the contributors to this volume analyse 'finance in the making', by shedding light on the structuring of banking and financial systems, on their capacity to prescribe action and control, on their modes of regulation and, more generally, on the process of

financialisation. Contributions presented in this volume have been written by authors working within the 'social studies of finance' tradition, a research programme that emerged twenty years ago, with the aim of addressing a diversity of financial fieldworks and related theoretical questions. This book, therefore, sheds light on different areas that are representative

of contemporary financial realities. Specifically, it first studies the work of financial employees: traders, salespeople, investment managers, financial analysts, investment consultants, etc. but also provides an analysis of a range of financial instruments: financial schemes and contracts, financial derivatives, socially responsible investment funds, as well

as market rules and regulations. Finally, it puts into perspective the organisations contributing to this financial reality: those developing and selling financial services (retail banks, brokerage houses, asset management firms, private equity firms, etc.), and also those contributing to the regulation of such activities (banking regulators, financial market authorities,

credit rating agencies, the State, to name a few). Each text can be read without any specific knowledge of finance; the book is thus addressed to anyone willing to better understand the intricacies of contemporary financial realities. International Trends in University Governance
Göttingen University Press
Being Disabled, Becoming a Champion is an accessible presentation

of current European research on the most recent evolutions in sports for people with disabilities, demonstrating knowledge developed from the field of sports practices of people with disabilities. It covers three interrelated themes. First, it covers the different facets of the history of sports organizations set up during the 1950s for athletes with motor or intellectual impairments.

The second part focuses on the athletes themselves. Voices are given to the top-level athletes in adapted sports: people with intellectual impairment; the pioneers of wheelchair racing who invented a new discipline, off-road wheelchair racing; and a former Paralympic athlete who has become a researcher and a defender of specific sports practices. Finally, the

third part interrogates the way support for disabled people can modify the existing definitions and conceptions of the body, of disability, of what is human, and of sports performance. This is an ideal text for students and researchers studying and working in the areas of Disability Studies, Sport Sciences and Paralympic Studies. This book was originally published as a special issue

of Sport in Society.
The Routledge Companion to Philosophy of Social Science
Routledge
This handbook provides an overview on major developments that occurred in the field of economic sociology after its rebirth since the 1980s in the US. It offers new insights on the uniqueness of European economic sociology compared to US economic sociology

which emerged at the end of the 20th century. The handbook presents economic sociology as a developing field which started with certain foundations as new economic sociology, widening the perspective by introducing social factors thereby focusing more on general belief systems, social forms of coordination and the relationships between society and the economy. It offers an

outstanding portrait of the research field helping to identify major foundations and trajectories as well as new research perspectives for a globalized economic sociology. This makes the handbook appeal to specialized researchers of the field, researchers from other disciplines interested in economic phenomena, as well as graduate and postgraduate students.

Routledge
Founded in
1919 under
the Treaty of
Versailles as
part of the
League of
Nations'

system, the ILO is still today the main organization responsible for the international organization of work and the improvement of working conditions in the world. Widely recognized for its efforts in building international labour standards, the ILO remains little studied by development specialists and historians. This book intends to fill this gap and traces the

history of international development and its early pioneers, through an analysis of the activities of the International Labour Office, the Secretariat of the International Labour Organization, between 1930 and 1946. In this book, development is used as a key to questioning the ILO's place and function in the expanding inter-war world. The development practices and

discourses that emerged in the 1930s were mainly intended to support the ILO's universalization strategy, which was made necessary by the events that shook Europe at the time. Development discourses and practices were also part of the "esprit du temps", as they were closely linked to the affirmation of the planist and rationalist ideas of the 1930s. However, development

for the ILO was not reduced to a project of economic modernization, but was seen as a tool for social engineering, as evidenced by the ILO's missions of technical assistance, organized since 1930. The analysis of the expertise work makes it possible to highlight the logics that prevailed in technical assistance, which was more in line with institutional objectives,

than with the dissemination of a genuine expertise. This book therefore hopes to bring new insight on the history of internationalism, and international organizations during the inter-war period and the Second World War, as well as on the role of the ILO in the history of international development thinking and practices. *Practice Theory, Work, and Organization* Routledge The Equal Pillars of Sustainability

investigates whether equality between environmental protection, social sustainability, and economic sustainability can be achieved in all circumstances or what alternatives need to be considered via the latest research on topical issues by international experts. Source Book for Social Origins Walter de Gruyter GmbH & Co KG The discovery of oil in Uganda in

2006 ushered in an oil-age era with new prospects of unforeseen riches. However, after an initial exploration boom developments stalled. Unlike other countries with major oil discoveries, Uganda has been slow in developing its oil. In fact, over ten years after the first discoveries, there is still no oil. During the time of the research for this book between 2012 and 2015, Uganda's oil had not yet fully materialised but was becoming. The overarching characteristic of this research project was waiting for the big changes to come: a waiting characterised by indeterminacy . There is a timeline but every year it gets expanded and in 2018 having oil still seems to belong to an uncertain future. This book looks at the waiting period as a time of not-yet-ness and describes the practices of future- and resource-making in Uganda. How did Ugandans handle the new resource wealth and how did they imagine their future with oil to be? This ethnography is concerned with Uganda's oil and the way Ugandans anticipated different futures with it: promising futures of wealth and development and disturbing futures of destruction and suffering. The book works out how

uncertainty was an underlying feature of these anticipations and how risks and risk discourses shaped the imaginations of possible futures. Much of the talk around the oil involved the dichotomy of blessing or curse and it was not clear, which one the oil would be. Rather than adding another assessment of what the future with oil will be like, this book describes the predictions

and prophecies as an essential part of how resources are being made. This ethnography shows how various actors in Uganda, from the state, the oil industry, the civil society, and the extractive communities, have tried to negotiate their position in the oil arena. Annika Witte argues in this book that by establishing their risks and using them as power resources actors can influence the

becoming of oil as a resource and their own place in a petro-future. The book offers one of the first ethnographic accounts of Uganda's oil and the negotiations that took place in an oil state to be. *Sociological Abstracts*
BRILL
This book contributes to critical thinking about globalization and educational knowledge and, at the same time, opens our spirits to the

theoretical opportunities and educational enrichment that the globalization era offers. *La sociologie des organisations* Casemate Publishers This collection of essays provides an analysis of the dynamics of Civilizations. The processes of globalization and of world history are described from a comparative sociological point of view in a Weberian tradition. These essays

were written between 1974 and 2002 by one of the most eminent sociologists of today. The print edition is available as a set of two volumes (9789004129931). The Sociology of Organizational Change Armand Colin No detailed description available for "Current research in sociology". **Comparative Civilizations and Multiple Modernities** Edward Elgar Publishing While most observers

have equated privatization with a conservative assault on the welfare state, Claire F. Ullman demonstrates that such was not the case in France. There, delegation to nonprofits was motivated by the desire to increase the state's ability to achieve progressive social goals, including enabling welfare programs to reach more of the disadvantaged . Elites sought to recruit nonprofit organizations

as partners not to roll back the state, but to bolster and extend its power. Ullman suggests that the western welfare state's new reliance on nonprofit organizations should be re-evaluated in light of the French case.

The Production of Educational Knowledge in the Global Era

Taylor & Francis Aiding Decisions With Multiple Criteria: Essays in Honor of Bernard Roy is

organized around two broad themes: Graph Theory with path-breaking contributions on the theory of flows in networks and project scheduling, Multiple Criteria Decision Aiding with the invention of the family of ELECTRE methods and methodological contribution to decision-aiding which lead to the creation of Multi-Criteria Decision Analysis (MCDA). Professor Bernard Roy

has had considerable influence on the development of these two broad areas. £/LIST£ Part one contains papers by Jacques Lesourne, and Dominique de Werra & Pierre Hansen related to the early career of Bernard Roy when he developed many new techniques and concepts in Graph Theory in order to cope with complex real-world problems. Part two of the book is devoted to

<p>Philosophy and Epistemology of Decision-Aiding with contributions from Valerie Belton & Jacques Pictet and Jean-Luis Genard & Marc Pirlot. Part three includes contributions based on Theory and Methodology of Multi-Criteria Decision-Aiding based on a general framework for conjoint measurement that allows intrasitive preferences. Denis Bouyssou & Marc Pirlot;</p>	<p>Alexis Tsoukiàs, Patrice Perny & Philippe Vincke; Luis Dias & João Clímaco; Daniel Vanderpooten; Michael Doumpos & Constantin Zopounidis; and Marc Roubens offer a considerable range of examinations of this aspect of MCDA. Part four is devoted to Preference Modeling with contributions from Peter Fishburn; Salvatore Greco, Benedetto Matarazzo & Roman</p>	<p>Slowinski; Salem Benferhat, Didier Dubois & Henri Prade; Oscar Franzese & Mark McCord; Bertrand Munier; and Raymond Bisdorff. Part five groups Applications of Multi-Criteria Decision-Aiding, and Carlos Henggeler Antunes, Carla Oliveira & João Clímaco; Carlos Bana e Costa, Manuel da Costa-Lobo, Isabel Ramos & Jean-Claude Vansnick; Yannis Siskos & Evangelos Grigoroudis;</p>
