This edition of Frank Wood's A-level Accounting has been restructured to match closely the AQA A-level syllabus, now covered in the first fifteen chapters. In particular coverage of partnership accounts, now in one chapter; all company accounting is covered in one chapter; and standard costing and variance is covered in a single chapter. The book builds on a first course in accounting and includes coverage of the more advanced aspects of financial and management accounting. As well as providing instruction and practice in the preparation of accounting information, the text stresses the need for students to understand the business reasons behind accounting techniques. A continuing strength of the book is the large amount of question material. Recent past questions from the main examining bodies are included as well as a useful guide to examination techniques at A-level.

"This edition marks a major change in focus that reflects the consolidation of the previous two volumes into one. The emphasis is now exclusively on financial accounting. This change, and the resulting increased focus on company accounting and International GAAP within the text, were made in response to the comments of reviewers of the previous edition, who felt this was what we should be focusing on. This textbook has been written to provide a very thorough introduction to accounting. Anyone seeking to obtain a good grounding in financial accounting will find this book suitable to their needs. This includes those studying accounting on courses at school, college or university; or studying for qualifications from the LCCE, Association of Accounting Technicians, the Institute of Secretaries and Administrators; or for qualifications of any of the six UK and Irish Chartered Accountancy bodies. The financial accounting requirements for National Vocational Qualifications and Scottish Vocational Qualifications are also fully covered"--
