*The Global Healthcare Manager Gateway to Healthcare Management*

Health professionals often take on managerial roles at short notice and with little or no preparation. Although they may be highly clinically qualified and accomplished, the practicalities and relationships involved in management - helping staff to feel motivated and valued, building and leading teams, managing meetings and presentations, writing reports and managing change, to name but a few - present new challenges and pitfalls for which they are unprepared. This book is for managers and prospective managers who want to approach their new responsibilities professionally from the very beginning. Based on the authors' successful "Vital Signs" education programme, it identifies the critical skills needed to hit the ground running as a manager. It is an accessible, easily comprehensible guide to gaining the self-confidence and the respect of staff, and to creating a steady platform for acquiring and mastering a wide range of skills in the future. 'This book is dedicated to helping leaders and managers prepare for people responsibilities. It also addresses three areas which usually make leaders and managers uncomfortable - running meetings successfully, making presentations and writing reports. [It] gives accessible and practical examples and I have no hesitation in commending it to a wide readership.' - From the Foreword by John Edmonstone

Instructor Resources: Instructor's manual, PowerPoint slides, and a test bank. Opportunities in healthcare can lead managers to new departments, to other health systems, or even around the globe. Healthcare managers who take on assignments in North America and around the world must be equipped with the knowledge and tools to work effectively with the systems, cultures, governments, and management teams of their new environments. As the profile of the global healthcare manager grows, so too does the need for future leaders to develop the skills and competencies necessary to achieve organizational success while improving the health of individuals and populations. The *Global Healthcare Manager: Competencies, Concepts, and Skills* provides a comprehensive overview of healthcare management and leadership in a global context, with real-world perspectives from a broad range of countries, cultures, and delivery settings. Written

for both students and practitioners, the book addresses the growing diffusion of diverse managerial concepts, theories, and technologies across the world's health systems. The text carries a strong cross-cultural emphasis, with chapters written by international authors who are experts on the health systems of specific countries. Key concepts are reinforced through examples, case studies, vignettes, exercises, and practical recommendations and guidelines. The book is organized into four parts: Essential Health Services Management Concepts and Practices Leadership, Organizational Design, and Change Managing the Organization-Environment Interface Looking Ahead in Global Health Management Today's global healthcare landscape requires managers to be effective leaders and change agents, with the ability to achieve positive health outcomes while navigating a dynamic and increasingly complex environment. The *Global Healthcare Manager: Competencies, Concepts, and Skills* acknowledges this complexity and equips readers with the tools they need to meet and overcome their management challenges.

This book is a practical guide for busy clinicians and educators within the biomedical sciences on how to improve their presentations. It includes specific, practical guidance on crafting a talk, tips on incorporating interactive elements to facilitate active learning, and before-and-after examples of improved slide design. Chapters discuss all aspects of exceptional presentations such as the identification of main concepts, organization of content, and best practices for creating lectures that are focused on the facilitation of learning rather than on passive information transfer. The examples provided are grounded in the biomedical sciences where presentations are necessarily dense and rich with critical content, making this book an essential read for anyone who lectures within a biomedical curriculum or presents at professional conferences. This book also addresses hot topics in medical education such as presenting on virtual platforms, and reviewing teaching materials for diversity, inclusion, and bias. These topics are not addressed in any other books on the market, and they address real gaps in medical and health professions training. Written from the perspective of an educator with over 20 years of experience in medical education, *Healthy Presentations: How to Craft Exceptional Lectures in Medicine, the Health Professions, and the Biomedical Sciences* recognizes the importance of high-quality, inclusive, and learner-centered presentations, and it provides essential guidance and support to the faculty who create them.

**Management Principles for Health Professionals** Gateway to Healthcare Management

Instructor Resources: Test bank, PowerPoint slides, answers to discussion questions and case studies, and a transition guide to the new edition. Introduction to the Financial Management of Healthcare Organizations presents financial management in the context of the healthcare organization and the broader healthcare environment. In addition to core financial management topics, the unique aspects of finance in healthcare are covered, including the objectives of healthcare financial management, the tax status of healthcare organizations, and third-party payers and payment methodologies. Practice and self-quiz problems are integrated into the book to provide the opportunity to practice the application of financial concepts and skills. Problems and mini-cases within the chapters and a comprehensive wrap-up case at the end of the book give readers additional practice. New to this edition: New data on health economics and health accounting Updates on the changes caused by the Affordable Care Act, including requirements for tax-exempt hospitals and organizational billing and collection policies New data on health economics and health accounting New information on capitation, entitlement reform, cost-benefit and cost-effectiveness analyses, and financial statements Recent legal action related to the distinctions between for-profit and not-for-profit hospitals Information regarding federal government actions against providers on fraud and abuse allegations At the end of every chapter, important points and discussion questions encourage readers

to summarize and engage in learning. Healthcare Marketing John Wiley & Sons Moves beyond traditional definitions of patient-centered care to improve the experience of a "real person" as patient How might the entire system for producing, delivering, and paying for health care be changed so that real people fare better than they currently do? This text applies "person-focused" principles to health management decision-making aimed at improving the personal experience of care within health care institutions to improve outcomes and cost savings. Written and edited by distinguished educators and researchers with decades of health care policy experience, the text examines how health care managers can initiate and direct the process of system transformation by understanding and using a greater "person-focus" in their decision-making. It encompasses the key domains of management competencies defined by the AUPHA, CAHME, and NCHL. The text brings together experts across a variety of health care management disciplines to examine how managerial decisions affect the personal experience of patient care. It is based on observations that many of the current problems facing health care managers are caused by lack of attention to what happens when real people are transformed into "patients" and treated routinely by the US health care system. Moving beyond traditional definitions of patient-centered care, the book explores how our entire system for producing, delivering, and paying for care can be changed so that the internal experience of people receiving care is a positive one. The book helps to develop specific rules for improving the experience of care through better managerial decision-making. Case studies with discussion

questions facilitate creative problem solving based on sound decision-making. Also included are extensive links to online content along with an Instructor's Manual, PowerPoint slides and more. Key Features: Describes how the person-focused model leads to better outcomes Discusses the impact of management decisions on the personal experience of clinical care Addresses the personal and clinical problems created through our current system's standard health care delivery and financing Applies basic principles of management decision-making to key operational issues to improve the personal experience of care Fulfills key learning competencies defined by AUPHA, CAHME, and NCHL Managerial Epidemiology Springer Publishing Company Suite of Online Learning Resources: Increase student engagement and enhance your teaching with resources that integrate easily into many institutions' learning management system. Student study and practice materials include "auto-feedback" multiple-choice questions and questions for discussion that reflect realistic situations that managers are likely to encounter in healthcare organizations. Instructor materials include analyses of the multiple-choice questions, key talking points for the questions for discussion, gradable review questions with accompanying rubrics, and PowerPoint slides of the book's exhibits. The Well-Managed Healthcare Organization is the most comprehensive text on healthcare management. Drawing on the experiences of high-performing and Baldrige Award-winning organizations, it details how to manage a healthcare organization using evidence, best practices, benchmarks, and a culture of continuous improvement. This

popular resource has prepared thousands of healthcare management, nursing, medical, allied health, and health information management students to effectively lead in healthcare organizations (HCOs). This edition describes how HCOs are responding to the Affordable Care Act by increasing their role in population health management and expanding their focus from acute to comprehensive care. In particular, this edition discusses:

- Creating accountable care organizations and patient-centered medical homes
- Shifting from a volume to a value focus
- Creating a culture of high reliability to improve outcome measures
- Designing the electronic health record to meet meaningful use standards and incorporate big data
- Building cooperative teams through workforce planning and inclusion
