Inclusive Leisure: A Strengths-Based  
Approach With HKPropel Access provides  
a blend of theoretical and practical  
information, moving beyond leisure  
programming and service delivery to

consider how inclusivity should be  
applied to administration, infrastructure  
design, community relations, and more.  
*Occupational Outlook Handbook,  
2002-2003* HarperCollins  
Recreation Facility Management, Second  
Edition With HKPropel Access, is the  
fundamental text for students and new  
professionals who will manage a  
recreational facility. It outlines essential  
responsibilities and prepares readers to

perform the duties of a manager for various types of facilities—ranging from recreation and aquatic centers, playgrounds, and parks to fitness centers, golf courses, and sport complexes—each with its own unique set of goals and challenges. Recreation Facility Management begins by defining the characteristics and expectations of the profession. It discusses the facility design and development process, including assessing needs, planning, reading blueprints, and securing funding. Topics such as facility resource management, financial issues, and human resources are explored in depth. The text then tackles strategies for utilizing facilities in a safe and efficient manner, addressing safety and security, maintenance, and emergency

preparedness and response plans. Finally, a detailed examination of the operation of common types of recreation facilities is offered alongside coverage of national industry standards and guidelines. Content updates to the second edition include a new chapter on ancillary space design with a focus on sustainability and technology updates as well as accessible design. A chapter was also added to address larger-scale recreational sport events and outdoor facilities. Recreation Facility Management also includes new enhancements to help students apply and retain important information: Learning aids, including chapter objectives, review questions, and summary elements, help to facilitate learning. Case studies provide real

scenarios and related discussion questions to help students better understand the material. Sample answers to the questions are provided in the instructor guide. Industry Profile features offer real-world examples from the field. Check It Out elements call out special content to help engage readers. Online materials include learning activities as well as checklists and forms from the files of actual facility managers. Recreation Facility Management offers a practical introduction to facility design, management, and maintenance for practicing recreation professionals or future professionals. It arms readers with the knowledge and skills necessary for becoming a successful facility manager in any recreation setting. Note: A code for accessing HKPropel is included with

this ebook.

The mutual love affair between people and their place is one of the most powerful influences in our lives, yet rarely thought of in terms of a relationship. As cities begin thinking of themselves as engaged in a relationship with their citizens, and citizens begin to

consider their emotional connections with their places, we open up new possibilities in community, social and economic development by including the most powerful of motivators-the human heart-in our toolkit of city-making. The book explores what makes cities lovable, what motivates ordinary citizens to do extraordinary things for their places and how some cities, such as New Orleans, Detroit, and Cleveland are using that energy to fill in the gaps that "official" city makers have left as resources have disappeared. Meet those amazing people who are truly "in love" with their cities and learn how they are key to the future development of our communities. Praise for the book: What Kageyama has done is to introduce the vital piece into the urban discussion-- the matter of love;

the piece without which all city building must fail, for "love" the corner stone of civic citizenship. It takes some bravura and acumen to champion the subject of love in the urban forum that wants to quantify, when only love qualifies and justifies the discussion of cities. Mr. Kageyama goes one step further. He provides precious indicators. Many city thinkers will follow suit, but for the time being, this is the essential book. Pier Giorgio Di Cicco Poet Laureate Emeritus, Toronto, Ontario Author of Municipal Mind: Manifestos for The Creative City For the Love of Cities succeeds in putting an exclamation point on the exceptional value of deepening the relationship that city dwellers feel for their neighborhoods by adding amenities such as parks, outdoor cafes, art galleries, trees,

flowers and even sidewalks to create a meaningful sense of place. It also explores the often hidden added value of creative entrepreneurs in creating a sense of place that attracts, nurtures and retains citizens. The book is a love note from Author Peter Kageyama to cities everywhere that will prompt you to more closely examine your own relationship with where you live, work and play. Diane Egnor Publisher and Managing Editor, 83 Degrees Media Former Book Editor, The Tampa Tribune For the Love of Cities is a must read for city changemakers. Jeff Slobotski Silicon Prairie News & Founder, Big Omaha Peter has captured something very important... love. When we love a city, we are committed to it, we engage with it, we care for it, we give our best to it. A

city that is loved also gives back. It makes those who live there feel enriched. And so you have a virtuous cycle. Charles Landry Author of *The Creative City: A Toolkit for Urban Innovators* and *The Art of City Making*

In this sweeping social history Dorceta E. Taylor examines the emergence and rise of the multifaceted U.S. conservation movement from the mid-nineteenth to the early twentieth century. She shows how race, class, and gender influenced every aspect of the movement, including the establishment of parks; campaigns to protect wild game, birds, and fish; forest conservation; outdoor recreation; and the movement's links to nineteenth-century ideologies. Initially led by white

urban elites—whose early efforts discriminated against the lower class and were often tied up with slavery and the appropriation of Native lands—the movement benefited from contributions to policy making, knowledge about the environment, and activism by the poor and working class, people of color, women, and Native Americans. Far-ranging and nuanced, *The Rise of the American Conservation Movement* comprehensively documents the movement's competing motivations, conflicts, problematic practices, and achievements in new ways.

From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply

all” • you’re being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate’s loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager “A must-read for anyone who works . . . [Alison Green’s] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work.”—Booklist (starred review) “The author’s friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers’ lives. Ideal for anyone new to the job

market or new to management, or anyone hoping to improve their work experience.”—Library Journal (starred review) “I am a huge fan of Alison Green’s Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* “Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way.”—Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together* *Business and Commerce Code* Island

Parks and recreation systems have evolved in remarkable ways over the past two decades. No longer just playgrounds and ballfields, parks and open spaces have become recognized as essential green infrastructure with the potential to contribute to community resiliency and sustainability. To capitalize on this potential, the parks and recreation system planning process must evolve as well. In *Parks and Recreation System Planning*, David Barth provides a new, step-by-step approach to creating parks systems that generate greater economic, social, and environmental benefits. Barth first advocates that parks and recreation systems should no longer be regarded as isolated facilities, but as elements of an

integrated public realm. Each space should be designed to generate multiple community benefits. Next, he presents a new approach for parks and recreation planning that is integrated into community-wide issues. Chapters outline each step—evaluating existing systems, implementing a carefully crafted plan, and more—necessary for creating a successful, adaptable system. Throughout the book, he describes initiatives that are creating more resilient, sustainable, and engaging parks and recreation facilities, drawing from his experience consulting in more than 100 communities across the U.S. *Parks and Recreation System Planning* meets the critical need to provide an up-to-date, comprehensive approach for planning parks and recreation systems

across the country. This is essential reading for every parks and recreation professional, design professional, and public official who wants their community to thrive.

It's a common complaint: the United States is overrun by rules and procedures that shackle professional judgment, have no valid purpose, and serve only to appease courts and lawyers. Charles R. Epp argues, however, that few Americans would want to return to an era without these legalistic policies, which in the 1970s helped bring recalcitrant bureaucracies into line with a growing national commitment to civil rights and individual dignity. Focusing on three disparate

policy areas—workplace sexual harassment, playground safety, and police brutality in both the United States and the United Kingdom—Epp explains how activists and professionals used legal liability, lawsuit-generated publicity, and innovative managerial ideas to pursue the implementation of new rights. Together, these strategies resulted in frameworks designed to make institutions accountable through intricate rules, employee training, and managerial oversight. Explaining how these practices became ubiquitous across bureaucratic organizations, Epp casts today's legalistic state in an entirely new light.

While technology and business patterns are evolving at a very high pace, new markets are developing, and so are consumer preferences and expectations. Over the past 30 years, entertainment industries have become sectors with immense profits and sustainable growth, the children segment being the greatest contender. However, the multitude of options in terms of attractions to choose from is not always accompanied by strict knowledge of operational standards, thus creating an increase in the risk of injury that children are subjected to during their play-time. Despite the fact that most playground equipment's are not properly certified or do not comply

with the specific provisions, most cases remain inconclusive, due to lack of evidence arising from a knowledge gap that the authorities must cover. In case of playground accidents, the investigators need to be well aware and up to date with the regulations, not only to determine who to hold accountable, but also to be able to take the necessary control measures in order to reduce children play-related injuries.

Developed by and for public works professionals, the widely used Public Works Management Practices Manual updates and improves statements that describe the basic criteria and procedures necessary to perform as a full-service public works agency and provides the framework for the objective self-evaluation of an agency. Changes to the 10th edition include 10 mandatory chapters, including a new chapter on

Asset Management (chapter 10) which involves inventory condition assessment and/or inspection; chapter 2 is reduced to 36 practices (removing three practices related to union contracts). Management of Park and Recreation Agencies Human Kinetics Book & CD. This book is sponsored by the Commission on Accreditation for Park and Recreation Agencies (CAPRA) in order to share with professionals-now and in the future-the desirable practices of the profession embodied in the Standards for National Accreditation for Park and Recreation Agencies. These standards are used as the guideline for what should be included in the book. Each chapter addresses specific standards needed for accreditation. The purpose of the book is to help

administrators of every area of recreation and parks, including those in for-profit, non-profit, commercial, and public operations. The emphasis is on public recreation and parks, since those are the agencies for which the standards were written. However, each standard can be used by any agency that provides park and recreation facilities, programs, or services. It is geared to managers and what they need to know, not to the program or maintenance supervisors. This edition of the book also includes a CD that contains a PDF version of the book and compendium materials. **Introduction to Recreation and Leisure, 3E** IGI Global

the author From an award-winning journalist, an explosive narrative investigation of the generic drug boom that reveals fraud and life-threatening dangers on a global scale—*The Jungle for pharmaceuticals* Many have hailed the widespread use of generic drugs as one of the most important public-health developments of the twenty-first century. Today, almost 90 percent of our pharmaceutical market is comprised of generics, the majority of which are manufactured overseas. We have been reassured by our doctors, our pharmacists and our regulators that generic drugs are identical to their brand-name counterparts, just less expensive. But is this really true? Katherine Eban's *Bottle of Lies* exposes the deceit behind generic-drug

manufacturing—and the attendant risks for global health. Drawing on exclusive accounts from whistleblowers and regulators, as well as thousands of pages of confidential FDA documents, Eban reveals an industry where fraud is rampant, companies routinely falsify data, and executives circumvent almost every principle of safe manufacturing to minimize cost and maximize profit, confident in their ability to fool inspectors. Meanwhile, patients unwittingly consume medicine with unpredictable and dangerous effects.

The story of generic drugs is truly global. It connects middle America to China, India, sub-Saharan Africa and Brazil, and represents the ultimate litmus test of globalization: what are the risks of moving drug manufacturing offshore, and are they worth the savings? A decade-long investigation with international sweep, high-stakes brinkmanship and big money at its core, *Bottle of Lies* reveals how the world's greatest public-health innovation has become one of its most astonishing swindles.
