The preface of this book tells that even though voyages are called mere "trips," distant lands didn't get more familiar. As the world became more open and voyages more often, the differences between foreign lands and continents became more evident as ever. This truth remains topical even today, 120 years after these words were put down on paper. Now "With the World's Great Travelers" lets you make a personal voyage through distance and time and see the most outstanding example of travel history in the world's literature. The book consists of essays by multiple authors, like Edward A. Pollard, a notable American Journalist; Charles Darwin, a famous scientist; Meriwether Lewis, a renowned explorer, one of the leaders of the Lewis and Clark Expedition, William Howard Russell, the most celebrated foreign journalist in America during the times of the Civil War and many others. This work gives a deep insight into how the world and traveling looked a century ago.

An exploration of the changes and developments in telecommunications over a span of fifty years by a business person and then Professor Emeritus, reflecting on the many changes that have taken place from when the word " telecommunications" did not exist. Two decades ago, his life in academia included no personal computer or any other desk in the Business Administration Department, and when the first fax machine came, it was hard to believe that a perfect copy of a proposed paper could be received by a long time co-author in Turku, Finland in minutes. First published in 1997, when e-mail and the Internet were still new to most people on campus.

Writing in an easy to read narrative literary style while respecting the norms of Egyptological scholarship, the author examines the contradictory opinions of major Egyptologists (and the major loonies), and brings us closer to Egypt's core meaning and influence. Along the way, he illuminates the enchanting, imaginative beauty of the Egyptian saga. Ancient Egypt built a society on a remarkable mixture of the new, the useful and the beautiful, while retaining primitive magic, obscurantism, and the infantile but extraordinarily poetic. Egypt was also one of the most optimistic nations ever founded, inventing optimistic answers to many of man's fundamental questions. Volume I surveys the religious underpinnings of the society, including the founding of the first nation - and the first nation to proclaim its sacred nature. Divine kingship, the holy city and capital city were invented here.

A two-fold purpose has been kept in view during the preparation of this book - on the one hand, to refresh the memories and, if possible, to enlarge the knowledge, of readers who have already visited Europe; on the other, to provide something in the nature of a substitute for those who have not yet done so, and to inspire them with new and stronger ambitions to make the trip. The Case Files of Jeweler Richard (Light Novel) Vol. 5 McFarland

When President George Washington fell ill six short weeks after his inauguration, he summoned Samuel Bard, one of the most prominent physicians of the day. Thereafter, when residing at his presidential home in Manhattan, Washington consistently relied on Bard for medical care. Thus Bard became the first in a line of presidential physicians, the providers of medical care for America's chief executive. From George Washington to George W. Bush, this volume examines 217 years of health care in the White House and the men and women who ministered to these presidential patients. Beginning with that first presidential physician's visit on June 13, 1789, it analyzes the relationships--sometimes fruitful and sometimes disastrous--of the presidents with their physicians. While biographical sketches detailing the background of each physician are included, the main focus of the work is the especially complex physician-patient relationship and the ways in which it has changed over time. The evolution of the presidential physician's responsibilities is also discussed, as are developments in American medicine during presidential terms.
