This dynamic collection presents a new way of writing national and global histories while developing our understanding of France in the world through short, provocative essays that range from prehistoric frescoes to Coco Chanel to the terrorist attacks of 2015. Bringing together

an impressive group of established and up-and-coming historians, this bestselling history conceives of France not as a fixed, rooted entity, but instead as a place and an idea in flux, moving beyond all borders and frontiers, shaped by exchanges and mixtures. Presented in chronological order from 34,000 BC to 2015, each chapter covers a significant year from its own particular angle--the marriage of a Viking leader to a Carolingian princess proposed by Charles the Fat in 882, the Persian embassy's reception at the court of Louis

XIV in 1715, the Chilean coup d'état against President Salvador Allende in 1973 that mobilized a generation of French left-wing activists. France in the World combines the intellectual rigor of an academic work with the liveliness and readability of popular history. With a brand-new preface aimed at an international audience, this English-language edition will be an essential resource for Francophiles and scholars alike.

France in the eighteenth century glittered, but also seethed, with new goods and new ideas. In the halls of Versailles, the streets of Paris, and the soul of the Enlightenment itself, a vitriolic struggle was being waged over the question of ownership—of property, of position, even of personhood. Those who championed man's possession of material, spiritual, and existential goods faced the successive assaults of radical Christian mystics, philosophical materialists, and political revolutionaries. The Virtues of Abandon traces the aims and activities of these three seemingly disparate groups, and the current of anti-

individualism that permeated theology, philosophy, and politics throughout the period. Fired by the desire to abandon the self, men and women sought new ways to relate to God, nature, and nation. They joined illicit mystic cults that engaged in rituals of physical mortification and sexual license, committed suicides in the throes of materialist fatalism, drank potions to induce consciousness-altering dreams, railed against the degrading effects of unfettered consumption, and ultimately renounced the feudal privileges that had for centuries defined their social existence. The explosive denouement was the French Revolution, during which God and king were toppled from their thrones.

Si les origines de la "nation" France s'ancrent dans la longue durée, la France d'aujourd'hui doit l'essentiel de ses traits à la Révolution de 1789. Nos emblèmes nationaux, l'idéal "républicain" dont chaque parti se flatte d'être le meilleur défenseur, telles sont les principales composantes de notre identité et de nos guerres "franco-françaises". Frontière encore pertinente entre la "droite" et la "gauche", la Révolution reste la matrice

d'une histoire à bien des égards exceptionnelle. Articulée autour des grands moments qui constituent autant de bornes familières, le deuxième tome de cette Nouvelle histoire de la France envisage jusqu'aux développements les plus récents.

A phenomenal bestseller in France, Metronome presents a fascinating history of Paris through the lens of the city's iconic Metro system. Did you know that the last Gallic warriors massacred by the Romans lie beneath the Eiffel Tower? That the remains of Paris's first cathedral are under a parking lot in the Fifth District?

Metronome follows Loránt Deutsch, historian and lifelong Francophile, as he goes on a compelling journey through the ages, treating readers to Paris as they've never seen it before. Using twenty-one stops of the subway system as focal points—one per century—Deutsch shows, from the underground up, the unique, often violent, and always striking events that shaped one of the world's most romanticized cities. Readers will find out which streets are hiding incredible historical treasures in plain sight; peer into forgotten nooks and crannies of the City of Lights and learn what used to be there; and discover that, however deeply buried, something always remains.

France in the World Cambridge University Press

Feeding France is the first comprehensive study of the French food industry in the decades surrounding the French Revolution of 1789. Though the history of gastronomy and the restaurant have been explored by scholars, few are aware that France was also one of the first nations to produce industrial foods. In this time of political and social upheaval, chemists managed to succeed both as public food

experts and as industrial food manufacturers. This book explores the intersection between knowledge, practice and commerce which made this new food expertise possible, and the institutional and experimental culture which housed it. Ranging from the exigencies of Old Regime bread-making to the industrial showcasing of gelatine manufacture, E. C. Spary rewrites the history of the French relationship with food to show that industrialisation and patrimonialism were intimately intertwined.

The title of this book is, of course, inspired by the famous opening words of General de Gaulle's *Memoirs of the Second World War*: All my life I have thought of France in a certain way. Wesseling brings together his essays dealing with a great variety of subjects such as culture, society, politics, and diplomacy, with one section devoted entirely to French historians. The first section contains a chapter on the famous

painter Ary Scheffer and the France of his time, that is to say the first half of the 19th century. The second chapter continues this theme and deals with Émile Zola and the Paris of the Second Empire. Two other chapters discuss aspects of the Third Republic, sports and students, respectively. The second section is devoted to French intellectuals. It offers the first in-depth analysis of the group of intellectuals that supported Zola and Dreyfus. Chapter six deals with one of the great literary figures of the interwar period—and later a notorious collaborator—Robert Brasillach. Chapter seven contains a vivid sketch of the life and work of the famous French intellectual Raymond Aron. The third section is devoted to politics and diplomacy. French foreign policy is discussed both in its long-term perspective as well as more specifically in the period of Charles de Gaulle. De Gaulle's idea of France is compared with that of an author by whom he was greatly influenced, Charles Péguy. Finally, there is a section on French history writing, including two biographical essays, one about Gabriel Hanotaux, the once famous but now nearly forgotten historian

who became Minister of Foreign Affairs, and another on Fernand Braudel, the great contemporary French historian and close friend of Wesseling. Of particular interest to scholars, students, and other researchers involved with French history, the history of ideas, and European historiography.

Nouvelle histoire de la France moderne BRILL

This book explores the process by which the French Basque country acquired a folkloric regional identity in the long

nineteenth century. It argues that, despite its origins in pre-modern customs, this stereotypical identity was invented as part of France's process of nation-building. The abolition of privileges in 1789 prompted a new interest in local culture as the defining feature of provincial France, shaping the transition from the pre-'modern' province to the 'modern' region. The relationship between the region and the nation, however, was difficult. Regional culture favoured the integration of the French Basque provinces into the French nation-state but also challenged the authority of the central state. As a result, Basque region-building reveals the strengths and weaknesses of the unitary model of French nationhood, in the nineteenth century as well as today.

At least since the French Revolution, France has the peculiar distinction of simultaneously fascinating, charming and exasperating its neighbours and foreign observers. Contemporary France provides an essential introduction for students of

French politics and society, exploring contemporary developments while placing them in a deeper historical, intellectual, cultural and social context that makes for insightful analysis. Thus, chapters on France's economic policy and welfare state, its foreign and European policies and its political movements and recent institutional developments are informed by an analysis of the country's unique political and institutional traditions, distinct forms of nationalism and citizenship, dynamic intellectual life and recent social trends. Summaries of key political, economic and social movements and events are displayed as exhibits.
