Cisco has
announced big
changes to its
certification
program. As of
February 24,
2020, all
current
certifications
will be retired,
and Cisco will
begin offering
new
certification

programs. The
good news is
if you're
working
toward any
current CCNA
certification,
keep going.
You have until
February 24,
2020 to
complete your
current CCNA.
If you already
have
CCENT/ICND1
certification
and would like
to earn CCNA,
you have until
February 23,
2020 to
complete your

CCNA
certification in
the current
program.
Likewise, if
you're
thinking of
completing
the current
CCENT/ICND1,
ICND2, or
CCNA Routing
and Switching
certification,
you can still
complete
them between
now and
February 23,
2020. A must-

Innovations in E-learning, Instruction Technology, Assessment and Engineering Education

Cisco Press Information technology is the enabling foundation for all of human activity at the beginning of the 21st century, and advances in this area are crucial to all of us. These advances are taking place

all over the world and can only be followed and perceived when researchers from all over the world assemble, and exchange their ideas in conferences such as the one presented in this proceedings volume regarding the 26th International Symposium on Computer and Information Systems, held at the Royal Society in London on 26th to 28th September 2011. Computer and

Information Sciences II contains novel advances in the state of the art covering applied research in electrical and computer engineering and computer science, across the broad area of information technology. It provides access to the main innovative activities in research across the world, and points to the results obtained recently by some of the most active

teams in both Europe and Asia.

would certify that you have developed the practical skills required for entry-level networking support positions and have an aptitude and competence for working with Cisco routers, switches, and Cisco IOS® Software. The Learning Guide, written and edited by instructors, is designed as a portable desk reference to use anytime, anywhere to reinforce the material from the course and organize your time. In

addition, the book includes expanded coverage of CCENT/CCNA exam topics. The book's features help you focus on important concepts to succeed in this course: Chapter Objectives—Review core concepts by answering the focus questions listed at the beginning of each chapter. Key Terms—Refer to the lists of networking vocabulary introduced and highlighted in context in

each chapter. The Glossary defines each key term. Summary of Activities and Labs—Maximize your study time with this complete list of all associated exercises at the end of each chapter. Check Your Understanding—Evaluate your readiness with the end-of-chapter questions that match the style of questions you see in the online course quizzes. The answer key explains each answer. Challenge

Questions and Activities—Apply a deeper understanding of the concepts with these challenging end-of-chapter questions and activities. The answer key explains each answer.

Hands-on Labs—Master the practical, hands-on skills of the course by performing all the tasks in the course labs and additional challenge labs included in Part II of the Learning Guide. Allan Reid is the curriculum lead for CCNA

and a CCNA and CCNP® instructor at the Centennial College CATC in Toronto, Canada. Jim Lorenz is an instructor and curriculum developer for the Cisco Networking Academy.

How To—Look for this icon to study the steps you need to learn to perform certain tasks.

Interactive Activities—Reinforce your understanding of topics with more than 30 different exercises from the online course identified

Interconnecting Cisco Network Devices, Part 2 (ICND2)
Third Edition
Foundation learning for CCNA ICND2 Exam 640-816
Steve McQuerry,

CCIE® No. 6108
Interconnecting Cisco Network Devices, Part 2 (ICND2), is a Cisco®-authorized, self-paced learning tool for CCNA® foundation learning. This book provides you with the knowledge needed to install, operate, and troubleshoot a small to medium-size branch office enterprise network, including configuring several switches and routers, connecting to

a WAN, and implementing network security. In Interconnecting Cisco Network Devices, Part 2 (ICND2), you will study actual router and switch output to aid your understanding of how to configure these devices. Many notes, tips, and cautions are also spread throughout the book. Specific topics include constructing medium-size routed and switched networks, OSPF and

EIGRP implementation, access control lists (ACL), address space management, and LAN extensions into a WAN. Chapter-ending review questions illustrate and help solidify the concepts presented in the book. Whether you are preparing for CCNA certification or simply want to gain a better understanding of how to build medium-size Cisco networks, you will benefit from the foundation

information presented in this book. Interconnecting Cisco Network Devices, Part 2 (ICND2), is part of a recommended learning path from Cisco that includes simulation and hands-on training from authorized Cisco Learning Partners and self-study products from Cisco Press. To find out more about instructor-led training, e-learning, and hands-on instruction offered by authorized Cisco Learning

Partners worldwide, please visit www.cisco.com/go/authorizedtraining. Steve McQuerry, CCIE® No. 6108, is a consulting systems engineer with Cisco focused on data center architecture.
