The Sun warms our days and brings light to the dark. Let's find out about the Sun, and why it's so important to life on Earth. There are many stars in the night sky, but only one that we've found so far that supports a planet filled with life, that's our star, the Sun! I Am the Sun introduces kids to the basic concepts of Space and Earth science while also teaching how important the Sun is to our very existence here on Earth. From the air we breathe to the everchanging weather, the Sun is a source of life for all of us. Young children will learn about basic concepts of astronomy, how the sun got its start in space, and how it's the glue that holds the solar system together. I Am the Sun is a great beginning science book for kids. Images are big and bright for kids ages 3-8. The concepts are basic and geared for preschool through second grade learners.

Reynolds and author and certified yoga instructor Susan Verde team up again in this book about creativity and the power of self-expression. I Am Yoga encourages children to explore the world of yoga and make room in their hearts for the world beyond it. A kid-friendly guide to 17 yoga poses is included.

I Am the Sun and You Are the Moon Abrams

A New York Times bestseller • One of Time Magazine's 100 Best YA Books of All Time • Winner of the Michael L. Printz Award • A Stonewall Honor Book The radiant, award-winning story of first love, family, loss, and betrayal for fans of John Green, Becky Albertalli, and Adam Silvera "Dazzling."—The New York Times Book Review "A blazing prismatic explosion of color."—Entertainment Weekly "Powerful and well-crafted . . . Stunning." —Time Magazine "We were all heading for each other on a collision course, no matter what. Maybe some people are just meant to be in the same story." At first, Jude and her twin brother are Noah and Jude; inseparable. Noah draws constantly and is falling in love with the charismatic boy next door, while daredevil Jude wears red-red lipstick, cliff-dives, and does all the talking for both of them. Years later, they are barely speaking. Something has happened to change the twins in different yet equally devastating ways . . . but then Jude meets an intriguing, irresistible boy and a mysterious new mentor. The early years are Noah's to tell; the later years are Jude's. But they each have only half the story, and if they can only find their way back to one another, they'll have a chance to remake their world. From the acclaimed author of *The Sky Is Everywhere*, this exhilarating novel will leave you breathless and teary and laughing—often all at once.

The Day the Crayons Quit Scholastic Inc.

The Finnish author of *Troll: A Love Story* delivers a work of "scathing satire . . . that sits somewhere between Margaret Atwood and Kurt Vonnegut" (NPR). The *Core of the Sun* further cements Finlandia Award-winning author Johanna Sinisalo's reputation as a master of literary speculative fiction and of her country's unique take on it, dubbed "Finnish weird." In an alternative historical present, The Eusistocratic Republic of Finland has bred a new human sub-species of receptive, submissive women, called eloi, for sex and procreation, while intelligent, independent women are relegated to menial labor and sterilized so that they do not carry on their "defective" line. Vanna, raised as an eloi but secretly intelligent, needs money to find her sister, who has disappeared. Vanna forms a friendship

with a man named Jare, and they become involved in buying and selling a stimulant known to the Health Authority to be extremely dangerous: chili peppers. Then Jare comes across a strange religious cult in possession of the Core of the Sun, a chili so hot that it is rumored to cause hallucinations—a temptation so enticing that it just might divert the addicted Vanna from her quest . . . "A chilling tale reminiscent of Margaret Atwood's *The Handmaid's Tale* . . . A fascinating story centered on gender politics." —The Washington Post
