University Press
Completely revised

new editions of the
market-leading
Chemistry textbooks
for HL and SL, written
for the new 2014
Science IB Diploma
curriculum. Now with
an accompanying four-
year student access to
an enhanced eText,
containing simulations,
animations, quizzes,
worked solutions,
videos and much more.
The enhanced eText is
also available to buy
separately and works
on desktops and
tablets - click here to
watch a video to learn
more. Follows the
organizational
structure of the new
Chemistry guide, with
a focus on the

Essential Ideas, Understanding, Applications & Skills for complete syllabus-matching. Written by the highly experienced IB author team of Catrin Brown and Mike Ford, with additional e-features by Richard Thornley and David Moore, you can be confident that you and your students have all the resources you will need for the new Chemistry curriculum. Features: Nature of Science and ToK boxes throughout the text ensure an embedding of these core considerations and promote concept-based learning. Applications of the subject through everyday examples are described in utilization boxes, as well as brief descriptions of related industries, to help

highlight the relevance and context of what is being learned. Differentiation is offered in the Challenge Yourself exercises and activities, along with guidance and support for laboratory work on the page and online. Exam-style assessment opportunities are provided from real past papers, along with hints for success in the exams, and guidance on how to avoid common pitfalls. Clear links are made to the Learner profile and the IB core values. Table of Contents:
 Stoichiometric Relationships Atomic Structure Periodicity Chemical Bonding and Structure
 Energetics/Thermochemistry Chemical Kinetics Equilibrium Acids and Bases Redox

The Definitive, Fully Updated Guide to Solving Real-World Chemical Reaction Engineering Problems

The fourth edition of Elements of Chemical Reaction Engineering is a completely revised version of the worldwide best-selling

book. It combines authoritative coverage of the principles of chemical reaction engineering with an unsurpassed focus on critical thinking and creative problem solving, employing open-ended questions and stressing the Socratic method. Clear and superbly organized, it integrates text, visuals, and computer simulations to help readers solve even the most challenging problems through reasoning, rather than by memorizing equations. Thorough coverage of the fundamentals of chemical reaction engineering forms the backbone of this trusted text. To enhance the transfer of core skills to real-life settings, three styles of problems are included

for each subject
Straightforward problems that reinforce the material
Problems that allow students to explore the issues and look for optimum solutions
Open-ended problems that encourage students to practice creative problem-solving skills
H. Scott Fogler has updated his classic text to provide even more coverage of bioreactions, industrial chemistry with real reactors and reactions, and an even broader range of applications, along with the newest digital techniques, such as FEMLAB. The fourth edition of Elements of Chemical Reaction Engineering contains wide-ranging examples—from smog to blood clotting, ethylene oxide production to tissue

engineering, antifreeze to cobra bites, and computer chip manufacturing to chemical plant safety. About the CD-ROM The CD-ROM offers numerous enrichment opportunities for both students and instructors, including the following Learning Resources: Summary Notes: Chapter-specific interactive material to address the different learning styles in the Felder/Solomon learning-style index Learning Resources: Web modules, reactor lab modules, interactive computer modules, solved problems, and problem-solving heuristics Living Example Problems: More than fifty-five interactive simulations in POLYMATH software, which allow students to

explore the examples and ask “what-if” questions Professional Reference Shelf: Advanced content, ranging from collision and transition state theory to aerosol reactors, DFT, runaway reactions, and pharmacokinetics Additional Study Materials: Extra homework problems, course syllabi, and Web links to related material Latest Software to Solve “Digital Age” Problems: FEMLAB to solve PDEs for the axial and radial concentration and temperature profiles, and Polymath to do regression, solve nonlinear equations, and solve single and coupled ODEs Throughout the book, icons help readers link concepts and procedures to the

material on the CD-ROM for fully integrated learning and reference.

Chemistry OUP Oxford

Ensure that the needs of all IB Students are met with this comprehensive and flexible Student Book, written specifically for the updated Spanish ab initio course. -

Communicate confidently by exploring the five prescribed themes through authentic texts and skills practice at the right level, delivered in clear learning pathways. -

Produce coherent written texts and deliver proficient presentations with grammar and vocabulary introduced in context and in relation to appropriate spoken and written registers. - Improve

receptive skills with authentic written texts, audio recordings spoken at a natural pace, and carefully crafted reading and listening tasks. -

Promote global citizenship, intercultural understanding and an appreciation of Hispanic cultures through a wide range of text types and cultural material from around the world. -

Deliver effective practice with a range of structured tasks within each unit that build reading, listening, speaking and writing skills. - Establish meaningful links to TOK and CAS, and identify learner profile attributes in action.

The audio for the Student Book is FREE to download from www.hoddereducation.com.

Introducing the Pearson Chemistry Queensland 12 Skills and Assessment Book. Fully aligned to the new QCE 2019 Syllabus. Write in Skills and Assessment Book written to support teaching and learning across all requirements of the new Syllabus, providing practice, application and consolidation of learning. Opportunities to apply and practice performing calculations and using algorithms are integrated throughout worksheets, practical activities and question sets. All activities are mapped from the

Student Book at the recommend point of engagement in the teaching program, making integration of practice and rich learning activities a seamless inclusion. Developed by highly experienced and expert author teams, with lead Queensland specialists who have a working understand what teachers are looking for to support working with a new syllabus.

Legislative History of United States Tax Conventions Pearson Education ESL

A practical and accessible course covering the English B syllabus (from 2011) for the IB Diploma. Suitable for standard and higher level students, this resource is written by an experienced IB English

teacher following the English B syllabus. Features include activities and authentic texts to develop reading and comprehension, integrated study ideas for IB central core, featuring LP (Learner profile), CAS (Creativity, Activity, Service), TOK (Theory of Knowledge) EE (Extended Essay), and a Glossary with definitions of key vocabulary. This title offers comprehensive learning and support for teachers and students, ideas for extensive reading material, activities to build language skills and cultural understanding for extension essays, research, exam preparation and a free teacher resources website:

ibdiploma.cambridge.org.

Higher Level Chemistry
Heinemann
Educational Publishers
Suitable for all examination specifications for students over 16, this friendly and reliable guide leads students through examples of each problem.

Essentials Oxford University Press, USA
Essential for NCLEX, course and competency review, this resource is a complete, concentrated outline of nursing fundamentals. Each chapter contains objectives, pre- and post chapter tests with comprehensive rationales, vocabulary review, practice to pass exercises, critical thinking case studies, as well as NCLEX alerts and new test-taking

strategies. Content includes all of the "need-to-know" facts covering the nursing process, physical assessment, communication, professional standards, health promotion through the lifespan, and more.

Pearson Baccaulaureate Physics Higher Level 2nd Edition Print and Ebook Bundle for the IB Diploma

Heinemann Educational Publishers
Our latest titles offer specific support for Paper 3 of the 2015 History curriculum. Each textbook provides comprehensive coverage of the appropriate topics, equipping students with the knowledge and skills needed to successfully answer essay questions on Paper Three. Written and developed by

experienced IB teachers, who also have experience in examining and leading workshops, these new books will help students prepare thoroughly and methodically for their exams. Each of our history textbook is supported by an enhanced eText, giving four years access to online materials such as worksheets, quizzes and enlarged source material to develop examination skills and extend studying. Each textbook provides: A clear overview and analysis of key events. Practice in analysing source material, including photographs, cartoons, letters, speeches and other documents. Support throughout for new curriculum features, including key concepts,

ATL, and international mindedness.

Approaches to learning highlighted in each activity throughout the book. Focus on the examination requirements, with 'hints for success' throughout, as well as quizzes on the eText. Theory of Knowledge section, matching the latest syllabus, and questions throughout to help with wider research and discussion.
