- Discover the game-changing theory of the cycles of history and what past generations can teach us about living through times of upheaval—with deep insights into the roles that Boomers, Generation X, and Millennials have to play. First comes a High, a period of confident expansion.

Next comes an Awakening, a time of spiritual exploration and rebellion. Then comes an Unraveling, in which individualism triumphs over crumbling institutions. Last comes a Crisis—the Fourth Turning—when society passes through a great and perilous gate in history. William Strauss and Neil Howe will change the way you see the world—and your place in it. With blazing originality, *The Fourth Turning* illuminates the past, explains the present, and reimagines the future. Most remarkably, it offers an utterly persuasive prophecy about how America's past will predict what comes next. Strauss and Howe base this vision on a provocative

theory of American history. The authors look back five hundred years and uncover a distinct pattern: Modern history moves in cycles, each one lasting about the length of a long human life, each composed of four twenty-year eras—or “turnings”—that comprise history’s seasonal rhythm of growth, maturation, entropy, and rebirth. Illustrating this cycle through a brilliant analysis of the post-World War II period, *The Fourth Turning* offers bold predictions about how all of us can prepare, individually and collectively, for this rendezvous with destiny.

This book is a

fascinating exploration of one of the four cycles in the ancient Etruscan system known as the saecula. Winter is the final cycle of endings before the time of renewal and rebirth. With hands-on exercises and rituals, author Jo Graham invites you to find the spirit of heroism within as you transform your life and soul in this challenging era. Building on the foundation that was established in *The Great Wheel*, this book reveals how the energy of this era influences your spiritual life, your relationships, and your community. Welcome the classical deities including Diana Nemorensis, Mercury, Athena Strategos, Mars, Father Dis, and others as you: Find your purpose when the

world seems out of control Create a haven for those who are in need Protect yourself and your loved ones as the crisis deepens Use your unique talents to help save your corner of the world Preserve the things you treasure for the season of Spring to come Exploring the powerful cycles of generations, life spans, and seasons, Winter offers specific techniques and support to help you see that the era of Winter is only temporary and Spring will come again. [De Claris Archigymnasii Bononiensis Professoribus a Saeculo XI Usque Ad Saeculum XIV](#) Forgotten Books How the notion of unique eras influenced the Roman view of time and the narration

of history from various perspectives. The Victorian Era. The Age of Enlightenment. The post-9/11 years. We are accustomed to demarcating history, fencing off one period from the next. But societies have not always operated in this way. Paul Hay returns to Rome in the first century BCE to glimpse the beginnings of periodization as it is still commonly practiced, exploring how the ancient Romans developed a novel sense of time and used it to construct their views of the past and of the possibilities of the future. It was the Roman general Sulla who first sought to portray himself as the inaugurator of a new age of prosperity, and through him Romans

adopted the Etruscan term *saeculum* to refer to a unique era of history. Romans went on to deepen their investment in periodization by linking notions of time to moments of catastrophe, allowing them to conceptualize their own epoch and its conclusion, as in the literature of Vergil and Horace. Periodization further introduced the idea of specific agents of change into Roman thought—agents that were foundational to narratives of progress and decline. An eye-opening account, *Saeculum* describes nothing less than an intellectual and cognitive revolution, that fundamentally reorganized the meanings of history and time.

The Christians, Gnostics, and Platonists of late antiquity all shared that era's dislike of matter and the body. The first part of this book looks at key words like *ethos*, *aiōn*, and *saeculum*. The second part investigates the Neoplatonists, the Platonists of late antiquity. In the writings of Plotinus and Porphyry, Iamblichus

and Proclus, the dislike of matter and the body was boldly expressed. The third part shows that Gnosticism was second to none in its insistence that matter and the body were evil. It was elitist, suspicious of the political world, and often filled with an interest in magic and immorality. Simon Magus, Carpocrates, and Valentinus are only a few of the Gnostics who are considered. The last part discovers dislike of matter and the body in the early Christians, although with less consistency to their worldview. It was especially notable in the attempt of Origen and Arius to place God the Son at a lower metaphysical level than God the Father in order to protect God from the evil entity of matter.

The desert fathers, the Arians, Ambrose, and Augustine are all included.
