 This book is a good comprehensive text and comes highly recommended to anyone currently involved in, looking to get involved in, or just interested in environmental management, environmental accounting and reporting' - Pacific Accounting Review This is the long-awaited 2nd edition of the benchmark publication that helped shape the developing agenda of environmental accounting. This excellent new edition provides an overview of the subject ranging from environmental management to sustainability, and integrates the major advancements that have occurred since the first edition - in both research and practice. It introduces and explains environmental issues as they relate to accountants today. This new work also places an increased emphasis on the emerging research literature in the field and reveals a consciousness of the difficulties of developing an environmental agenda in business. It makes an excellent stand-alone text for lower level students, a firm base from which the advanced student or researcher can explore research and more complex issues, and a useful guide for practitioners seeking to understand and implement environmental practice.

 Goodwill, sometimes purchased but often more significantly internally generated, is the major constituent of the value of many listed companies. Accounting aims to provide users of financial statements with useful information, and more than fifty current International Financial Reporting Standards prescribe accounting disclosure requirements in minute detail. However, these Standards dismiss internally generated goodwill with a single brief provision that it is not to be brought to account at all. The impairment regime now laid down for dealing with purchased goodwill contains severe flaws, while previous methods have also been found to be unsatisfactory. This book traces the history of the goodwill accounting controversy in detail and demonstrates that it has been a prime example of an issue 'conceived in a way that it is in principle unsolvable'. It explores the problem of recognising the importance of goodwill as a whole and finding a way of presenting meaningful information regarding it in the context of the financial statements. The author's proposed solution builds upon research undertaken and uses a Market Capitalization Statement, based on a modification of nineteenth century 'double accounting' in a modern context. Examples show

that the proposed Market Capitalization Statement has the potential to provide significant information not currently available from conventional financial statements, which in turn are freed to present clearer information.

What is whiteness? Why is it worth using as a tool in the social sciences? Making sociological sense of the idea of whiteness, this book skilfully argues how this concept can help us understand contemporary societies. If one of sociology's objectives is to make the familiar unfamiliar in order to gain heightened understanding, then whiteness offers a perfect opportunity to do so. Leaning firstly on the North American corpus, this key book critically engages with writings on the formation of white identities in Britain, Ireland and the Americas, using multidisciplinary sources. Empirical work done in the UK, including the author's own, is developed in order to suggest how whiteness functions in Britain. Bringing an emphasis on empirical work to a heavily theorized area, this important text synthesizes and reviews existing work, incorporates multidisciplinary sources of interest to those outside the sociology sphere, and features concise chapters which will engage undergraduates. Garner deftly argues that whiteness is a multifaceted, contingent and fluid identity, and that it must be incorporated into any contemporary understandings of racism as a system of power relationships in both its local and global forms.

Situating Sustainability reframes our understanding of sustainability through an emerging international terrain of concepts and case studies. These approaches include material practices, such as extraction and disaster recovery, and extend into the domains of human rights and education. This volume addresses the need in sustainability science to recognize the deep and diverse cultural histories that define environmental politics. It brings together scholars from cultural studies, anthropology, literature, law, behavioral science, urban studies, design, and development to argue that it is no longer possible to talk about sustainability in general without thinking through the contexts of research and action. These contributors are joined by artists whose public-facing work provides a mobile platform to conduct research at the edges of performance, knowledge production, and socio-ecological infrastructures. Situating Sustainability calls for a truly transdisciplinary research that is guided by the humanities and social sciences in collaboration with local actors informed by histories of place. Designed for students, scholars, and interested readers, the volume introduces the conceptual practices that inform the leading edge of engaged research in sustainability.

Real property in the form of investment, ownership and use pervades almost every aspect of daily lives and represents over 40% of Australia's wealth. Such assets do not exist in isolation - they are dynamic and forever evolving, impacted by a range of physical, economic, demographic, legal and other forces. Consequently, a true appreciation of individual assets and of the property sector as a whole demands an understanding of both the assets themselves and the context and markets in which they exist. The sector is complex and, on the face of it, confusing. It is however, not without logic and underlying themes and principles. This book provides a wider understanding of how the real property sector works. It covers topics such as the nature of real property and its functions, economic drivers, valuation principles, legal and tenure parameters, property taxation, land development and subdivision, asset and property management and sustainability - all critical components in this complex and critically important sector. It provides a wide and balanced perspective for experienced practitioners, investors, students and anyone involved in property decision-making or wishing to secure a deeper understanding of these areas. The book integrates research-based theory with practical application and first-hand insights into a sector that underpins the Australian economy, its communities and its sustainability.

Inhaltsangabe: Einleitung: Durch die Mitgliedschaft im IASC verpflichten sich Deutschland und Australien, die Rahmungsgrundsätze des IASC weitestgehend in der eigenen Rechnungslegung anzuerkennen. Aufgrund historisch gewachsener Unterschiede in den Rechtsgrundlagen sowie den finanziellen und steuerlichen Rahmenbedingungen mit einer daraus folgenden differenzierten Stellung der Jahresabschlussadressaten, bleiben nationale Besonderheiten in der Rechnungslegung bestehen. Die vorliegende Abhandlung dokumentiert diese Abweichungen sowie Gemeinsamkeiten für die handelsrechtliche Rechnungslegung von deutschen großen Aktiengesellschaften gemäß § 267 Abs. 3 HGB und von australischen "public limited companies", die als "reporting entities" im Sinne des SAC 1 gelten. Gang der Untersuchung: Zu Beginn der Arbeit erfolgt im zweiten Kapitel eine Gegenüberstellung von Rahmenbedingungen zu den beiden Rechnungslegungssystemen. Daraufhin werden in den Kapiteln drei und vier die Vorschriften zur Erstellung des Jahresabschlusses und des Lageberichts in beiden Staaten unter Vorlage des Gliederungsschemas nach deutschem Recht veranschaulicht. Bei der Darstellung der Bilanzpositionen beschreibe ich i.d.R. vorerst die Ausweissvorschriften und gehe dann aufgrund der eingegrenzten Vorgabe zusammenfassend auf den Ansatz und die Bewertung ein. Im fünften Kapitel werden abschließend die wichtigsten Unterschiede der beiden Rechnungslegungssysteme in Bezug auf die Stellung der Jahresabschlussinteressenten Aktionäre, Gläubiger und das Unternehmen selbst erläutert. In den Ausführungen behandle ich themenweise zunächst die deutschen und nachfolgend die australischen Sachverhalte zum Zwecke einer besseren Übersicht. Das Glossar dient als Nachschlagelhilfe für die australischen Begriffe. Aufgrund der gegebenen Kürze beschränke ich mich auf handelsrechtliche Vorschriften für den Einzelabschluss großer Aktiengesellschaften bzw. ethics." Certainly our industry is bound by the formal constraints of law in national, state, and local jurisdictions. What this volume reminds us, however, is that those laws are only as good as the personal "sea of ethics" in which each of us operates. THE ETHICS OF PROPERTY INVOLVEMENTS Stephen E. Roulac The Roulac Group San Rafael, California and Visiting Professor University of Ulster Ethical considerations are a dominant theme in the management literature. As "Ethics and ethical issues surround our liver, ... ethics has become one of the most rapidly growing areas of management research, with over 800 articles and 1,400 books appearing since 1990" (Schminke, Ambrose, and Miles, 1998). Compared to business and business management, however, the research and writing on real estate in an ethics context is in the very early stages of development. The lack of a developed literature on ethics in real estate is reflected in the response by one highly placed executive to my solicitation for funding to support the publication of this volume: "I didn't know there were any ethics in real estate!" Fortunately, the Summa Corporation and the American Real Estate Society believe in the importance of ethics in real estate, for their cosponsorship has made possible this special monograph on the subject of Ethics in Real Estate. The support of the Summa Corporation and the American Real Estate Society of this pioneering volume is warmly and appreciatively acknowledged.
