Books for

Young Readers You've decided to prepare for earthquakes, but it can be a little overwhelming - where do you start? "Sofie and Daniel Get Ready for Earthquakes" uses the art of storytelling to make getting ready easier, more effective, and more fun for children and parents. This book has the most recent information, from trusted sources, all together, in one place. The basics can be

done in one day. Reviewed by earthquake and tsunami experts, the 40 page book includes a full-color, charmingly illustrated story, written for parents to read to their young children. It helps kids understand earthquakes, shows kids and parents how to 'drop, cover, and hold on' properly, and helps kids feel less afraid when earthquakes happen. Parents and kids have all the

information, lists, and the fill-in-the-blank forms they need to prepare for earthquakes together. One parent said this about the book: "The story held my four year old's attention. It's funny and the rest of the pages are these great cut-out emergency plan forms, emergency kit lists, and the like. As soon as we finished reading, my son asked if he could make his own earthquake emergency kit."

Predicting Earthquakes
National Geographic Books
Discusses earthquakes, including their causes, what happens during an earthquake, where they frequently take place, and how to remain safe if an earthquake occurs.

Volcanoes
Glen Books
Read and find out about one of nature's most mysterious forces-the earthquake. Some earthquakes are so small that you don't

even feel them, while others can make even big buildings shake! Learn why earthquakes happen, where they are most likely to occur, and what to do if one happens near you.

Horrible Geography: Earth-Shattering Earthquakes (Reloaded)

Speedy Publishing LLC
Research indicates boys are interested in reading nonfiction materials, yet most children's librarians

prefer to booktalk fiction. Offering citations for more than 1,100 books, *Gotcha for Guys!* deals specifically with books to pique the interest of middle grade boys. A series of booktalks are grouped within chapters with like titles such as: *Creepy-Crawly Creatures*, *Disasters and Unsolved Mysteries*, *Action and Innovation*, and *All Things Gross*. Complete booktalks are

presented in a beginning section of chapters 1-9. A second section in each of these chapters contains short annotations and talks for other books of interest, and a third section offers lists of well-reviewed titles to consider for boys. The book is enhanced with book cover art and reproducible lists for teachers and librarians. The Age of Earthquakes Simon Spotlight The natural

forces of planet Earth have been responsible for some of the world's greatest devastation. Thirteen kinds of disasters are featured in this amazing book, showing the process and science of the disaster from the action that triggered it to its dire consequences .

Quakes!

Everbind Describes the causes and effects of earthquakes.

Natural Disasters

Turtleback Books

Read and find out about one of nature's most mysterious forces—the earthquake—in this colorfully illustrated nonfiction picture book. Some earthquakes are so small that you don't even feel them, while others can make even big buildings shake. Learn why earthquakes happen, where they are most likely to occur, and what to do if one happens near you. Now with updated

text and art, this classic picture book describes the causes and effects of earthquakes (including a tsunami). This book features rich vocabulary and fascinating cross-sections of mountains, volcanoes, and faults in the earth's moving crust. This is a clear and appealing science book for early elementary age kids, both at home and in the classroom. The text and art were vetted by Dr.

Roland Burgmann, Professor of the Department of Earth and Planetary Science at the University of California, Berkeley. This is a Level 2 Let's-Read-and-Find-Out, which means the book explores more challenging concepts for children in the primary grades. The 100+ titles in this leading nonfiction series are: hands-on and visual acclaimed and trusted great for classrooms Top 10

reasons to love LRFOs: Entertain and educate at the same time Have appealing, child-centered topics Developmentally appropriate for emerging readers Focused; answering questions instead of using survey approach Employ engaging picture book quality illustrations Use simple charts and graphics to improve visual literacy skills Feature hands-on activities to

engage young scientists
Meet national science education standards
Written/illustrated by award-winning authors/illustrators & vetted by an expert in the field
Over 130 titles in print, meeting a wide range of kids' scientific interests
Books in this series support the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering,

and Math (STEM) standards.
Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.
Gotcha for Guys!
Capstone Examines earthquakes, what causes them and their results, and looks at some notable earthquakes. *Volcanoes and Earthquakes*

Even though

Mount Everest measures 29,028 feet high, it may be growing about two inches a year. A mountain might be thousands of feet high, but it can still grow taller or shorter each year. Mountains are created when the huge plates that make up the earth's outer shell very slowly pull and push against one another. Read and find out about all the different kinds of mountains.

How Mountains Are

Made Teacher Created Materials The #1 bestselling chapter book series of all time celebrates 25 years with new covers and a new, easy-to-use numbering system! An adventure that will shake you up! That's what Jack and Annie get when the Magic Tree House whisks them back to California in 1906. As soon as they arrive, the famous San Francisco earthquake hits the city. Can Jack and

Annie save the day? Or will San Francisco be destroyed first? Did you know that there's a Magic Tree House book for every kid? Magic Tree House: Adventures with Jack and Annie, perfect for readers who are just beginning chapter books Merlin Missions: More challenging adventures for the experienced reader Super Edition: A longer and more dangerous adventure

What happens

when a volcano erupts? Can we predict earthquakes? Where do most earthquakes occur in the world? Discover what amazing things happen in nature and use your own skills to find out why! Get answers about: Tectonic plates using a soggy biscuit How gas blows cinders out of a crater with popcorn, a plate, a cup and a straw Which materials are the best protection

against heat using a chocolate bar How to measure quakes by making your own seismometer from everyday items Tsunamis by making your own model tsunami wave And much more! Encouraging young readers to investigate geography topics and to have fun while learning, this book will amaze and astound any reader with an interest in science and nature. *Earthquakes*

Scholastic Paperbacks Earthquakes can leave people and property in bad shape. At times, they can be deadly. Find out about the science of studying earthquakes and the men and women who track the movements of the ground below us. Created in collaboration with the Smithsonian Institution, this Smithsonian Informational Text builds students' reading skills while engaging their

curiosity about STEAM topics through real-world examples. It features a hands-on STEAM challenge that guides students through every step of the engineering design process and is perfect for makerspace activities. It makes STEAM career connections by providing a glimpse into the lives of real-life Smithsonian employees currently working in STEAM fields. Discover

engineering innovations that solve real-world problems with this book that touches on all aspects of STEAM: Science, Technology, Engineering, the Arts, and Math! Earthquakes Harper Collins A highly provocative, mindbending, beautifully designed, and visionary look at the landscape of our rapidly evolving digital era. 50 years after Marshall McLuhan's ground breaking book

on the influence of technology on culture in *The Medium is the Massage*, Basar, Coupland and Obrist extend the analysis to today, touring the world that's redefined by the Internet, decoding and explaining what they call the 'extreme present'. *THE AGE OF EARTHQUAKES* is a quick-fire paperback, harnessing the images, language and perceptions of our unfurling digital lives. The authors

offer five characteristics of the Extreme Present (see below); invent a glossary of new words to describe how we are truly feeling today; and ‘mindsources’ images and illustrations from over 30 contemporary artists. Wayne Daly’s striking graphic design imports the surreal, juxtaposed, mashed mannerisms of screen to page. It’s like a culturally prescient, all-knowing email to the reader: possibly the

best email they will ever read. Welcome to THE AGE OF EARTHQUAKE S, a paper portrait of Now, where the Internet hasn’t just changed the structure of our brains these past few years, it’s also changing the structure of the planet. This is a new history of the world that fits perfectly in your back pocket. 30+ artists contributions: With contributions from Farah Al Qasimi, Ed Atkins,

Alessandro Bavo, Gabriele Basilico, Josh Bitelli, James Bridle, Cao Fei, Alex Mackin Dolan, Thomas Dozol, Constant Dullaart, Cecile B Evans, Rami Farook, Hans-Peter Feldmann, GCC, K-Hole, Liam Gillick, Dominique Gonzalez-Foerster, Eloise Hawser, Camille Henrot, Hu Fang, K-Hole, Koo Jeong-A, Katja Novitskova, Lara Ogel, Trevor Paglen, Yuri Patterson, Jon Rafman, Bunny Rogers,
