Bristol Classical Press

Written by a biopsychologist, this book describes and explains transsexualism and transgenderism (TSTG) from a scientific vantage point. Why does a male violate cultural gender rules and dress and act as a woman? Why does a female violate cultural rules to dress and act as a man? Why do some males and females undergo radical medical procedures in order to permanently change their bodies so that they are closer, respectively, to female and male bodies? In this book, a Princeton University-trained physiological psychologist explores dozens of theories about what may spur transsexual and

transgender (TSTG) thinking, exposes the myths of fetishism, homosexuality, prenatal hormones, or child rearing as causes, and explains the two causes that are supported by current science. Covering a breadth of topics that include neuroanatomy, choice, psychodynamics, and transsexual transition, author Thomas E. Bevan, PhD, synthesizes the pertinent research regarding transsexualism and transgenderism across 22 scientific disciplines. The book covers various gender systems from antiquity to historical and contemporary cultures that support the biological basis of transsexualism and transgenderism, addresses human development from the time prior to conception through adulthood and potential transsexual transition, and corrects common myths and assumptions about TSTG individuals, such as that

crossdressing is basically motivated by a desire for sexual arousal. The book also includes sections that cite definitions of key terms and identify related reading, organizations for support, and current TSTG events worldwide.

These Hobby Farms livestock care manuals will help both experienced and novice hobby farmers realize their own dreams of life on the farm - for pleasure and profit.

Lexicography in Africa Walter de Gruyter  
 Bernard Walsh, agnostic theologian, has a professional interest in heaven. But when he travels to Hawaii with his reluctant father Jack, to visit Jack's dying, estranged sister it feels more like purgatory than paradise. Surrounded by quarrelling honeymooners, a freeloading

anthropologist and assorted tourists in search of their own personal paradise, and with his father whisked off to hospital after an unfortunate accident, Bernard is beginning to regret ever coming to Hawaii. Until, that is, he stumbles on something he had given up hope of finding: the astonishing possibility of love.

**The Unwashed Children of Eve**

University of Exeter Press

Selection of 24 essays by the dictionary researcher Reinhard Hartmann on 'Interlingual Lexicography', a genre much neglected in the literature, including interdisciplinary approaches to translation equivalence, its analysis in contrastive text linguistics and its treatment in the bilingual dictionary, with particular attention to the user perspective, in English and German.

*Chander and Sudha* SAGE

Whereas the relationship between truth and propositional content has already been intensively investigated, there are only very few studies devoted to the task of illuminating the relationship between truth and illocutionary acts. This book fills that gap. This innovative collection addresses such themes as: the relation between the concept of truth and the success conditions of assertions and kindred speech acts the linguistic devices of expressing the truth of a proposition the relation between predication and truth.

*Dynamic Memory Revisited* Oxford

University Press

"Transgender Rights packs a surprising amount of information into a small space. Offering spare, tightly executed essays, this slim volume nonetheless succeeds in creating a spectacular, well-researched compendium of the transgender movement." -Law Library Journal Over the past three decades, the transgender movement has gained visibility and achieved significant victories.

Discrimination has been prohibited in several states, dozens of municipalities, and more than two hundred private companies, while hate crime laws in eight states have been amended to include gender identity. Yet prejudice and violence against transgender people remain all too common. With analysis from legal and policy experts, activists and advocates, Transgender Rights assesses the movement's achievements, challenges, and opportunities for future action. Examining crucial topics like family law, employment policies, public health, economics, and grassroots organizing, this groundbreaking book is an indispensable resource in the fight for the freedom and equality of those who cross gender boundaries. Moving beyond media

representations to grapple with the real lives and issues of transgender people, Transgender Rights will launch a new moment for human rights activism in America. Contributors: Kylar W. Broadus, Judith Butler, Mauro Cabral, Dallas Denny, Taylor Flynn, Phyllis Randolph Frye, Julie A. Greenberg, Morgan Holmes, Bennett H. Klein, Jennifer L. Levi, Ruthann Robson, Nohemy Solórzano-Thompson, Dean Spade, Kendall Thomas, Paula Viturro, Willy Wilkinson. Paisley Currah is associate professor of political science at Brooklyn College, executive director of the Center for Lesbian and Gay Studies at the CUNY Graduate Center, and a founding board member of the Transgender Law and Policy Institute. Richard M. Juang cochairs the advisory board of the National Center for Transgender Equality (NCTE) in Washington, DC. He has taught at Oberlin College and Susquehanna University. He is the lead editor of NCTE's Responding to Hate Crimes: A Community Resource Manual and coeditor of Transgender Justice, which explores models of activism. Shannon Price Minter is legal director of the National Center for Lesbian Rights and a founding board member of the Transgender Law and Policy Institute. *Paradise News* Springer Science & Business Media

This volume presents twenty essays by leading scholars of Old Norse which bring into focus the nature of learned traditions - both oral and written - in medieval Scandinavia and the interpretation and re-interpretation of them over time.

Theoretical frameworks for understanding Old Norse literature is the initial topic of the collection, which then moves on to present recent work on Old Norse myth and society; current perspectives on oral traditions in performance and text; and reflections on medieval ideas about language, both vernacular and Latin. The collection is rounded off by a section on prolonged traditions - the transformation of local and imported traditions into new literary forms. Individual essays in the volume offer significant primary research as well as reconsiderations of key issues in scholarship, their subjects ranging widely, both conceptually and chronologically, around the twin themes of learning and understanding. Like the research of the volume's honorand, Margaret Clunies Ross, *Learning and Understanding in the Old Norse World* exemplifies the diversity and vigour of current research in the field of Old Norse and draws together philological, literary, historical and anthropological perspectives on the subject.

*Transgender Rights* Walter de Gruyter

Lexicography in Africa is a new book in the invaluable series Exeter Linguistic Studies and one of three volumes dedicated to lexicography to mark the fifth anniversary of the Dictionary Research Centre in the University of Exeter. It is the first attempt to fill a niche in our knowledge of lexicography on this continent. It does not pretend to be a complete survey of lexicography in Africa but a tentative one which conveys the most important trends in the field and a wealth of exemplary material. It investigates the lexicographic situation in different parts of Africa (Central Africa paper 3; Northern Africa paper 4 and Southern Africa paper 6) and the linguistic and historical background (paper 1 and 2). It also concerns itself with the user of the dictionary and his needs, types of dictionaries available and the hopes pinned on computer technology.

Cambridge Scholars Publishing

When GenderQueer was first published in 2002, it was groundbreaking, even inventing a new word for those whose voices had been hidden behind the walls of the gender binary. Now—finally!—it's republished, and those voices are still fresh and compelling in a volume that can take its place as one of the field's early and most original "classics." Michael Kimmel SUNY Distinguished Professor of Sociology and Gender Studies Stony Brook University (retired) Perhaps more than any other issue, gender identity has galvanized the queer community in recent years. The questions go beyond the nature of male/female to a yet-to-be-traversed region that lies somewhere between and beyond biologically determined gender. In this groundbreaking anthology, first published nearly two decades ago, three experts in gender studies and politics navigate around rigid, societally imposed concepts of two genders to discover and illuminate the limitless possibilities of identity. Thirty first-person accounts of gender construction, exploration, and questioning provide the groundwork for cultural discussion, political action, and even greater possibilities of autonomous gender choices. Joan Nestle is the cofounder of the Lesbian Herstory Archives in New York and the writer and

editor of six books including the groundbreaking *Women on Women* series. Riki Wilchins is the executive director of GenderPAC, the national gender advocacy group, and the cofounder of the Gender Identity Project of New York City's Lesbian and Gay Center. She is the author of *Read My Lips: Sexual Subversion and the End of Gender*, *Gender Theory*, *Burn the Binary* and *TransGRESSIVE*. Clare Howell is a senior librarian at the Brooklyn Public Library.

In this collection of articles, the author reflects on the nature of language, the art of lexicography and the developments in communication, the media and information technology in the late 20th century. The three main subjects looked at are: language at large, and particularly English, the most widely used language in the history of the world; the art and study of dictionaries and reference science, embracing all past, present and potential reference materials - from the "OED" to the "Yellow Pages"; and the processes through which communication, information and knowledge has evolved - from cave art to the personal computer.

Theories of Art Today Waxmann Verlag

This comprehensive introduction by two of the world's leading lexicographers presents a course in dictionary-making for publishers, colleges, and universities world-wide. The book takes readers through building a corpus, analysing the data, and writing entries. Numerous exercises show the use of software to manipulate data and compile entries.

**Beginning Shepherd's Manual** Wiley-Blackwell

In the fourth volume of her pioneering history, Julie Coleman considers the trends of lexicographers in a period dominated by the Second World War, the Cold War, civil rights movements, and varying youth trends. It will fascinate all those interested in slang and its relationship with social and cultural change.

**The Oxford Guide to Practical**

**Lexicography** Independently Published  
In this fascinating work, theoretical discussions of sex, sexuality, gender and law, and an extensive range of primary and secondary research materials, are combined to provide an insightful analysis into the inadequacies of current law.

**Interlingual Lexicography** American-Scandinavian Foundation

Devaki Nandan Khatri's Chandrakanta is the virtual Taj Mahal in Hindi fiction, still as much glorious and historical. As the Taj is the emblem of real love, here we have the fictional counter-part. What's more, it is the exuberance of magic and romance,

imagination and fantasy, suspense after suspense, battles and wars, espionage and conspiracy, tricks and tact, all blended together to make a sensational love story. Here we have the aiyars, human beings with extraordinary capacity to transmogrify themselves and take on the appearance of anybody, their voice, their manners and all. Moreover, there is the Tilism, which is a hidden treasure constructed underground with ingenious safeguards and magic locks and entrances. Chandrakanta has the spell of fantasy, a detective novel, a romance per excellence. It can be regarded as the fictional mother of Harry Potter.

Dictionaries and Their Users Bloomsbury Publishing USA

In the ancient civilizations of the Eastern Mediterranean, textiles were generally much more costly than foodstuffs, animals or bronzes; it is very likely that the same was the case throughout prehistoric Europe. In this study, the first for over seventy years, Klavs Randsborg examines completely preserved woollen dresses, both female and male, from Danish oak coffin graves of the early second millennium BC. These garments, matched in age and superb preservation only by finds from Ancient Egypt, along with related artefacts such as images and figurines, are used to build up a rich picture of Bronze Age society and culture in the context of archaeological, ethnographical and historical information from Europe and beyond.

**Modern Lexicography** Duke University Press

In the idyllic university town, young women daydreamed as they lay on the grass and gazed up at the clouds. Young men took morning walks at Alfred Park. Hot summer afternoons were for drinking sherbet and eating watermelons, and evenings were meant for reading poetry. It was also a time of stifling social mores, and love was an unattainable ideal seldom realized. Allahabad of the 1940s is the serene backdrop to the turbulence of Chander's love for his professor's daughter Sudha. Driven by his passionate belief in the transcending purity of their love, Chander persuades Sudha to marry another man, to devastating consequences. Unhinged by his separation from Sudha and consumed by a restless desire to make sense of love—Is it really about sex? Is the purity of love a lie?—Chander spirals into a destructive affair with the seductive Pammi. Immensely popular since its publication more half a century ago, Chander & Sudha continues to seduce readers with its potent mix of tender passion and

heartbreaking tragedy.

*The Transgender Studies Reader* Walter de Gruyter

More than ever before, the arts are shaping and influencing our daily lives through the media and the creative industries. The arts are no longer confined to museums and theatres, but are adding value to our national economies and improving the quality of education. This has implications for arts education.

However, unlike other subjects taught at schools, the arts have rarely made their purpose clear: Why are they taught? What is good arts education? And what are the benefits of teaching creative subjects or using creative ways to teach? In 2004 Professor Anne Bamford conducted the first international analysis of arts education research for UNESCO, in partnership with IFACCA and the Australia Council. Comparing data and case studies from more than 60 countries, the book analyses the differences between 'education in the arts' and 'education through the arts'. While appreciating that arts programmes are embedded in their unique social and cultural contexts, Professor Bamford develops internationally comparable standards for quality arts education. In addition, she identifies a number of concrete educational, cultural, and social benefits of arts education. This definitive work is of major interest to policy-makers, educators and artists.

Professor Anne Bamford is Director of the Engine Room at the University of the Arts London and has an international reputation for her research in arts education, emerging literacies and visual communication. Through her research as a World Scholar for UNESCO, she has pursued issues of innovation, social impact and equity and diversity. She has conducted major national impact and evaluation studies for the governments of Denmark, The Netherlands, Belgium and Australia.

The Transgender Phenomenon OUP Oxford  
Roger Schank's influential book, *Dynamic Memory*, described how computers could learn based upon what was known about how people learn. Since that book's publication in 1982, Dr Schank has turned his focus from artificial intelligence to human intelligence. *Dynamic Memory Revisited* contains the theory of learning presented in the original book, extending it to provide principles for teaching and learning. It includes Dr Schank's important theory of case-based reasoning and assesses the role of stories in human memory. In addition, it covers his ideas on non-conscious learning, indexing, and the cognitive structures that underlie learning

by doing. *Dynamic Memory Revisited* is crucial reading for all who are concerned with education and school reform. It draws attention to how effective learning takes place and provides instruction for developing software that truly helps

students learn.

*Living Words* Routledge

A pioneering volume addressing issues related to cultures, ideologies, and the dictionary. A cross-cultural and cross-linguistic study with focus on selected Western and non-Western languages. A

number of in-depth case studies illustrates the dominant role ideology and other types of bias play in the making of a dictionary. The volume includes invited papers of 40 internationally recognized scholars.
