## CAITLYN DESTINEY

*Étude de fonds marins provenant du voisinage des Açores et de la portion orientale de l'Atlantique nord* Routledge  
 There are few achievements of modern man which can compare to the Suez Canal. In Egypt-the land of the most famous wonders of antiquity-the Suez Canal was built as the first technical wonder of the industrial revolution. Ferdinand de Lesseps was a man straddling two epochs-the romantic utopianism of Saint Simon and the modern world of technocracy. The gigantic project was at its start shouldered by the crowds of tens of thousands of forced laborers still available and ended as a show-piece for

modern mechanical earth-moving techniques. The canal builders themselves were still polyhistorians in the old sense: engineers cum-zoologists; naval officers-cum-geologists; diplomats meddling with chemistry. During the four generations of the existence of the Suez Canal, the fateful professional narrowmindedness became progressively worse. The engineers continued their work in and around the Canal, but they became oblivious and unresponsive to the environmental impact, to the fascinating changes in the biotic scenery which they were producing with their own hands.

This volume presents the Proceedings of the International Conference of the WADI project held in Malta, 5-8 November 2008, at the end of the project itself. The WADI project funded by the European Commission, was carried out from 2006 to 2008 by a consortium of researchers from European and Mediterranean countries, and was focused on coastal water bodies, aiming at integrating water management and the needs of all stakeholders. The Proceedings illustrate some of the outcomes of the WADI project that focused on case studies represented by water bodies in the Mediterranean coastal area.

Actes de l'Académie Nationale des Sciences, Belles-Lettres et Arts de Bordeaux

Crimes presque parfaits, petits meurtres entre deux gares, faits divers nourris de corruption, de trahison amoureuse ou de

chantage, Matsumoto Seichô nous entraîne dans le sillage de ces assassins de tous les jours de la société japonaise. Dans les bars, on découvre la vérité au fond d'un verre et on apprend la poésie dans un annuaire des chemins de fer, aux quatre coins du Japon, dans les rues de Tokyo ou de petites villes de province traditionnelles, partout où ces peurs que l'on croyait imaginaires deviennent réalité. Trois des plus célèbres polars du légendaire Matsumoto (1909-1992), surnommé le "Simenon japonais" et auteur de centaines de livres vendus à plusieurs millions d'exemplaires.

Estuaries and Coasts

Living Languages is simply bursting with practical and original ideas aimed at teachers and trainee teachers of foreign languages in secondary schools. Written by a team of experienced linguists, this book will inspire and motivate the foreign language classroom and the teachers who work within it. Living Languages comprises eight chapters and is structured around the integrated classroom, merging language learning with different aspects of the wider curriculum such as multimedia, theatre and music, celebrations and festivals, sport, and alternative approaches to teaching languages. A DVD is also included with the book containing additional teaching materials and the associated films and audio recordings which make this a fully developed and effective teaching resource. Twenty-eight real-life case studies and projects are presented, all of which have been tried and tested in the classroom with many having won recent educational awards. Ideas and activities outlined in this unique

resource include: Languages and multi-media projects involving different uses of technology such as film-making, Digital Storytelling and subtitling in different languages; Languages and theatre and music including the work of the Théâtre Sans Frontières with its Marie Curie Science Project; Motivating pupils to learn languages whilst keeping fit including examples from Score in French, The German Orienteering Festival and Handball in Spanish; Continuing Professional Development to inspire secondary language teachers to continue their individual professional development. The chapter contains concrete examples of others' experiences in this area and includes details of support organisations and practical opportunities. Each project is explored from the teachers' perspective with practical tips, lesson plans and reflections woven throughout the text such as what to budget, how to organise the pre-event period, how to evaluate the activity and whom to contact for further advice in each case. Activities and examples throughout are given in three languages - French, German and Spanish.
