In the late 1980s, the National Cancer Institute initiated an investigation of cancer risks in

populations near 52 commercial nuclear power plants and 10 Department of Energy nuclear facilities (including research and nuclear weapons production facilities and one reprocessing plant) in the United States. The results of the NCI investigation were used a primary resource for communicating with the public about the cancer risks near the nuclear facilities. However, this study is now over 20 years old. The U.S. Nuclear Regulatory Commission requested

that the National Academy of Sciences provide an updated assessment of cancer risks in populations near USNRC-licensed nuclear facilities that utilize or process uranium for the production of electricity. Analysis of Cancer Risks in Populations near Nuclear Facilities: Phase 1 focuses on identifying scientifically sound approaches for carrying out an assessment of cancer risks associated with living near a nuclear facility, judgments about the strengths and

weaknesses of various statistical power, ability to assess potential confounding factors, possible biases, and required effort. The results from this Phase 1 study will be used to inform the design of cancer risk assessment, which will be carried out in Phase 2. This report is beneficial for the general public, communities near nuclear facilities, stakeholders, healthcare providers, policy makers, state and local officials, community leaders, and the media.

When Christina Caskey's health took a dramatic and sudden turn for the worse in 2003, she found herself in a medical nightmare: afflicted with a debilitating illness that no nearby doctor could diagnose. Refusing to give

up, she sought help online and from doctors across the country. This book is a result of her struggles and contains what she has learned while trying to get the medical care she needs. Christina has written this book to help you: - Get the most out of your doctor's visits - Manage your medications - Organize your medical records and insurance papers - Correspond with your insurance company or companies in the event of a problem or denial - Find useful health information online for

either a known or unknown diagnosis - Learn travel tips for out-of-town doctor visits - Make the best of your hospital stays - Be proactive about your medical care The book provides tables and forms to help you summarize your health problems; develop questions for effective doctor's appointments; keep track of your symptoms, labs, and medications; and record your medical provider and insurance company's contact information. If you see a

doctor regularly or are trying to find the right doctor, this book will help you get more out of your medical care than you ever dreamed possible. Christina Caskey lives in Flagstaff, Arizona, with her husband, Robert. She is the mother of four grown children.
