This publication

provides a
comprehensive and
scientifically accurate
guide to the best-
known and most
important medicinal
plants, including those
of special commercial
or historical interest. It
includes descriptions of
more than 300
medicinal plants and
their close relatives,

with each entry summarising botanical background, geographical origin, therapeutic category, historical and modern uses, active ingredients, and pharmacological effects. Over 500 full-color photographs are included to assist in the identification of the plants.

Wetlands and people

Jonathan Ball
Publishers

This is a guide to every tree and woody shrub indigenous to the province of Mpumlanga and the entire Kruger National Park.

Designed for use by beginner tree enthusiasts and the seasoned botanist, it details more than 950 species of trees and shrubs.

Incomes from the Forest Jacana Media

Descriptions of 369 indigenous, naturalized, or cultivated species (97 families) of plants in North Africa. Intended to "bridge the gap between folk and modern medicine."

Arranged alphabetically by family names. Each entry gives species name, vernacular names in Arabic, Berber, English, and French; geographical area of growth; uses; and numbers referring to bibliographical citations. 103 plates. Glossary, bibliography (66 references), and indexes (medicinal, common names, and species).

Applied Ethnobotany
Earthscan

"The work should be of use to botanists, chemists, ethnopharmacologists,

medical workers and anthropologists. Recent research indicates that Zulu traditional medicine is a working, adaptive and self-monitoring system, eminently worthy of further research. With the flora from which it comes, it is a heritage to be highly valued and conserved."--BOOK JACKET.

Medicinal Plants of the World UW-

Madison Libraries
Parallel Press
Brings together the work of a wide range of scholars to explore the history of churches and education.

South African voices:
Created in olden times

Boydell & Brewer Ltd
A much needed examination of contemporary approaches to animal healing in South Africa,

informed by a strong understanding of history.
The Ama-Xosa Het Spinhuis
First Published in 2001.
Routledge is an imprint of Taylor & Francis, an informa company.
Healing Plants
Manchester University Press
?[Praeg] applies the notion of ?sacrificial violence?, as developed by Girard, to the genocide in Rwanda, necklace burnings in South Africa, and the phenomenon of family murders. He shows how there is an underlying logic tying these together, while at the same time resisting a unifying (modernist) discourse which attempts to eradicate the differences. This is an extremely interesting,

at times fascinating, text. It is very well written and ... [the] insights gained leave no option but to rethink the manifestation of violence fundamentally.? ? Paul Cilliers Department of Philosophy, Stellenbosch University
Trees and Shrubs of Mpumalanga and Kruger National Park
 Jacana Media
 A theoretical and practical guide on how to conduct and report on research at undergraduate and postgraduate level. Uses the most current perspectives in the field; both locally and internationally; to facilitate the understanding and application of theories; goals; methods and strategies. Aimed at scholars; academics; researchers; and

Master's and doctoral students who are conceptualising and conducting research
Reaction to Conquest
 International Water Management Institute (IWMI)
 Documentation and comparison methods to assess options for forest-based livelihoods and their outcomes. The contributions are based on the premise that livelihood and conservation goals can be best achieved by improving information flow about changes in the environment, and the impacts of forest use. The authors report on the strengths and weaknesses of methods that have been tried in the field.
Rituals and Medicines
 CIFOR
 4e de couv.: People's Plants is a scientific

review of all of the most important useful plants of southern Africa. It remains the first and only fully illustrated ethnobotanical reference source for southern Africa. In this expanded and updated second edition, traditional and contemporary uses of more than 700 plants are described and illustrated in 20 chapters, each dealing with a specific category of plant use. This fascinating book is a must for anyone interested in useful plants, new crop plants, medicinal plants, new product development, ecotourism, rural development, traditional crafts, African culture, ethnobotany and botany in general--

Cambridge University Press
For many different reasons, speakers borrow words from other languages to fill gaps in their own lexical inventory. The past ten years have been characterized by a great interest among phonologists in the issue of how the nativization of loanwords occurs. The general feeling is that loanword nativization provides a direct window for observing how acoustic cues are categorized in terms of the distinctive features relevant to the L1 phonological system as well as for studying L1 phonological processes in action and thus to the true synchronic phonology of L1. The

collection of essays presented in this volume provides an overview of the complex issues phonologists face when investigating this phenomenon and, more generally, the ways in which unfamiliar sounds and sound sequences are adapted to converge with the native language's sound pattern. This book is of interest to theoretical phonologists as well as to linguists interested in language contact phenomena."

Bushman dictionary

John Benjamins
Publishing

The book presents a broad and multi-dimensional perspective on the topic of knowledge production in and of Africa and seeks changing its post-

imperial pattern. This endeavour reflects the concern that in our globalised world, Africa is misrepresented twice: by the ways knowledge about it is selected by gatekeepers of knowledge, and by deliberate suppression of knowledge on Africa. The contributions to this volume address diverse aspects of knowledge production: they examine the existing knowledge-producing frontiers in Africa; they challenge methodological and theoretical universalisms in social science scholarship on the African continent; they look into the interface between the indigenous and modern knowledge systems and the role of African epistemologies and intellectuals in the

production of knowledge.

People's Plants CRC Press

.. book which explores the journey of celebrating the link between people and nature, the book reveals how plants, animals and landscapes are profoundly reflected in Xhosa language, stories, poetry, religious rituals, healing practices and everyday customs that define Xhosa culture. Over the years cultural and spiritual meaning of nature in South Africa has been poorly recorded and often misunderstood. The current trade of medicinal plants is often destructive and unsustainable with an estimated 27 million South Africans making use of indigenous

medicines. This is a serious detriment as natural resources have been a reliant for underprivileged people who gain food, fuel, medicines, and building materials from wild plants. Therefore the addition of information on edible and medicinal plants is of extreme importance ... *Voices from the Forest* gives a fresh positive approach to biodiversity conservation in SA by showing that people's values for natural resources can be considered positively as a way forward to continued sustainable use. The book explores the role that nature plays in the cultural and spiritual landscapes of the Xhosa people in the Eastern Cape of South Africa and serves as a

pointer to sustainable practices in the future. The underlying aim is ultimately sustaining cultural heritage and conserving biodiversity because in our modernising world cultural diversity is threatened by the loss of natural diversity and finding ways of protecting the region's biodiversity and cultural diversity is of vital importance"-- Publisher's website.

Body and Mind in Zulu Medicine

AFRICAN SUN MeDIA
With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for

the prevention and treatment of diseases, Africa remains a minor player in the global natural

Zulu Medicinal Plants

Southern African Migration Programme

One of the first studies of the Xhosa as distinct from other tribal communities in South Africa, published in 1932.

Medicinal Plants of Dolpo Virago Press

A Xhosa prince reluctantly leaves the University College of Fort Hare and goes back to the land of his ancestors to take his place as king of the Mpondomise. The clash of his modern ideas and the traditional beliefs of his people mirrors the dash of the western way of life with African custom and tradition -- church-

people versus traditionalists, school people versus 'red-ochre people', boarding school activities versus the inkundla or assembly at the royal place. The conclusion, that disaster can be averted only by the willingness of opposing forces to work together for mutual comprehension of the legitimate claims of tradition and modernity, gives a foretaste of the spirit that governed modern South Africa's political transformation.

Inqumbo Yeminyanya -- The Wrath of the Ancestors -- is a classic of Xhosa literature. A C Jordan has a keen eye for detail, a delightful sense of humour and a dramatic style. Literal translations of Xhosa images, idioms and proverbs transport

readers to the Tsolo district and conjure up the memorable speeches of the Mpondomise counsellors.

Medicinal Plants of North Africa Cambridge University Press

Written both for beginners and seasoned herbalists, this medicinal guide to native North American plants and herbs includes a color identification section.

Annals of the Eastern Cape Museums LIT Verlag Münster

While increasing attention is being paid to the drivers and forms of entrepreneurship in informal economies, much less of this policy and research focus is directed at understanding the links between mobility and

informality. This report examines the current state of knowledge about this relationship with particular reference to three countries (Mozambique, South Africa and Zimbabwe) and four cities (Cape

Town, Harare, Johannesburg and Maputo), identifying major themes, knowledge gaps, research questions and policy implications.
