Clinical Decision Making: Case Studies in Medical-Surgical Nursing Elsevier Health Sciences

“Dorman and De Chesnay...offer a wealth of valuable information students and other healthcare providers would normally not receive until they were in the trenches of their global experience...[They] deliver...nuances of ideology about care and disease from a number of different countries, what global health policy entails and means to healthcare providers traveling the world, along with case studies from a number of guides/experienced global experts.” -Lorna Kendrick, PhD, APRN, PMHCNS-BC Professor and Director, School of Nursing, California State University San Marcos
 From the Foreword
 Case Studies in Global Health Policy Nursing unpacks key global health issues and analyzes the surrounding health care policies and their impact through case studies. Designed specifically for graduate nursing students, this text explores the implications of global initiatives designed to eradicate disease and promote physical and mental health. As globalization takes a front row seat in the digital age and political dynamics shift more rapidly than ever, possibilities and opportunities for health care have arisen beyond the hospital-based focus, especially for diseases and trends that cross continental divides. Every case study contains a multidisciplinary perspective, featuring contributions by expert nurses, public health professionals, and policy researchers. Presented in a consistent format for ease of use, each case study includes an overview, background, relevant

research, and in-depth information on its significance as a critical global issue. This text covers critical, current topics such as health care for transgender individuals, refugees, and patients on the autism spectrum, as well as ongoing problems like access to clean water, HIV/AIDS, and human trafficking. End-of-chapter exercises reinforce content and supplementary instructor materials are available. Key Features: Delivers topical, in-depth examination of key global issues for graduate-level nursing students Provides consistent format for each case study for ease of use Presents an interdisciplinary approach with content from expert nurses, public health professionals, and policy researchers

Nursing Case Studies in Caring Jones & Bartlett Learning

Perfect for: • Bachelor of Nursing Students • Diploma of Nursing Students Apply theory to practice with the Clinical Cases textbook series! Get to know the fundamentals of nursing with this nursing textbook, which offers nursing students insightful case studies based on real-life situations that you are likely to encounter in a practical environment. Benefit from Scully and Wilson’s Clinical Cases: Fundamentals of Nursing Case Studies nursing textbook, which has been written to assist with exam preparation and revision thanks to its collection of multiple choice questions and answers. Clinical Cases: Fundamentals of Nursing Case Studies is clearly structured to maximise your learning. Each case study begins with an introduction of the presenting condition and its symptoms. As the scenario develops, information concerning the patient’s condition, tests and medications are provided. At the close of each case study, the patient outcomes are explored in addition to a discussion of the most significant considerations of the scenario. It is strongly recommended that nursing students enrolled in the Diploma and Bachelor Nursing courses use Fundamentals of Nursing Case

Studies alongside Potter and Perry's Fundamentals of Nursing, 4th Edition by Jackie Crisp, Catherine Taylor and Geraldine Rebeiro. This enables you to maximise your learning and develop a very strong understanding of core nursing concepts. Other titles in this series: • Clinical Cases: Medical-Surgical Nursing Case Studies by Janine Bothe. • Clinical Cases: Nursing Care Case Studies by Margaret Webb and Ellie Kirov. Other formats: This book is also available as an App via the Apple App Store <https://itunes.apple.com/au/app/clinical-cases-fundamentals/id620500072?mt=8> • Easy-to-understand, logical layout. • 24 case studies covering pertinent nursing topics, including Vital Signs, Skin Integrity, Medication Therapy and Pain Management. • Multiple choice questions to test your knowledge throughout the textbook. • Explanations provided for all answers. • References for further reading and research. • Designed as an exam preparation and revision tool.

Simulation Scenarios for Nursing Educators, Second Edition Springer Publishing Company

Perfect for: • Bachelor of Nursing Students. • Diploma of Nursing students. Apply theory to practice with the Clinical Cases textbook series! Janine Bothe's Clinical Cases: Medical-Surgical Nursing Case Studies is part of the Clinical Cases textbook series, which offers nursing students a collection of scenarios that are common in a variety of practical settings. Some of the topics covered in Medical-Surgical Nursing Case Studies include: Cardiovascular, Gastrointestinal, Musculoskeletal and Respiratory in relation to medical-surgical nursing. The Medical-Surgical Nursing Case Studies textbook is complete with multiple choice questions throughout the chapters so you can revise and test your knowledge as you progress through the text. Best of all, use Bothe's nursing textbook alongside Lewis' Medical-Surgical Nursing, 3rd Edition by Diane Brown and Helen Edwards to really excel at your Diploma and Bachelor of Nursing courses. Benefit from the logical structure of this nursing textbook. Medical-Surgical Nursing Case Studies features a clear introduction that explores an existing condition and outlines its symptoms. Further details are then provided to help you form a more complete context, including: patient's conditions, tests, medications and other considerations. Each case study within this nursing textbook provides a thorough conclusion that examines patient outcomes and the case's key points. If you enjoy learning from real life cases, the Clinical Cases textbook series is the perfect educational suite to support your nursing education. Janine Bothe's Clinical Cases: Medical-Surgical Nursing Case Studies is perfect for use during exam preparation or as a study tool, providing an engaging approach to learning and revision. Browse other titles in this series to enhance your knowledge of core nursing skills and theories. Other titles in this series: • Clinical Cases: Fundamentals of Nursing Case Studies by Natasha Scully and Damian Wilson • Clinical Cases: Nursing Care Case Studies by Margaret Webb and Ellie Kirov Other Formats This book is also available as an App via the Apple App Store (<https://itunes.apple.com/au/app/clinical-cases-medical-surgical/id666477607?mt=8>) • Easy-to-understand, logical layout. • 22 case studies covering the body systems. • Multiple choice questions to test your knowledge throughout the textbook. • Rationales provided for all answers. • References for further reading and research. • Designed as an exam preparation and revision tool.

Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing, diagnosing, and managing cases in family and primary care. Composed of more than 70 cases ranging from common to unique, the book compiles years of experience from experts in the field. It is organized chronologically, presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format. This includes differential diagnosis and a series of critical thinking questions ideal for self-assessment or classroom use.

[Fundamentals of Nursing Test Success](#) Springer Publishing Company

Contains 40 pediatric case histories and questions, based on real life client situations. Every case contains an introductory blueprint of variables that must be considered while evaluating that particular scenario, which are pertinent concerning the client, nursing protocol, and setting of care.

Examples of these variables include the client's age, gender, or culture, the client with a pre-existing condition, legal issues, or communication skills.

Case Studies in Nursing Fundamentals Saunders

Real-world scenarios help you develop clinical reasoning skills for primary care! Case Studies in Primary Care: A Day in the Office, 2nd Edition includes 50 case studies on the most commonly encountered situations in primary care. Demonstrating the kinds of health problems that a Nurse Practitioner or Physician Assistant might see during a typical clinical day, case studies cover patients from various cultures and all ages. You're asked to analyze

data and think critically in reaching accurate diagnoses and planning effective treatment; you can then submit your responses online for grading and instant feedback. Real-world scenarios offer the opportunity to analyze clinical situations likely to be encountered in today's primary care settings, providing practice in clinical reasoning skills. Day in the Office format presents cases hour by hour, in the way a typical clinical day might unfold. Emphasis on problem-based learning helps you to think critically and analyze clinical situations — such as ear infections, diarrhea, and coughing and fever — in order to provide appropriate primary care. Six NEW cases are included (for a total of 50), with three focusing on older clients with more complex health challenges, one addressing unplanned pregnancy, and two addressing practice management issues. NEW! Emphasis on follow-up care addresses patients coming to the primary care setting from retail clinics, rehabilitation settings, or acute-care settings, and underscores the importance of interprofessional collaboration. NEW! Enhanced patient diversity includes cases for all age groups, and reflects a more contemporary appreciation of cultural diversity and gender/gender identity. NEW! Updates to all cases ensure that case studies and feedback are consistent with the latest research evidence, clinical practice guidelines, and national and international treatment standards. NEW! Online answer submission allows you to write Assessment and Plan answers in the printed book, then submit answers online for grading and feedback. NEW! Grading rubrics are provided on the companion Evolve website to help you develop your answers. NEW! Introduction explains how to get the most out of the book.

Created especially for nurses, the Clinical Decision Making series helps to bridge the gap between content knowledge and clinical application. Case Studies in Maternity and Pediatric Nursing provides 80 nursing case histories that include critical thinking questions and answers based on real-life client situations. Every case contains a blueprint of variables that must be considered while evaluating a particular scenario, and are pertinent concerning the client nursing protocol and setting of care. Examples of these variables include age, gender, cultural influences, pre-existing conditions, legal issues, or communication skills. Each blueprint and case is different just as each clinical situation is unique. By simulating the decision-making process, learners gain the confidence needed to make informed clinical judgments that will make them successful practitioners. Simply stated, Clinical Decision Making shortens the distance between theory and practice like no other educational tool!

[Case Studies in Global Health Policy Nursing](#) Elsevier Health Sciences

This text presents realistic case studies and patient care scenarios encountered in the clinical setting to facilitate the development of critical thinking skills. Using a straightforward, readable style, it builds a fundamental knowledge base and reinforces nursing concepts and principles. Guiding readers through the application, analysis, and synthesis of knowledge in clinical situations, it also integrates learned knowledge with the nursing process tradition and applies it to critical thinking. Section One reinforces fundamental concepts and principles pertinent to nursing practice and demonstrates how learned knowledge is applied to patient care situations. Section Two helps readers prioritize and make sound clinical decisions. Section Three presents clinical situations using an intershift report format. Section Four provides answers for selected case studies. A CD-ROM, bound in the book, includes test questions and other activities to give students additional practice in thinking critically.

Perfect for: • Diploma of Nursing Students. Apply theory to practice with the Clinical Cases textbook series! Clinical Cases: Nursing Care Studies is the perfect textbook for nursing students completing their Diploma. This nursing book offers a variety of case studies based on common real-life examples that you are likely to encounter in practice. Written by Margaret Webb and Ellie Kirov, Nursing Care Studies focusses on key nursing care topics, including: Vital Signs, Skin Integrity and Wound Care, Community-based Care, General Health Assessment, Medications and Palliative Care. Benefit from the logical structure of this nursing book, where each case study begins with an introduction of the presenting condition and associated symptoms. As the scenario develops, more information is provided, such as the patient's condition, medications, tests and other important factors. Best of all, the conclusion of each case study emphasises patient outcomes and emphasises key points, providing you a great summary to reflect on. Make the most of Clinical Cases: Nursing Care Studies by using it in conjunction with Tabbner's Nursing Care: Theory and Practice, 6th Edition by Gabby Koutoukidis, Kate Stainton and Jodie Hughson as you progress through your Diploma of Nursing. Used together, these nursing textbooks provide a strong foundation for your knowledge of important themes and issues in nursing care. Support your nursing education by purchasing the other great titles available in the Clinical Cases textbook series. Other titles in this series: • Clinical Cases: Fundamentals of Nursing Case Studies by Natasha Scully and Damian Wilson. • Clinical Cases: Medical-Surgical Nursing Case Studies by Janine Bothe. Other formats: This book is also available as an App via the Apple App Store <https://itunes.apple.com/au/app/clinical-cases-nursing-care/id659030265?mt=8> • Easy-to-understand, logical layout. • 24 case studies covering key topics in nursing care. • Multiple choice questions to test your knowledge throughout the textbook. • Rationales provided for all answers. • References for further reading and research. • Designed as an exam preparation and revision tool.

[Nursing Case Studies](#) Elsevier

Uncovers the art and science of nursing grounded in caring for all nursing situations Grounded in the belief that caring is the central domain of nursing, this innovative book presents a new approach to "nursing situations." These are case studies depicting shared lived experiences between the nurse and patient that are studied from various theoretical perspectives. They are designed to foster a nursing student's ability to care effectively for a patient, family, or group. Each case study features a compelling scenario that engages the reader to feel and fully participate in the caring experience. The book presents a variety of situations that new and experienced nurses are likely to encounter, many of which present scenarios that require caring for a patient under difficult or complex circumstances. The book addresses the need, as defined by leading health care and nursing education organizations, for the study of nursing from a contextual, story-oriented perspective. It is based on the Barry, Gordon & King

Teaching/Learning Nursing Framework, developed as a guide to uncover the art and science of nursing grounded in caring in all nursing situations. Following a description of the framework's foundational concepts, the text describes how to use nursing situations to facilitate learning. The scenarios offer detailed, practical strategies for analyzing nursing situations in ways that bring to life the simple and complex practice of nursing grounded in caring. These real-life stories also help students understand the impact of health conditions on individuals and families, thereby fostering empathy. Case studies address nursing situations across a variety of populations, health concerns, and practice settings. Using multiple ways of knowing and understanding, each scenario concludes with direct and reflective questions that help students develop nursing knowledge and skills. The book serves as a core resource for nurse educators and students at all levels seeking to study the art and science of nursing grounded in caring. Additionally, the book is a resource for in-service educators in health care systems that specifically address caring as an essential value for practice. KEY FEATURES: Delivers a new approach to nursing education focusing on the context of caring between nurse and patient Presents a collection of real-life nursing scenarios designed to foster caring knowledge and skills under all circumstances Offers detailed, practical strategies for analyzing nursing situations to aid in learning the practice of nursing grounded in caring Helps students to understand the impact of health conditions on individuals and families

Case Studies in Public Health Nursing E-Book F.A. Davis

Case Studies in Nursing Case Management provides portrayals of health care organizations around the nation that have successfully implemented case management programs. It reports on how case management is being used in inpatient, ambulatory, operating room, intensive care, home health, and subacute settings. Specific populations such as pediatric, maternity, dialysis, geriatric, psychiatric, and AIDS/HIV patients are also addressed. Case managers' roles in managed care and community-based settings as well as in insurance companies are described.

Clinical Decision Making Delmar

Based on real life scenarios, the Clinical Cases series presents quality case studies, complete with answers, to provide nursing students with an opportunity to explore scenarios they are likely to encounter in a variety of practice settings. Clinical Cases: Fundamentals of Nursing Case Studies is perfect for use during exam preparation or as a study tool, providing an engaging approach to learning and revision.

Medical-Surgical Nursing Test Success Springer Publishing Company

Detailed and up-to-date, this new second edition offers practical case studies covering a wide variety of critical care problems. Each features questions and answers to help readers sharpen their critical-thinking skills and prepare for the CCRN exam. It features new chapters on blunt abdominal trauma and abdominal aortic aneurysm, and updated case studies reflect new treatment modalities and current critical care pharmacology.

Case Studies in Public Health Nursing John Wiley & Sons

This innovative case study review for community health nursing students features a unique format that facilitates active learning through the use of unfolding case studies. Unlike other content review books, it builds content right into vivid case studies to foster greater retention of the material. Additionally, because these case studies evolve over time, they mimic real-life situations and help students to develop critical thinking and organizational skills. The Review features, in great depth, the spectrum of requisite community health nursing information with the inclusion of current Quality & Safety Education (QSEN) competencies. It covers patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics. The Review is enhanced by such mobile device resources as PubMed and AHRQ guidelines to simulate the method nurses currently use to access clinical information. These web links and resources are incorporated into the unfolding cases to further replicate realistic clinical situations in which the point-of-care/point-of-need access to information is used for decision support. Community Health Nursing Test Success will serve as both a course review and NCLEX-RN review with embedded links to access further information. It includes over 200 NCLEX-style questions in a variety of formats. Key Features: Uses unfolding case studies to mimic actual practice situations Embeds content into unfolding case studies to facilitate active learning Uses mobile device resources to simulate a true clinical environment Serves as both a course review and an NCLEX-RN review Builds web links and resources into unfolding case studies to replicate realistic clinical situations
