Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the

nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

"Fairies Afield" is a children's fantasy story written by Mary Louisa Molesworth, a well-known English children's author in the late nineteenth and early twentieth century. The book, published in 1902, is part of Molesworth's wide body of work, which includes a number of novels and stories for children. The story follows two siblings, Tottie and Tittie, as they go on a fantastic journey into the world of fairies. The children discover a secret road in the woods that leads them to the world of the fairies, where they meet a variety of wonderful creatures and participate in quirky and enchanting adventures. The kids become friends with fairies, elves, and other mystical creatures as they explore this magical realm. Like children's books from the Victorian and Edwardian eras, the story is full with endearing moments and soft moral messages. The narratives of Molesworth highlight kindness, amazement, and inventiveness. "Fairies Afield" perfectly encapsulates the essence of beloved children's books with its themes of friendship, magic, and youthful innocence. For those who appreciate classic stories of magic and adventure, the novel is still enjoyable.

"A Pot of Paint reconstructs the lost transcript and revisits the highly contested issues surrounding one of the most celebrated trials in the history of art. A libel suit brought in the London courts by American expatriate artist James McNeill Whistler against John Ruskin, England's most powerful art critic, the trial was essentially a debate of aesthetic theory conducted at a critical hour in the evolution of modern art." "After viewing an 1877 exhibition that included some of Whistler's most abstract works, Ruskin declared in print that the artist had flung "a pot of paint in the public's face." He called Whistler a "coxcomb" and said that it was the height of "cockney impudence" to ask two hundred guineas for a painting such as Nocturne in Black and Gold: The Falling Rocket. The dispute was fully covered in the popular press. Using those newspaper accounts, as well as letters, legal papers, Ruskin's instructions to his counsel, and Whistler's later rendition of events in *The Gentle Art of Making Enemies*, Linda Merrill reveals the deeply held, contrary aesthetic ideals of the two parties, and shows that, in many ways, the real litigants in Whistler v. Ruskin were traditional, representational art and art that tended toward abstraction." "During eighteen months of pretrial delays and two days of testimony from Whistler and several well-known figures in the art world, London debated the value and the meaning of art. A Pot of Paint retrieves these debates for a society that continues to argue the merits of innovation in art and the place of art in the modern world."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Fourth edition of Terry Jones's groundbreaking study, featuring new material and research Since it was first published in 1980, Terry Jones's study of Geoffrey Chaucer's Knight has proved to be one of the most enduringly popular and controversial books ever to hit the world of Chaucer scholarship. Jones questions the accepted view of the Knight as a paragon of Christian chivalry, and argues that he is in fact no more than a professional mercenary who has spent his life in the service of petty despots and tyrants around the world. This edition includes astonishing new

evidence from Jones, who argues that the character of the Knight was actually based on Sir John Hawkwood (d.1394), a marauding English freebooter and mercenary who pillaged his way across northern Italy during the 14th century, running protection rackets on the Italian Dukes and creating a vast fortune in the process.
