Clothes are inherently geographical objects, yet few of us consider the social and economic significance of their journey from design to production to consumption. The Geographies of Fashion is the first in-depth study of fashion economies from a geographer's perspective, exploring the complex relationship between our attachment to the clothes we own, love and desire, and their geographic and economic ties. How far does a garment physically travel from factory to wardrobe? How do clothes come to have social or economic value and who or what creates it? What are the geographies of fashion and how do they interact with one another? This ground-breaking book powerfully reframes fashion spaces, from the body to the city, digital or virtual space to material production, positioning fashion at the centre of contemporary culture and collective identities. Combining contemporary theoretical approaches with a cutting-edge analysis of international fashion brands and institutions including Maison Martin Margiela, Zara, Louis Vuitton, ASOS and Savile Row, The Geographies of Fashion is essential reading for students of fashion, geography and related disciplines including sociology, architecture and design.

This book is intended to sensitise psychotherapists, to strengthen practitioners' intercultural competence and to encourage them to form psychotherapeutic relationships with people with an immigration background who are suffering from mental health problems. In this context, intercultural psychotherapy refers to the therapeutic work between psychotherapists and patients who hail from different cultural contexts, which often considerably hampers language- and culture-based understanding. In the current context of globalisation and growing crises around the world, an increasing number of people with a migration background require psychotherapeutic treatment; as a result, intercultural psychotherapy may well become the rule rather than the exception. Psychotherapists are therefore challenged to adapt to such a context. Overcoming these barriers

requires certain competencies such as working with a qualified interpreter. Contributions from international experts from the field of intercultural psychotherapy provide vital insights into the theory and practice of intercultural work with patients suffering from conditions such as PTSD, depression, anxiety, personality disorders and schizophrenic disorders. These interdisciplinary specialists describe their work, share valuable lessons learned, and put forward concrete recommendations.

font size="+2""An outstanding addition to an impressive oeuvre" Times Literary Supplement Arthur Daane, a documentary film-maker and inveterate globetrotter, wanders the streets of Berlin, a city whose recent past provides the perfect backdrop for his reflections on life and the universe as he collects images for his latest project - a film that will show the world through his eyes. With his circle of friends - a philosopher, a sculptor and a physicist - Daane discusses everything from history to metaphysics and the meaning of our contemporary existence, often over a hearty meal. Then, one cold winter's day, Daane meets the history student Elik Oranje and his world is turned upside down. And when she unexpectedly leaves the city for Spain, Daane is compelled to follow. All Souls' Day is an elegiac love story, a poignant and affecting tale in which the city of Berlin plays a prominent role, by one of Europe's major contemporary writers. Translated from the Dutch by Susan Massotty "Displays with admirable lucidity the workings of a humane, civilized, and consistently interesting mind" Kirkus Reviews "One of the most remarkable writers of our time" ALBERTO MANGUEL

People have always smoked, and they probably always will. Every culture in recorded history has smoked something, whether for pleasure or relief, whether as part of an elaborate religious ritual or merely to strike a pose. This is the first truly comprehensive history of smoking, describing all of its forms, practices, paraphernalia and materials, in cultures, locations and times throughout the world.

An illustrated exploration of colors and patterns in the animal kingdom, what they communicate,

and how they function in the social life of animals. Are animals able to appreciate what humans refer to as “beauty”? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a “sexual selection” distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.

Südtirol, die nördlichste Provinz Italiens, kann mit über 300 Sonnentagen im Jahr aufwarten, mit einer parkartigen Landschaft aus Weinbergen, Wäldern, Wiesen und Almen, aus Hochgebirgstälern und Bergseen, in der man wandern und vielen sportlichen Aktivitäten nachgehen kann. Das Land zwischen Vinschgau und Pustertal beherbergt faszinierende Burgen und Schlösser, alte Ansitze, Kirchen und Klöster. Städte wie Meran und Bozen mit ihren historischen Ortskernen, dazu eine ausgezeichnete Gastronomie mit hervorragender Küche und ein breites Angebot an Pensionen, Hotels und Luxusherbergen machen Südtirol zu einem attraktiven Reiseziel. In ihrem Reiseführer beschreiben die Autoren Barbara und Hans Otzen alle interessanten Orte Südtirols: Bozen und Umgebung, Meran und das Burggrafenamt, das Südtiroler Unterland, Vinschgau, das Wipptal, das Eisacktal, das Pustertal und natürlich die Dolomiten. "Es ist dieser reizvolle Kontrast zwischen Nord und Süd, deutsch bzw. österreichisch und italienisch, zwischen Tälern und Bergen, den Südtirol in einzigartiger Weise verkörpert und der die Besucher immer wieder magisch anzieht", so die beeindruckte Feststellung des Autorenteam. Übersichtlich und klar strukturiert finden sich im Vorspann des Reiseführers die Beschreibungen aller Regionen, eine Jahresübersicht zu Festen und Veranstaltungen, Routenvorschläge und persönliche Top-Tipps der Autoren. Jedes Kapitel beginnt mit einer Doppelseite, auf der die Inhalte mit einer Karte der Region, Highlights und Seitenverweisen vorgestellt werden. Selbstfahrer finden ebenso wie Reisende, die mit öffentlichen Verkehrsmitteln unterwegs sind, alle notwendigen Informationen. Tipps zu naturnahem und nachhaltigem Reisen sowie zum Reisen mit Kindern helfen bei der Auswahl der passenden Adressen.

Using the perspectives of social and cultural history, and the history of psychology and physiology, *Strange Dislocations* traces a search for the self, for a past that is lost and gone, and the ways in which, over the last hundred years, the lost vision has come to assume the form of a child.

#### *The Wiley-Blackwell Companion to Economic Geography* COCH Y BONDDU BOOKS

Featuring sixty-seven exceptional color maps as well as eighty-seven vivid images by photographer Hendrik Holler and others, this is the most comprehensive and up-to-date atlas of German wine—a detailed reference to vineyards and appellations. The authors explain the geography of all the German wine-growing regions and provide independent analysis and ranking of the most significant vineyards in each region. In addressing the growing American appreciation of German wines, the atlas pays in-depth attention to Rieslings from the Mosel and other premier regions while also acquainting readers with wines from less familiar areas such as the Ahr, Baden, the Taubertal, and Franconia. Beautifully produced, with helpful sidebars and succinct essays, this book will become the standard reference on the subject.

A comprehensive examination of the intertwined mythology, folklore, and literary history of the little people • Explores the pagan roots of dwarfs and elves and their evolution in myth and literature • Reveals the role the church played in changing them from fearless, shape-shifting warriors with magical powers into cheerful helpmates and cute garden gnomes • Traces their history from ancient Celtic and Germanic lore through their emergence in the literature of the Middle Ages to their modern popularization by the Brothers Grimm and Walt Disney Most people are familiar with the popular image of elves as Santa's helpers and dwarfs as little bearded men wearing red caps, who are mischievous and playful, helpful and sly, industrious and dexterous. But their roots go far deeper than their appearance in fairy tales and popular stories. Elves and dwarfs are survivors of a much older belief system that predates Christianity and was widespread throughout Western Europe. Sharing his extensive analysis of Germanic and Norse legends, as well as Roman, Celtic, and

medieval literature, Claude Lecouteux explores the ancient, intertwined history of dwarfs and elves. He reveals how both were once peoples who lived in wild regions as keepers of the secrets of nature. They were able to change their size at will and had superhuman strength and healing powers. They were excellent smiths, crafting swords that nothing could dull as well as magical jewelry, and often entered into the service of lords or heroes. They were a part of the everyday life of our ancestors before they were transformed by fairy tales and church texts into the mythical creatures we know today. Lecouteux shows how, in earlier folklore, elves and dwarfs were interchangeable, gradually evolving over time to express very different kinds of beings. "Dwarf," "giant," and even "elf" did not necessarily connote size but referred to races with different skills. Elves were more ethereal, offering protection and kindness, while dwarfs reflected a more corporeal form of spirit, often appearing as messengers from the underworld. Yet dwarfs and elves could be bargained with, and our ancestors would leave a broken object outside the door at night with the hope that a dwarf or elf (or other local spirit) would repair it. Revealing the true roots of these helpful and powerful beings, including an in-depth exploration of one of the most famous dwarf/elf/fairy beings of the Middle Ages, Auberon or Oberon, also known as Alberich, Lecouteux shows how the magic of dwarfs and elves can be rekindled if we recognize their signs and invite them back into our world.

In an increasingly interconnected world wine market, evolving consumer demands, technologies, and climate have all contributed to large shifts in global patterns of production and consumption of wine. These shifting patterns of wine production and consumption have entailed changes in the vineyard in terms of total area planted, production practices, and the mix of grape varieties grown. In this book, for the first time, we have a detailed empirical picture, country by country and region by region within countries, of which varieties of grapes have been grown where, and how those varietal choices have changed over time. This statistical compendium will be directly useful for anyone interested in knowing about and understanding the changing patterns of production of wine and wine grapes around the world. It also will serve as an invaluable resource for economists and others who seek to analyze those patterns and their causes.

The role of HRM in developing sustainable business organizations is increasingly attracting attention. Sustainability can be used as a principle for HRM itself and the tasks of Sustainable HRM are twofold. On the one hand it fosters the conditions for individual employee sustainability and develops the ability of HRM systems to continuously attract, regenerate and develop motivated and engaged employees by making the HRM system itself sustainable. On the other hand Sustainable HRM

contributes to the sustainability of the business organizations through cooperation with the top management, key stakeholders and NGOs and by realising economic, ecological, social and human sustainability goals. This book provides a comprehensive review of the new area of Sustainable HRM and of research from different disciplines like sustainable work systems, ergonomics, HRM, linking sustainability and HRM. It brings together the views of academics and practitioners and provides many ideas for conceptual development, empirical exploration and practical implementation. This publication intends to advance the international academic and practice-based debates on the potential of sustainability for HRM and vice versa. In 19 chapters, 26 authors from five continents explore the role of HRM in developing economically, socially and ecologically sustainable organizations, the concept of Sustainable HRM and the role of HRM in developing Sustainable HRM systems and how sustainability and HRM are conceptualized and perceived in different areas of the world.

Assembling Export Markets explores the new 'frontier regions' of the global fresh produce market that has emerged in Ghana over the past decade. Represents a major and empirically rich contribution to the emerging field of the social studies of economization and marketization Offers one of the first ethnographic accounts on the making of global commodity chains 'from below' Denaturalizes global markets by unpacking their local engagement, materially entangled construction, need for maintenance, and fragile character Offers a trans-disciplinary engagement with the construction and extension of market relations in two frontier regions of global capitalism Critically examines the opportunities and risks for firms and farms in Ghana entering global fresh produce markets

#### The Hidden History of Elves and Dwarfs Farrar Straus & Giroux

Churchill is well-known for his hearty appetite and love of food. This book gives a fascinating insight into what he ate during the Second World War, containing over 250 delicious recipes created by his personal cook, Georgina Landemare. From mouthwatering cakes, biscuits and puddings, to healthy salads and warming soups, it revives some forgotten British classics and traditional French fare. Including timeless recipes still popular today (coq au vin, potato salad, and chocolate cake) as well as some more unusual concoctions (Cervelles Connaught, or 'curried brains'), it reveals the food that sustained Churchill during his 'finest hour.'
