Napoleon's conquests were spectacular, but behind his wars, is an enduring legacy. A new generation of historians have re-evaluated the Napoleonic era and found that his real achievement was the creation of modern Europe as we know it.

Contemporary Europe Routledge

This major contribution to the idea of Europe sweeps the continent from its Celtic and German origins through the influence of the Greeks and Romans to the fruitful--and sometimes bloody--contacts with other cultures. Peter Rietbergen portrays Europe's history as a series of four grand phases of continuity and change set in the context of political, social and economic developments. These phases are new forms of: surviving; believing; looking at man and the world; and consumption and communication. Rietbergen's descriptions are supported by a selection of

illuminating excerpts such as: Chaucer's description of London in 1378; Michelangelo on Italian art; and popular music lyrics of Iron Maiden and Sting.

Produced for the Council of Europe project " Learning and teaching about the history of Europe in the 20th century", this book concentrates on the how rather than the what of teaching. Besides a study of selected themes and topics, it covers the teaching of sensitive issues, the reading of visual archives, analysing history on television and the Internet and assessing new technologies. Some of these new sources have not been made part of standard teacher training, yet they have a powerful role in the way young people perceive the past. The author is a Senior Research Fellow at

Themes in Modern European History 1830-1890 New York, H. Holt [c1919]

Bringing home the extraordinary waves of transformation that washed across Europe in the second half of the twentieth century, this book interprets the trends, developments, and issues which were of major importance in East and West Europe in the latter half of the twentieth century. Mary Fulbrook's Introduction to this volume begins with a vivid contrast setting the struggle for survival in a devastated rubble-strewn street of East Berlin in 1945 against the same location in the reunited city at the end of the century, unrecognisable in its gleaming, confident, cosmopolitan affluence. The book then provides a clear overview of the broad patterns of change: from nationalism to integration; from imperialism to decolonization; from division between capitalism and communism to striking convergence of systems; from regional differences to an increasingly homogeneous, urbanised cosmopolitan society. Each chapter is enlivened by a wealth of illustrative detail as local themes and variations in different parts of Europe are explored. Chapters trace the character, causes, and consequences of general trends and specific developments in politics, society, the economy, and culture, before turning to relations within Europe and with the non-European world. The result is an illuminating and engrossing account of European history since 1945.

European History For Dummies M.E. Sharpe

A sweeping cultural survey reminiscent of Barzun's *From Dawn to Decadence*. "At irregular times

and in scattered settings, human beings have achieved great things. Human Accomplishment is about those great things, falling in the domains known as the arts and sciences, and the people who did them.' So begins Charles Murray's unique account of human excellence, from the age of Homer to our own time. Employing techniques that historians have developed over the last century but that have rarely been applied to books written for the general public, Murray compiles inventories of the people who have been essential to the stories of literature, music, art, philosophy, and the sciences—a total of 4,002 men and women from around the world, ranked according to their eminence. The heart of *Human Accomplishment* is a series of enthralling descriptive chapters: on the giants in the arts and what sets them apart from the merely great; on the differences between great achievement in the arts and in the sciences; on the meta-inventions, 14 crucial leaps in human capacity to create great art and science; and on the patterns and trajectories of accomplishment across time and geography. Straightforwardly and undogmatically, Charles Murray takes on some controversial questions. Why has accomplishment been so concentrated in Europe? Among men? Since 1400? He presents evidence that the rate of great accomplishment has been declining in the last century, asks what it means, and offers a rich framework for thinking about the conditions under which the human spirit has expressed itself most gloriously. Eye-opening and humbling, *Human Accomplishment* is a fascinating work that describes what humans at their best can achieve, provides tools for exploring its wellsprings, and celebrates the continuing common quest of humans everywhere to discover truths, create beauty, and apprehend the good.

Modern European History Ardent Media

As long as there have been governments, ordinary people have been acting in a variety of often informal or extralegal ways to influence the rulers who claimed authority over them. *Shaping History* shows how ordinary people broke down the institutional and cultural barriers that separated elite from popular politics in sixteenth- and seventeenth-century Europe and entered fully into the historical process of European state formation. Wayne te Brake's outstanding synthesis builds on the many studies of popular political action in specific settings and conflicts, locating the interaction of rulers and subjects more generally within the multiple political spaces of composite states. In these states, says Te Brake, a broad range of political subjects, often religiously divided among themselves, necessarily aligned themselves with alternative claimants to cultural and political sovereignty in challenging the cultural and fiscal demands of some rulers. This often violent interaction between subjects and rulers had particularly potent consequences during the course of the Reformation, the Counter-Reformation, and the Crisis of the Seventeenth Century. But, as Te Brake makes clear, it was an ongoing political process, not a series of separate cataclysmic events. Offering a compelling alternative to traditionally elite-centered accounts of territorial state formation in Europe, this book calls attention to the variety of ways ordinary people have molded and shaped their own political histories.
