Building on the success of FUBAR: Soldier Slang of World War II, Gordon Rottman returns to the world of World War II slang to cover the armies, air forces and navies of Great Britain, the USA and Germany. Military life has always been ruled by its own language, specific sets of terms and phrases that separate the serving man or woman from their civilian counterpart. There is the official version of ranks and acronyms, and the more unofficial, colloquial language of the barrack room and battlefield. This follow-up to 2007's FUBAR: Soldier Slang of World War II differs from the original book in that it covers the slang of sailors and airman as well as soldiers. Detailed sections are included for each of the major combatants of World War II, and

additional appendices detail the nicknames given to the major surface vessels and aircraft types of the war. This title explores the language and slang of the major combatant powers, delving into their origins and explaining their uses. All of this is illustrated with contemporary cartoons and other images showing the phrases in use.

While the US Marine Corps was one of the smallest of American armed services in World War II, its contribution to the final victory cannot be overstated. The US Marine Corps may have only comprised 5 percent of America's armed forces, but it suffered 10 percent of all World War II combat casualties. Above all, the amphibious nature of the war in

the Pacific imposed on the Marine Corps greater tasks than any it had ever before been called upon to perform. This title details the organization, weapons and equipment of the US Marines of World War II.

The first-ever insider account of Camp David, the president's private retreat, on the seventy-fifth anniversary of its inception. Never before have the gates of Camp David been opened to the public. Intensely private and completely secluded, the president's personal campground is situated deep in the woods, up miles of unmarked roads that are practically invisible to the untrained eye. Now, for the first time, we are allowed to travel along the mountain

route and directly into the fascinating and intimate complex of rustic residential cabins, wildlife trails, and athletic courses that make up the presidential family room. For seventy-five years, Camp David has served as the president's private retreat. A home away from the hustle and bustle of Washington, this historic site is the ideal place for the First Family to relax, unwind, and, perhaps most important, escape from the incessant gaze of the media and the public. It has hosted decades of family gatherings for thirteen presidents, from Franklin D. Roosevelt to Barack Obama, including holiday celebrations, reunions, and even a wedding. But more than just a weekend getaway, Camp David has also been the site of private meetings and high-level

summits with foreign leaders to foster diplomacy. Former Camp David commander Rear Admiral Michael Giorgione, CEC, USN (Ret.), takes us deep into this enigmatic and revered sanctuary. Combining fascinating first-person anecdotes of the presidents and their families with storied history and interviews with commanders both past and present, he reveals the intimate connection felt by the First Families with this historic retreat.

well worth reading.

U.S. Military Patches of World War II

Graham Thomas

A gripping history chronicling the fits and starts of American special operations and the ultimate rise of the Navy SEALs from unarmed frogmen to elite, go-anywhere commandos—as told by one of their own. “Deeply researched, well organized, and incredibly engaging . . . This is our legacy with all the warts, the challenges, and the heroics in one concise volume.”—Admiral William H. McRaven, #1 New York Times bestselling author and former commander, United States Special Operations Command
How did the US Navy—the branch of the US military tasked with patrolling the oceans—ever manage to produce a unit of raiders trained to operate on land?

And how, against all odds, did that unit become one of the world’s most elite commando forces, routinely striking thousands of miles from the water on the battlefields of Iraq, Afghanistan, Syria, even Central Africa? Behind the SEALs’ improbable rise lies the most remarkable underdog story in American military history—and in these pages, former Navy SEAL Benjamin H. Milligan captures it as never before. Told through the eyes of remarkable leaders and racing from one longshot, hair-curling raid to the next, *By Water Beneath the Walls* is the tale of the unit’s heroic naval predecessors, and the evolution of the SEALs themselves. But it’s also the story of the forging of American special operations as a whole—and how the SEALs emerged from the fires as

America's first permanent commando force when again and again some other unit seemed predestined to seize that role. Here Milligan thrillingly captures the outsize feats of the SEALs' frogmen forefathers in World War II, the Korean War, and elsewhere, even as he plunges us into the second front of interservice rivalries and personal ambition that shaped the SEALs' evolution. In equally vivid, masterful detail, he chronicles key early missions undertaken by units like the Marine Raiders, Army Rangers, and Green Berets, showing us how these fateful, bloody moments helped create the modern American commando—even as they opened up pivotal opportunities for the Navy. Finally, he takes us alongside as the SEALs at last seize the mantle of commando raiding, and

discover the missions of capture/kill and counterterrorism that would define them for decades to come. Now required reading throughout the US special operations community, *By Water Beneath the Walls* is an essential history of the SEAL teams, a crackling account of desperate last stands and unforgettable characters accomplishing the impossible—and a riveting epic of the dawn of American special operations.

UNITED STATES NAVY GRADE INSIGNIA

SINCE 1852 Koriander Publishing

In 1868, Frank Toovey Lake, a young British Midshipman, died while serving with the Royal Navy and was interred on the island of Hiroshima in the Seto Inland Sea of Japan. Up until recently Lake's grave on Hiroshima had been identified only by his family name 'Lake,' and he was described as an English officer who died while serving on the Royal Navy survey ship, HMS Sylvia. However no further information on Lake could be found until new research showed that in one important detail these facts were wrong: namely that the ship had been incorrectly identified as HMS Sylvia when in fact he died on HMS Manilla. From knowing this, it has now been possible to give the young officer his full name, Frank Toovey Lake, and to build an

understanding of his life. Since the burial the islanders have both maintained and improved the grave until the present day. This led to admiration among the late-19th century British community in Japan (including prominent members such as Sir Ernest Satow and Thomas Glover), and a flurry of newspaper articles appeared around the world in 1899 recounting the story and praising the conscientiousness of the local people. Since then the grave's story has made only sporadic appearances in the media but continues to be celebrated locally. This grave is far from unique: the graves of many foreigners can be found in Japan, most within the foreign cemeteries in cities such as Tokyo, Yokohama, Kobe and Nagasaki and to whose numbers we can add those of

souls buried at sea within Japan's waters. But there are at least two good reasons to celebrate its continued existence. First, in the mid-19th century as Japan became more accessible to the outside world this created, at least initially, mutual distrust between foreigners and Japanese; these newcomers were viewed as barbarians and intruders (albeit at times justifiably), and this was a period when some were slain and their vessels fired upon. So without suggesting that widespread conflict existed - because it didn't - nonetheless it is notable that during this period a group of villagers decided to care for and not destroy the grave, and that today this grave is as well tended as ever. Second, at one time Lake's death was commemorated on a monument in

the churchyard of the village where he was born. A few years ago that monument - along with other Toovey graves - was swept away, the graveyard cleared for ease of maintenance, and all trace of Frank Toovey Lake has now gone. This story also touches on other aspects of Japan and Britain's 19th century history not least the display of typical contradictory characteristics of Pax Britannica in the Inland Sea: the rapid deployment of the Royal Navy into Japan's territorial waters yet undertaking surveying and other benign operations; the threat and occasional use of gunboat diplomacy, and at times an arrogance towards the country yet countered by great affection for the place and its people by some - or many - individuals. The story also involves personalities

such as Richard Henry Brunton, T B Glover and the British diplomat Ernest Satow who took important roles in helping Japan develop. In short, the story of Lake and his grave is more than the story of an individual and a granite monument.

Pilgrimage for the Mothers and Widows of Soldiers, Sailors, and Marines of the American Forces Now Interred in the Cemeteries of Europe as Provided by the Act of Congress of March 2, 1929 Little, Brown

Throughout the history of the human race there have been adventurers who

must test the limits of exploration, iconoclasts who will never be satisfied with peace at the expense of ignorance. And ignorance will be dangerous indeed if it is true that the Apollyoni exist. In a Galactic Federation without war, it has been hard to imagine evil, until the expedition to Ahriman ended in such horrible violence that its lone survivor-Coni Sanderson-had to be almost completely reconstructed. For Coni's sake, Greg Sheldon wants more than anything to go beyond the perimeter to search out the truth. Richard Highstreet's father was lost on one of the last major expeditions and he, too, would travel anywhere to find out why. Outstanding courage has made Ben Wilson their commander on a desperate and illegal mission through metaspace,

and he knows that if Art Cooke, the fourth crewmember of the *Odyssey*, knew the real reason for the voyage, he would have stopped it. It will be Ben's job to keep them from destroying each other before they reach their destination, because when that destination is reached, they may have more destruction on their hands than any of them could ever have imagined possible.

A wave of water in the shape of a clawed hand crashes onto the deck of *Wavegrazer*. The wheel spins violently; the ship lurches and Cloran's men are flung into the sea. As the masts break and the sky goes black, one name flutters across Cloran's lips. "Adaire..."

Cloran has spent his life at sea and is set to retire. He hopes to marry his long-suffering fiancée Adaire, but his hopes are dashed when King Bozin sends him on one final journey to the far-flung icy island city of Miotes. This time, however, the Sea is jealous of Cloran, and will never give him up to Adiare freely. Alas, Cloran has no choice, and accepts the mission begrudgingly. "One final journey," he tells himself. No matter

what happens, it will be his last. Join Cloran, First Mate Lenny, Greaves, Darrell, Turner, Mallory, Richards and Jenkins as they navigate Wavegrazer through icy channels, floating castles, magical islands inhabited with faerie women and deadly reefs patrolled by the evil man-killing crab, Krackaman.
