The African Herbal Pharmacopoeia (AfrHP) provides comprehensive, up to date botanical, commercial and phytochemical information on over fifty of the most important African medicinal plants. The technical data were made on plant samples sourced from across the continent. These monographs prepared by leading African scientists, have been reviewed by international experts. Additional data includes micro morphology of the plant material, distribution maps and TLC Chromatograms. These data are crucial for producers, collectors and traders in medicinal plants and extracts as well as researchers, manufacturers and practitioners. The scope, quality and standard of these herbal monographs are comparable to those prepared in Europe, North America and Asia. Whilst this is the very first edition, it is being proposed to proceed to a second edition, quickly, as more plant species will be covered.

The Monthly Supplement and International Who's who John Wiley & Sons

This is one of the first studies to describe the practice of 'performance psychology'. It blends theory and practice by integrating literature reviews with real-world applications for a broad range of clients. It provides extensive session transcripts, including consultants' thoughts and reactions throughout each session.

Thomas Register of American Manufacturers and Thomas Register Catalog File Birkhäuser

Collection of the monthly climatological reports of the United States by state or region, with monthly and annual national summaries.

Shoulder Arthroplasty Elsevier Health Sciences

This is the first major text designed to help professionals and students evaluate the merits of popular yet controversial practices in clinical psychology, differentiating those that can stand up to the rigors of science from those that cannot. Leading researchers review widely used therapies for alcoholism, infantile autism, ADHD, and posttraumatic stress disorder; herbal remedies for depression and anxiety; suggestive techniques for memory recovery; and self-help models. Other

topics covered include issues surrounding psychological expert testimony, the uses of projective assessment techniques, and unanswered questions about dissociative identity disorder. Providing knowledge to guide truly accountable mental health practice, the volume also imparts critical skills for designing and evaluating psychological research programs. It is ideal for use in advanced undergraduate- and graduate-level courses in clinical psychology, psychotherapy, and evidence-based practice.

Science and Pseudoscience in Clinical Psychology, First Edition BoD - Books on Demand

Vols. for 1970-71 includes manufacturers' catalogs.

Basic Technics in Ecological Farming / Techniques de Base en Agriculture Biologique / Grundsätzliche Verfahren der ökologischen Landwirtschaft / Le Maintien de la Fertilité des Sols / The Maintenance of Soil Fertility / Die Erhaltung der Bodenfruchtbarkeit Springer Science & Business Media

Plastic and reconstructive surgery has evolved over the last two decades, with advances in anesthesiology, pharmacology, perioperative medicine, and novel monitoring devices contributing

significantly to these patients being able to recover and live safely. Patients with chronic pathologies such as diabetes, hypertension, heart disease, obesity, chronic obstructive pulmonary disease, congenital or trauma injuries, changes due to excessive weight loss and others, as well as patient-tourists who have traveled enormous distances are now able to receive cosmetic and reconstructive surgeries that in the past were rejected. The authors of this book also discuss various contemporary topics of anesthesia for plastic and reconstructive surgery that are especially interesting and controversial due to the latest developments on this subject.

Arrian's Campaigns of Alexander, widely considered the most authoritative history of the brilliant leader's great conquests, is the latest addition to the acclaimed Landmark series. After twelve years of hard-fought campaigns, Alexander the Great controlled a vast empire that was bordered by the Adriatic sea to the west and modern-day India to the east. Arrian, himself a military commander, combines his firsthand experience of battle with material from Ptolemy's memoirs and other ancient sources to compose a singular portrait of Alexander. This vivid and engaging new translation of Arrian will fascinate readers who are interested in classical studies, the history of warfare, and the origins of East-West tensions still swirling in Iran, Iraq and Afghanistan today. Enriched by the series' trademark comprehensive maps, illustrations, and annotations, and with contributions from the preeminent classical scholars of today, The Landmark Arrian: The Campaigns of Alexander is the definitive edition of this essential work of ancient history.

Success in shoulder arthroplastic surgery is not necessarily dependent only on the principle of construction of a prosthetic device, nor on the way this device is implanted or fixed to the bony interface, but more so on the understanding and handling of the soft tissues surrounding the articulation. Based on their experience in basic anatomy and function, the editors of this book were able to develop a prosthetic device which can take into account individual anatomical variations in each patient, making a successful outcome of surgery much more predictable. This must-have for any shoulder surgeon not only informs on the current state-of-the-art, but also provides an understanding of what advances can be achieved with innovative thinking in the field of orthopaedic surgery.

[Who's who in America](#) Anchor

Examines the Government's policies on the provision of homeopathy through the National Health Service (NHS) and the licensing of homeopathic products by the Medicines and Healthcare products Regulatory Agency (MHRA).

Cross-over trials are an important class of design used in the pharmaceutical industry and medical research, and their use continues to grow. Cross-over Trials in Clinical Research, Second Edition has been fully updated to include the latest methodology used in the design and analysis of cross-over trials. It includes more background material, greater coverage of important statistical techniques, including Bayesian methods, and discussion of analysis using a number of statistical software packages. * Comprehensive coverage of the design and analysis of cross-over trials. * Each technique is carefully explained and the mathematics is kept to a minimum. * Features many real and original examples, taken from the author's vast experience. * Includes discussion of analysis using SAS, S-Plus and, GenStat, StatXact and Excel. * Written in a style suitable for statisticians and physicians alike. * Computer programs to accompany the examples in the book can be downloaded from the Web Primarily aimed at statisticians and researchers working in the pharmaceutical industry, the book will also appeal to physicians involved in clinical research and students of medical statistics.

This book synthesises key insights from a century of ecological research and monitoring efforts in one of Africa's oldest protected areas.

[Athenaeum and Literary Chronicle](#) Bernan Press(PA)

Part of the highly regarded Braunwald's family of cardiology references, Clinical Arrhythmology and Electrophysiology, 3rd Edition, offers complete coverage of the latest diagnosis and management options for patients with arrhythmias. Expanded clinical content and clear illustrations keep you fully abreast of current technologies, new syndromes and diagnostic procedures, new information on molecular genetics, advances in ablation, and much more.

[Kay Clinical Topics in Anaesthesia](#) Cambridge University Press

This volume includes the full Health Technology Assessment (HTA) report on effectiveness, appropriateness, safety and costs of homoeopathy in health care. The report was commissioned by the Swiss health authorities to inform decision-making on the further inclusion of homoeopathy in the list of services covered by statutory health insurance. Other studies carried out as part of the Swiss Complementary Medicine Evaluation Programme (PEK) caused a massive stir due to their schematic and exclusively quantitative (negative-)outcomes for homoeopathy. The present report, in contrast, offers a differentiated evaluation of the practice of homoeopathy in health care. It confirms homoeopathy as a valuable addition to the conventional medical landscape - a status it has been holding for a long time in practical health care.

[Clinical Arrhythmology and Electrophysiology E-Book](#) Amer Psychological Assn

A comprehensive and highly illustrated resource of multidisciplinary information and practical advice.

[Infectious Diseases of the Respiratory Tract](#) Springer Science & Business Media

Topics on Spinal Anaesthesia consists of eight important and updated chapters covering subarachnoid anaesthesia for major orthopaedic surgeries, ambulatory and short stay plastic surgical procedures, complications, and discussing the usefulness of opioids and non opioids drugs

as spinal adjuvants to enhance subarachnoid block, transoperative analgesia and postoperative analgesia in various clinical scenarios. InTech invited respectable anesthesiologists from different countries to write this book. The authors and co-authors discussed in detail the advances in these subjects, so that the reader has an updated view and can use this knowledge on his/her patients. It is a practical book covering current information about subarachnoid anaesthesia.

News of Alzheimer's disease is constantly in the headlines. Every day we hear heart-wrenching stories of people caring for a loved one who has become a shell of their former self, of projections about rising incidence rates, and of cures that are just around the corner. However, we don't see or hear from the people who actually have the disease. In Living with Alzheimer's, Renée L. Beard argues that the exclusively negative portrayals of Alzheimer's are grossly inaccurate. To understand what life with memory loss is really like, Beard draws on intensive observations of nearly 100 seniors undergoing cognitive evaluation, as well as post-diagnosis interviews with individuals experiencing late-in-life forgetfulness. Since we all forget sometimes, seniors with an Alzheimer's diagnosis ultimately need to be socialized into medicalized interpretations of their forgetfulness. In daily life, people with the disease are forced to manage stigma and the presumption of incompetence on top of the actual symptoms of their ailment. The well-meaning public, and not their dementia, becomes the major barrier to a happy life for those affected. Beard also examines how these perceptions affect treatment for Alzheimer's. Interviews with clinicians and staff from the Alzheimer's Association reveal that despite the best of intentions, pejorative framings of life with dementia fuel both clinical practice and advocacy efforts. These professionals perpetuate narratives about "self-loss," "impending cures," and the economic and emotional "burden" to families and society even if they do not personally believe them. Yet, Beard also concludes that in spite of these trends, most of the diagnosed individuals in her study achieve a graceful balance between accepting the medical label and resisting the social stigma that accompanies it. In stark contrast to the messages we receive, this book provides an unprecedented view into the ways that people with early Alzheimer's actively and deliberately navigate their lives.
