This book helps second language teachers use theories in their practice, exploring in concrete and practical ways the intersections between teachers, learners, and institutions, and

theories of teaching, theories of learning, and theories of language. These intersections provide language teachers with critical insights on how to deal with professional complexities and practical guidance on how to develop appropriate pedagogical practice. By focusing on theories of teaching, the authors give readers the tools to create a clear image of the kind of teacher they wish to be. By exploring theories of learning, they promote the formation of teachers' personal theories which allow them to identify their own areas of special interest in learner achievement and enrichment. By examining theories of language, the book shows how administrators and teachers can use theories to identify course goals and plan priorities for class time. Using Theories for Second Language Teaching and Learning treats theory as a concept in its own right and promotes knowing theory as a means of teacher discovery, reflection, and learning through case studies, which are descriptions and analyses of teachers thinking and acting in classrooms and in the institutions in which they work. Every chapter presents case studies with examples from the teaching of different languages, including Chinese, English, French, German, and Korean. An array of theories from multiple disciplines are featured and reflective projects are offered that lead readers to discover the importance and role of theory in daily professional life.

In order to maintain inclusive classrooms within both K-12 and higher education, it is essential that pre-service teachers and current educators are aware of the strategies and techniques involved in deaf education. Educators must be knowledgeable of

practical situations that occur in deaf education classrooms and mainstream environments while using different strategies with students across the curriculum and modifying those to meet individual learners' needs. Cases on Teacher Preparation in Deaf Education supports instruction in a variety of deaf education courses providing sample cases and examples for students to work through and discuss. The case studies encourage critical thinking and thoughtful reflection related to a variety of deaf education environments and situations. Covering topics such as dual-modality collaborations, machine learning techniques, and reading instruction, this case book is an essential resource for educators and administrators of both K-12 and higher education, librarians, pre-service teachers, teacher educators, researchers, and academicians.

A New York Times Best Seller "Essential reading for all adults who work with black and brown young people...Filled with exceptional intellectual sophistication and necessary wisdom for the future of education."—Imani Perry, National Book Award Winner author of *South To America* An award-winning educator offers a much-needed antidote to traditional top-down pedagogy and promises to radically reframe the landscape of urban education for the better Drawing on his own experience of feeling undervalued and invisible in classrooms as a young man of color, Dr. Christopher Emdin has merged his experiences with more than a decade of teaching and researching in urban America. He takes to task the perception of urban youth of color as unteachable, and he challenges educators to embrace and respect each student's culture and to reimagine the classroom as a site where roles are reversed and students become the experts in their own learning. Putting forth his theory of Reality Pedagogy, Emdin provides practical tools to unleash the brilliance and eagerness of youth and educators alike—both of whom have been typecast and stymied by outdated modes of thinking about urban education. With this fresh and engaging new pedagogical vision, Emdin demonstrates the importance of creating a family structure and building communities within the classroom, using culturally

relevant strategies like hip-hop music and call-and-response, and connecting the experiences of urban youth to indigenous populations globally. Merging real stories with theory, research, and practice, Emdin demonstrates how by implementing the "Seven Cs" of reality pedagogy in their own classrooms, urban youth of color benefit from truly transformative education.

This book brings together a set of contributions that examine the complexities associated with domestic work by highlighting not only the legal issues but also exploring the social, psycho-social,

economic, and cultural dimensions of domestic work. The book aims to ignite a collective effort towards ensuring decent work for domestic workers and facilitate a public debate on their rights. It includes discussions on the issue of social justice with special emphasis on invisibilization and undervaluation of domestic work, feminization of domestic work, and recognizes the rights of domestic workers as human rights. The issues covered in this book bridge the gap between legal and social dimensions of domestic work and address the discrimination faced by domestic workers in a holistic manner. Given its scope, the book would appeal to both academics (law as well as social science) and non-academics. It will be a useful tool for teachers, students, practitioners, policy-makers and civil society organizations working for the unorganized sector.
