From the era-defining author of *Generation X* comes a novel of overworked coders who escape the serfdom of Bill Gates to forge their own path. They are Microserfs—six code-crunching computer whizzes who spend upward of sixteen hours a day “coding” and eating “flat” foods (food which, like Kraft singles, can be passed underneath closed doors) as they fearfully scan company e-mail to learn whether the great Bill is going to “flame” one of them. But now there’s a chance to become innovators instead of cogs in the gargantuan Microsoft machine. The intrepid Microserfs are striking out on their own—living together in a shared digital flophouse as they desperately try to cultivate well-rounded lives and find love amid the dislocated, subhuman whirl and buzz of their computer-driven world.

In 2008 San Francisco International Airport had announced a plan to renovate and reopen Terminal 2. Assistant deputy director of aviation security

Kim Dickie had selected Quantum Secure's SAFE software suite as the new credentialing system, but she needed to develop a business case quickly that would give the green light to the purchase. The case describes a scenario that occurs frequently in the real world, in which a decision offers some real but qualitative value in ways that are difficult or impossible to quantify.

The interdisciplinary research and development work carried out in the last ten years which is presented in this book aimed at replacing the conventional airport control tower by a new “remote tower operation” work environment (RTO) which should enhance work efficiency and safety and reduce costs. This revolutionary human-system interface allows for remote aerodrome traffic control without a physical tower building and enables the establishment of remote airport traffic control centers (RTC) of which each may serve several airports from a central location.

Raised in the steamy bayous of New Orleans in the early 1900s, LeRoi "King" Tremain, caught up in his family's ongoing feud with the rival DuMont family, learns to fight. But when the teenage King mistakenly kills two white deputies during a botched raid on the DuMonts, the Tremains' fear of reprisal forces King to flee Louisiana. King thus embarks on an adventure that first takes him to France, where he fights in World War I as a member of the segregated 369th Battalion—in the bigoted army he finds himself locked in combat with American soldiers as well as with Germans. When he returns to America, he battles the Mob in Jazz Age Harlem, the KKK in Louisiana, and crooked politicians trying to destroy a black township in Oklahoma. King Tremain is driven by two principal forces: He wants to be treated with respect, and he wants to create a family dynasty much like the one he left behind in Louisiana. This is a stunning debut by novelist Guy Johnson that provides a true depiction of the lives of African-Americans in the early decades of the twentieth century.

“One of the most vital and original novelists of her generation.” —Larissa MacFarquhar, *The New Yorker* From the bestselling author of *Americanah* and *We Should All Be Feminists* Fifteen-year-old Kambili and her older brother Jaja lead a privileged life in Enugu, Nigeria. They live in a beautiful house, with a caring family, and attend an exclusive missionary school. They're completely shielded from the troubles of the world. Yet, as Kambili reveals in her tender-voiced account, things are less perfect than they appear. Although her Papa is generous and well respected, he is fanatically religious and tyrannical at home—a home that is silent and suffocating. As the country begins to fall apart under a military coup, Kambili and Jaja are sent to their aunt, a university professor outside the city, where they discover a life beyond the confines of their father’s authority. Books cram the shelves, curry and nutmeg permeate the air, and their cousins’ laughter rings throughout the house. When they return home, tensions within the family escalate, and Kambili must find the strength to keep her loved ones together. *Purple Hibiscus* is an exquisite novel about the emotional turmoil of adolescence, the powerful bonds of family, and the bright promise of freedom.

A study of the changing face of the American labor market. The American labor market faces many deep-rooted problems, including persistence of a large low-wage sector, worsening inequality in earnings, employees' lack of voice in the workplace, and the need of employers to maximize flexibility if they are to survive in an increasingly competitive market. The impetus for this book is the absence of a serious national debate about these issues. The book represents nearly three years of deliberation by more than 250 people drawn from business, labor, community groups, academia, and government. It traces today's labor-market policy and laws back to the New Deal and to a second wave of social regulation that began in the 1960s. Underlying the current system are assumptions about who is working, what workers do, and how much job security workers enjoy. Economic and social changes have rendered those assumptions invalid and have resulted in mismatches between labor institutions and efficient and equitable deployment of the workforce, as well as between commitments to the labor market and family responsibilities. This book should launch a national dialogue on how to update our policies and institutions to catch up with the changes in the nature of work, in the workforce, and in the economy.

Charles Gabriel Seligman (1873-1940) was a British ethnographer who conducted field research in New Guinea, Sarawak, Ceylon (present-day Sri Lanka), and Sudan. Trained as a medical doctor, in 1898 he joined an expedition organized by Cambridge University to the Torres Strait, the body of water that separates the island of New Guinea from Australia. The purpose of the expedition was to document the cultures of the Torres Strait islanders, which were rapidly disappearing under the influence of colonization. In 1904, Seligman was one of three members of the Cooke Daniels Ethnographic Expedition to British New Guinea, funded by Denver, Colorado department store owner William Cooke Daniels. The Melanesians of British New Guinea contains a detailed record of much of Seligman's anthropological research conducted during the expedition. Seligman's findings demonstrated the striking physical and cultural differences between the western Papuans and his main preoccupation, their eastern neighbors, who had been more influenced by Melanesian immigration. The book established Seligman's reputation as an anthropologist, and remains an important source for the study of the traditional culture of the peoples of present-day Papua New Guinea. The book includes photographs, drawings, maps, and a glossary of indigenous terms.

"Good deal of fog this morning. I do not go out in the fog myself," notes Adam in his diary, adding, "The new creature does. It goes out in all weathers. And talks. It used to be so pleasant and quiet here." Adam has a lot to learn about Eve, and even more from her, as she names the animals, discovers

fire, and introduces all manner of innovations to their garden home. Mark Twain's "translation" of the diaries of the first man and woman offers a humorous "he said/she said" narrative of biblical events. The great American storyteller found comfort and inspiration in the company of women, and his irreverent look at conventional religion is also a thoughtful -- and humorous -- argument for gender equality.
