Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the

philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

Multiple Intelligences Lulu Press, Inc
 Funny because it's true. From the creator of the viral sensation "10 Tricks to Appear Smart in Meetings" comes the must-have book you never knew you needed, *100 Tricks to Appear Smart in Meetings*. In it, you will learn how to appear smart in less than half the time it takes to actually learn anything. You know those subtle tricks your coworkers are all guilty of? The constant nodding, pretend concentration, useless rhetorical questions? These tricks make them seem like they know what they're doing when in fact they have no clue. This behavior is so ingrained, so subtle, and so often mistaken for true intelligence

that identifying it, calling it out, or compiling it into an exhaustive digest has never been attempted. Until now. Complete with illustrated tips, examples, and scenarios, *100 Tricks* gives you actionable ways to use words like “actionable,” in order to sound smart. Every type of meeting is covered, from general meetings where you stopped paying attention almost immediately, to one-on-one meetings you zoned out on, to impromptu meetings you were painfully subjected to at the last minute. It’s all here. Open this book to any page and find an easy-to-digest trick with an even easier-to-digest illustration, guiding you on: how to nail the big meeting by pacing and

nodding most effective ways to listen to your coworkers while still completely ignoring them the key to making your presentations “interactive.” If you hadn’t noticed these behaviors before, you will see them now—from your colleagues, your managers, and soon yourself. Each trick is a mirror to the reality of what happens in meetings, told in the form of hilariously bad advice—advice that you might just want to take. But probably not. But maybe.

[The Truth About Better Decision-Making \(Collection\)](#) Penguin Striking out on your own for the first time is exhilarating. But in a culture full of bad advice, predatory banks, and splurge-

now-pay-later temptations, it can also be extremely dangerous—leading you to make financial decisions that could hurt you for years to come. Combine this with a slumped economy, mounds of student loans, and dubious examples from reality TV stars to politicians to your own parents, and it's no wonder so many twenty-somethings are struggling. Twenty-three-year-old Zac Bissonnette—the author of *Debt-Free U*—knows exactly what you're going through. He demystifies the many traps young people fall victim to in their post-college years. He offers fresh insights on everything from job hunting to buying a car to saving for retirement that will

give you a foundation for a secure, stable, and happy life. In the process, he reveals why FICO scores are overrated, online job applications are a waste of time, car loans are for suckers, and credit card rewards are a scam. With detours to discuss wine connoisseurs, *Really Broke Housewives*, and Lenny Dykstra, Zac shows you how to make better choices today so you can be richer, smarter (and better-looking!) for years to come.

Today's definition of family is completely unrecognizable from what it was forty, thirty, even twenty years ago. Into the chaos that has become typical of the modern American family, judge Judy Sheindlin attempts to bring some order. With *Keep It Simple, Stupid*, Judge Judy addresses how convoluted family life has become. The traditional nuclear family has expanded to include exes and parents of exes, merging families, stepchildren, lovers, adopted children, in-laws the list goes on and on. Complex issues naturally arise from the enlarged families into which we're born. There is the ex-wife who wants more child support from husband number

one so she can stay home with new baby by husband number two. There are the parents who gave their daughter thirty thousand dollars as a wedding gift only to watch the marriage quickly crumble and their former son-in-law claim half the money. How about the adult son who runs out on his kids, leaving his parents to pay his child support? When it comes to families, Judge Judy has seen it all in her courtroom, and she knows stupidity when she sees it. Tackling all the explosive issues that drive families crazy -- and into court -- Judge Judy shares her on-target, brutally honest thoughts on the chaos that is characteristic of today's American family and gives no-

holds-barred advice on how to resolve conflicts and repair relationships.

How to Develop Your Practical Intelligence for Success in Living

Being smart is more than getting good grades in school. It's more than reading well, solving math problems, memorizing facts, and having a high IQ. Psychologist Dr. Howard Gardner studied how kids and adults learn. He discovered many different ways people can be smart. You can be Music Smart. People Smart. Self Smart. Nature Smart. Life Smart. Gardner's Theory of Multiple Intelligences has changed how teachers teach in schools around the world. Look inside to:

- Learn about

the nine different intelligences and what they mean • Find out which ones you have (Hint: You already have all nine, just in different degrees) • Make the most of your strongest intelligences

- Strengthen your other intelligences • Use all nine intelligences at school, at home, and everywhere you go • Discover more about who you are and who you can be • Understand and get along better with the people around you • Look to the future and how you'll use your smarts when you get older

Quick quizzes help you identify the many ways you're smart. Did You Know? boxes entertain you with fascinating facts. Easy-to-use lists give you lots of fun ways to

build your smarts. Resources point you toward books, magazines, and websites where you can learn even more. Because it's not about how smart you are, but how you are smart. Thomas Armstrong, PhD, is an award-winning author and speaker with 40 years of teaching experience and over 1 million copies of his books in print. He has authored 15 books, including *Multiple Intelligences in the Classroom*; written numerous articles for *Parenting*, *Ladies' Home Journal*, *Family Circle*, and other periodicals; and appeared on several national and international television and radio programs, from NBC's *Today* show to the BBC. *How to Get By Without*
