Rudra Veena Concept
Publishing Company

Music and dance have been the chief forms of religious expression in India. In the course of her long history, India evolved a very wide variety of musical instruments. This book describes 56 musical instruments developed in India. The book is in two parts: part one gives the historical background of the Indian musical instruments and part two describes the musical instruments.

Musical Instruments of India Рипол Классик

Since the thirteenth century, the sitara stringed, plucked instrument of India has transformed into an instrument beloved by millions in its country

of origin as well as all over the world. The Journey of the Sitar in Indian Classical Music details the origin, history, and playing styles of this unique stringed instrument. Dr. Swarn Lata relies on more than thirty-five years of experience teaching sitar to students from diverse cultures and communities as well as extensive research from libraries, museums, temples, and musicologists to compile a comprehensive guidebook filled with fascinating facts about the sitar. In a carefully organized format, Lata offers an in-depth examination of the meaning of musical instruments, the styles of different gharanas, and the place of the sitar in Indian classical

music. Music is an extraordinary medium of expression that has the capability to bring the world together. This step-by-step guidebook shares a one-of-a-kind study of a unique instrument that produces a beautiful sound while providing an unforgettable spiritual experience to all who listen.

Ragas in Carnatic

Music Harper Collins
Rarely do we come across books on musical instruments. And one covering the whole gamut of Indian Classical musical instruments is practically unheard of. This book by Dr. Suneera Kasliwal covers almost all instruments in vogue in the classical music scenerio of southern and northern India. Apart from delving deep into the history and evaluation of each of these instruments , this well researched book deals with their structural and manufacturing details and the basic techniques of sound production. Beautifully illustrated, this book is recommended for all those who have genuine interest in Indian Classical music

and instruments.

The Grammar of
Carnatic Music Taylor &
Francis

The veena had
vanished . . . again?
There are no
coincidences. Eleven-
year-old Neela dreams
of being a famous
musician—until her

instrument goes
missing. It was a gift
from her grandmother,
an antique veena,
intricately carved with
a mysterious
dragon. What Neela
soon discovers is that
the veena's vanishing
is no accident but part
of a chain of
disappearances
involving a dead
musician, a new girl at
school, and an age-old
curse. On a journey
that takes her from
Harvard Square to
Chennai, Neela sets
out to find her precious
veena, learn the truth
behind the curse, and
discover what it means
to be a true musician.
Will Neela be able to
track down her family
heirloom and stop it
from disappearing
again?

**The Classical Music
of North India: The
first years study**

Routledge

Set in the context of the zeitgeist and idealism of the late sixties, Harp is about love, longing and coming of age. The three main protagonists - a young man travelling in a Europe-less-travelled including the Iron Curtain, a young woman who has a calling to music, and another young woman who has loved and lost once - provide the frame of this narrative about journeys we make across countries, even as we embark on a private quest within to know ourselves better, and to seek what it is we really want from life. Moving through India, Europe and USA, Harp follows the lives of these three young people even as they engage with the

cultural, sexual, student revolutions, and the music of the sixties.

Glimpses of Carnatic Music Discovery

Publishing House

In The New

Guitarscape, Kevin

Dawe argues for a re-

assessment of guitar

studies in the light of

more recent musical,

social, cultural and

technological

developments that

have taken place

around the instrument.

The author considers

that a detailed study of

the guitar in both

contemporary and

cross-cultural

perspectives is now

absolutely essential

and that such a study

must also include

discussion of a wide

range of theoretical

issues, literature,

musical cultures and

technologies as they

come to bear upon the instrument. Dawe presents a synthesis of previous work on the guitar, but also expands the terms by which the guitar might be studied. Moreover, in order to understand the properties and potential of the guitar as an agent of music, culture and society, the author draws from studies in science and technology, design theory, material culture, cognition, sensual culture, gender and sexuality, power and agency, ethnography (real and virtual) and globalization. Dawe presents the guitar as an instrument of scientific investigation and part of the technology of globalization, created and disseminated through corporate

culture and cottage industry, held close to the body but taken away from the body in cyberspace, and involved in an enormous variety of cultural interactions and political exchanges in many different contexts around the world. In an effort to understand the significance and meaning of the guitar in the lives of those who may be seen to be closest to it, as well as providing a critically-informed discussion of various approaches to guitar performance, technologies and techniques, the book includes discussion of the work of a wide range of guitarists, including Robert Fripp, Kamala Shankar, Newton Faulkner, Lionel Loueke, Sharon Isbin, Steve Vai, Bob

Brozman, Kaki King, Fred Frith, John 5, Jennifer Batten, Guthrie Govan, Dominic Frasca, I Wayan Balawan, Vicki Genfan and Hasan Cihat ter.

Postcolonial Readings of Music in World Literature

Penguin UK
This book dwells on the enthralling aspects of music. Written by one of the most distinguished contemporary musicians, it explores the hidden treasures of Indian classical music.

Music Production

[Delhi] : Vikas Publications

For thousands of years music in India has been considered a signifying art. Indian music creates and represents meanings of all kinds, some of which extend outwardly to the cosmos, while others arise inwardly, in the

refined feelings which a musical connoisseur experiences when listening to it. In this book the author explores signification in Hindustani classical music along a two-fold path. Martinez first constructs a theory of musical semiotics based on the sign-theories of Charles Sanders Peirce. He then applies his theory to the analysis of various types of Hindustani music and how they generate significations. The author engages such fundamental issues as sound quality, raga, tala and form, while advancing his unique interpretations of well-known semiotic phenomena like iconicity, metalanguage, indexicality, symbolism, Martinez`s

study also provides deep insight into semiotic issues of musical perception, performance, scholarship, and composition. An specially innovative and extensive section of the book analyzes representations in Hindustani music in terms of the Indian aesthetic theory of rasa. The evolution of the rasa system as applied to musical structures is traced historically and analyzed semiotically. In the light of Martinez`s theories, Hindustani music reveals itself to be both a delightfully sensuous and highly sophisticated system of acoustic representations.

Hal Leonard Sitar Method - Deluxe Edition Motilal

Banarsidass Publ. The sitar has been popular since the 1960s. Since that time it has always had a considerable mystique among musicians. It also has an undeserved reputation for being difficult to play. This book/CD set cuts though the mystique and misapprehensions and presents the material in a simple fashion that is easily understood both by Indians and non-Indian musicians alike. Learning the Sitar begins with basic background information, including a discussion of Indian music, the history of the instrument, the parts and other important terms It then moves on to basic exercises and finally finishes with some simple compositions in

Bilawal, Kalyan and Kafi. This is covered in a mix of staff notation as well as traditional Indian Sargam notation.

Classical Music

Routledge

In 1902 The Gramophone Company in London sent out recording experts on "expeditions" across the world to record voices from different cultures and backgrounds. All over India, it was women who embraced the challenge of overcoming numerous social taboos and aesthetic handicaps that came along with this nascent technology. Women who took the plunge and recorded largely belonged to the courtesan community, called tawaifs and devadasis, in North and

South India, respectively. Recording brought with it great fame, brand recognition, freedom from exploitative patrons, and monetary benefits to the women singers. They were to become pioneers of the music industry in the Indian sub-continent. However, despite the pioneering role played by these women, their stories have largely been forgotten. Contemporaneous with the courtesan women adapting to recording technology was the anti-nautch campaign that sought to abolish these women from the performing space and brand them as common prostitutes. A vigorous renaissance and arts revival movement followed, leading to the creation of a new classical

paradigm in both North Indian (Hindustani) and South Indian (Carnatic) classical music. This resulted in the standardization, universalization, and institutionalization of Indian classical music. This newly created classical paradigm impacted future recordings of The Gramophone Company in terms of a shift in genres and styles. Vikram Sampath sheds light on the role and impact of The Gramophone Company's early recording expeditions on Indian classical music by examining the phenomenon through a sociocultural, historical and musical lens. The book features the indefatigable stories of the women and their experiences in adapting to

recording technology. The artists from across India featured are: Gauhar Jaan of Calcutta, Janki Bai of Allahabad, Zohra Bai of Agra, Malka Jaan of Agra, Salem Godavari, Bangalore Nagarathnamma, Coimbatore Thayi, Dhanakoti of Kanchipuram, Bai Sundarabai of Pune, and Husna Jaan of Banaras.

Children's Book of Music Routledge

The book can be viewed as representing the birth of evolutionary biomusicology. What biological and cognitive forces have shaped humankind's musical behavior and the rich global repertoire of musical structures? What is music for, and why does every human culture have it? What

are the universal features of music and musical behavior across cultures? In this groundbreaking book, musicologists, biologists, anthropologists, archaeologists, psychologists, neuroscientists, ethologists, and linguists come together for the first time to examine these and related issues. The book can be viewed as representing the birth of evolutionary biomusicology—the study of which will contribute greatly to our understanding of the evolutionary precursors of human music, the evolution of the hominid vocal tract, localization of brain function, the structure of acoustic-communication signals, symbolic gesture,

emotional manipulation through sound, self-expression, creativity, the human affinity for the spiritual, and the human attachment to music itself. Contributors Simha Arom, Derek Bickerton, Steven Brown, Ellen Dissanayake, Dean Falk, David W. Frayer, Walter Freeman, Thomas Geissmann, Marc D. Hauser, Michel Imberty, Harry Jerison, Drago Kunej, François-Bernard Mâche, Peter Marler, Björn Merker, Geoffrey Miller, Jean Molino, Bruno Nettl, Chris Nicolay, Katharine Payne, Bruce Richman, Peter J.B. Slater, Peter Todd, Sandra Trehub, Ivan Turk, Maria Ujhelyi, Nils L. Wallin, Carol Whaling

Learning the Sitar
Trivandrum, India :
CBH Publications

This book is perhaps the first comprehensive guide to understanding all the aspects and finer nuances of Hindustani classical music. It is aimed at the serious listener, that is, someone who may not have had any formal lessons himself in this performing art, but who, nevertheless, has picked up an initial interest in listening to classical music, and is, therefore, seeking to know more about its underlying structure, system and traditions. By explaining in a straightforward and extremely readable style, the basic features of Indian music, how time and melody are structured, the main principles of r?ga delineation and development, and the various genres and

styles of vocal as well as instrumental performances, the book aims to enhance the serious listener's understanding of Hindustani music, and heighten his appreciation of this art form. This book includes a glossary of musical terms, a select discography and a select bibliography.

Learn to Play on Veena Odisha Society of the Americas

This book reads representations of Western music in literary texts to reveal the ways in which artifacts of imperial culture function within contemporary world literature. Bushnell argues that Western music's conventions for performance, composition, and listening, established during the colonial

period, persist in postcolonial thought and practice. Music from the Baroque, Classical, and Romantic periods (Bach through Brahms) coincides with the rise of colonialism, and Western music contains imperial attitudes and values embedded within its conventions, standards, and rules. The book focuses on the culture of classical music as reflected in the worlds of characters and texts and contends that its effects outlast the historical significance of the real composers, pieces, styles, and forms. Through examples by authors such as McEwan, Vikram Seth, Bernard MacLaverty, Chang-rae Lee, and J.M. Coetzee, the book demonstrates

how Western music enters narrative as both acts of history and as structures of analogy that suggest subject positions, human relations, and political activity that, in turn, describes a postcolonial condition. The uses to which Western music is put in each literary text reveals how European art music of the seventeenth through the nineteenth centuries is read and misread by postcolonial generations, exposing mostly hidden cultural structures that influence our contemporary understandings of social relations and hierarchies, norms for resolution and for assigning significance, and standards of propriety. The book

presents strategies for thinking anew about the persistence of cultural imperialism, reading Western music simultaneously as representative of imperial, cultural dominance and as suggestive of resistant structures, forms, and practices that challenge the imperial hegemony.
