This classic text, the last major work by the great Hebrew Bible scholar Gerhard von Rad, has long been unavailable in North America. It is now being reissued in paperback from to satisfy the continuing demand for copies of the book. In brief, the subject of von Rad's study of Hebrew

wisdom is Israel's willingness to ground faith in encounter with the world as the creation of God. Those familiar with the author's Old Testament Theology will recall how he identified two great watersheds in the history of Israel's thought. The first was the rise of the prophetic movement, which occasioned a radical reinterpretation of Israel's religious traditions as expressed in the earliest creedal formulations found in the Pentateuch. The second watershed, which preceded the prophetic movement and was a basically different assessment of

Israel's relation to Yahweh, was achieved by wisdom teachers at the start of the monarchy. This book studies this first and somewhat novel break with Israel's older sacral traditions. Von Rad bases the study on a wide range of literary materials principally concerned with the books of Proverbs, Job, Ecclesiastes, and the Wisdom of Ben Sirach. "No finer introduction to the fundamental theological questions raised by the wisdom literature of Israel is available." Theology Today Gerhard von Rad was for many years Professor of Old Testament at

the University of Heidelberg.

This study controversially suggests genius is made not born by tracing the lives of famous figures.

A triumph of poetic beauty and a moving meditation on how love and food are inextricably entwined, *Mãn* is a seductive and luminous work of literature from Kim Thúy, whose first book, *Ru*, was shortlisted for the Scotiabank Giller Prize, received a Governor General's Literary Award and won the nationwide book competition Canada Reads. *Mãn* has three mothers: the one who gives birth to her in wartime, the nun who plucks her from a vegetable garden, and her beloved Maman, who becomes a spy to survive. Seeking security for her grown daughter, Maman finds *Mãn* a husband--a lonely Vietnamese restaurateur who lives in Montreal. Thrown into a new world, *Mãn* discovers her natural talent as a chef. Gracefully she practices her art, with food as her medium. She creates dishes that are much more than sustenance for the body: they

evoke memory and emotion, time and place, and even bring her customers to tears. *Mãn* is a mystery--her name means "perfect fulfillment," yet she and her husband seem to drift along, respectfully and dutifully. But when she encounters a married chef in Paris, everything changes in the instant of a fleeting touch, and *Mãn* discovers the all-encompassing obsession and ever-present dangers of a love affair. Full of indelible images of beauty, delicacy and quiet power, *Mãn* is a novel that begs to be savoured for its language, its sensuousness and its love of life.

When the word 'computer' entered the general vocabulary in the 1950s, the most advanced example filled a reasonable sized room. Three decades of rapid technological revolution have resulted in the acceptance of computers in nearly every office, school and home. A corresponding dramatic rise in the status of 'information' has promoted the people who manipulate it from the status of office clerks to information scientists. Despite the wonderful claims for the abilities of the computer and the hallowed tones of 'computerese', Theodore Roszak dares to

suggest that perhaps, like the unfortunate emperor, the computer has been overdressed with false claims made by those with something to gain by it - elements in our society that are making some of the most morally questionable uses of computer power. Roszak challenges the reader to ask: "Is our capacity to think creatively being undermined by the very 'information' that is supposed to help us? Is information processing being confused with science or even beginning to replace thought? And are we in danger of blurring the distinction between what machines do when they process information and what minds do when they think?" He explains why humankind's primary beliefs, in equality, justice and in God are not computable; why great scientific theories and fundamental 'master ideas' cannot be developed by computers; and why bad ideas cannot even be refuted by them. Roszak is no contemporary Luddite - this book was written on a word processor - but he is deeply concerned that we have all been sold a misleading and potentially harmful vision of the computerised society.

Das Zusammenleben der Menschen entwickelte sich weniger durch natürliche Selektion als durch kulturelles Lernen und verstehende Kooperation. Wie wir die Herausforderungen von Klimawandel, Pandemien, Genschere und Digitalisierung meistern, hängt von soziokulturellen Innovationen ab. Im Anthropozän werden die äußere und die menschliche Natur immer stärker durch Kultur und Technik geprägt. Allerdings sind die längerfristigen Folgen weder vorauszusehen noch zu kontrollieren. Daher wäre transnational koordinierte verstehende Kooperation in kosmopolitischer Verantwortung notwendig. Das Buch integriert Erkenntnisse der Evolutionsforschung aus unterschiedlichen Wissenschaftsdisziplinen und zeigt in soziologischer Perspektive, wie sich die spezifisch menschlichen Fähigkeiten - insbesondere verstehende Kooperation - entwickelten. Darüber hinaus werden mögliche institutionelle Weiterentwicklungen des menschlichen Zusammenlebens diskutiert.

 A remarkable look at dolphin and whale intelligence, communication, and culture, with stunning photographs: "A wonderful read." —Biologist Dolphins, whales, and porpoises are often considered to be the smartest nonhuman creatures on Earth. Science and nature buffs are drawn to stories of their use of tools, their self-recognition, their beautiful and complex songs, and their intricate societies. But how do we know what we know, and what does it mean? In *Deep Thinkers*, renowned cetacean biologist Janet Mann gathers a gam of the world's leading whale and dolphin researchers—including Luke Rendell, Hal Whitehead, and many more—to illuminate these vital questions,

exploring the astounding capacities of cetacean brains. Diving into our current understanding of and dynamic research on dolphin and whale cognition, communication, and culture, *Deep Thinkers* reveals how incredibly sophisticated these mammals are—and how much we can learn about other animal minds by studying cetacean behavior. Through a combination of fascinating text and more than 150 beautiful and informative illustrations, chapters compare the intelligence markers of cetaceans with those of birds, bats, and primates, asking how we might properly define intelligence in nonhumans. As all-encompassing and profound as the seas in which these deep cetacean cultures have evolved, *Deep Thinkers* is an awesome and inspiring journey into the fathoms—a reminder of what we gain through their close study, and of what we lose when the great minds of the sea disappear. “Everything you always wanted to know about cetaceans and their intelligence captured here in a single beautiful volume by some of the world’s greatest experts.” —Frans de Waal, New York Times–bestselling author of *Are We Smart*

 If animals could tell us about themselves, using our scientific knowledge, if they could tell us about the way they live, the special way they are made and many details about their individual design - what they would say would be unique praise to the Creator. Did you know that while in flight, the sparrow's heart can beat up to 760 times per minute? Or that a baby blue whale grows at a rate of 7.28 pounds an hour while it's nursing, a grand total of 17 tons by the end of the nursing stage? How about that glow worms have a light output efficiency of 100% as compared to only 4% for our incandescent bulbs? Dr. Werner Gitt, one of the foremost creationist speakers in the world, uses his scientific expertise in this book to show the unique design features of some of God's most captivating creations. All people, young and old, layperson or expert, will be able to understand and enjoy this straightforward book. Told from the perspective of the animals being described, *If Animals Could Talk* clearly

shows the impossibility of life without design. Dr. Gitt uses simple language to provoke a sense of wonder and awe at the marvelous design of the Creator. *Geschichte der europäischen Kunst* Berrett-Koehler Publishers
 Stanislaus Joyce was more than his brother's keeper: he was at various times his brother's co-dependent, touchstone, conscience, and biggest fan. The two shared the same genius, the same childhood influences, and had the same literary instinct, but in Stanislaus it was channeled into sober academic pursuit, while in James it evolved into gaiety, wild whimsy, and at times sodden despair. Covering the first twenty-two years of James Joyce's life in Dublin and Trieste, *My Brother's Keeper* is a window onto the drama that was his youth. Thanks to Stanislaus's superb memory and sure hand, here we find the Dublin of Dubliners: the streets, neighbors, churches, and unforgettable eccentrics. Here we see the model for Ulysses' Simon Dedalus: James' father, a dour and violent figure when in his cups. Here are the Joyces in their own home, and the minor characters that pepper *A Portrait of the Artist: Eileen*,

Leopold Bloom's comely daughter; Mrs. Riordan, the surly teacher; Mr. Casey, the political agitator. And finally, here is Trieste, a place of exile for Stanislaus but a retreat for James. Stanislaus Joyce has fashioned both an invaluable primary source for his brother's opaque masterpieces and a loving memoir of his brother's early life.

The Real Messiah Bloomsbury Publishing

USA

Highly controversial but impeccably researched, *The Real Messiah* explodes the myth that Jesus was the long-prophesied Messiah of the Jewish nation. Indeed, it argues that Jesus never claimed that role but thought of himself as herald to the true Messiah: Marcus Julius Agrippa, the last King of the Jews and Jesus' contemporary. It was he who truly founded what became known as Christianity, and wanted to build a faith to which anyone could aspire. Though Marcus Agrippa was initially successful, with the passing of time those in charge of the new faith capitulated to the whims of successive

Roman Emperors and centered their religion on Jesus instead.
