This book traces the career of pioneering South African plastic and reconstructive surgeon, Jack Penn, from its beginnings during the Second World War. It explores the establishment of Penn's private practice, and his work in diverse countries, including Gabon, Japan and Israel, as he sought to rectify the injury caused by conflict. It also addresses his role on the President's Council, established by Prime Minister P.W. Botha to introduce reform to the system of apartheid. Penn's career is contextualised by modernisation which was a significant feature of twentieth-century South Africa. It was linked with race from the inception of the state in 1910 with racial segregation and paternalism. Penn's work during the Second World War was part of a "modernist" bent by the state under Jan Smuts to take the lead in promoting science and technological

development – which continued during apartheid. Modernisation was also fluid with state priority shifting between the two poles of development and security as apartheid policies were met with hostility both within the state and beyond its borders. Within the context of decolonisation, increasing black urbanisation required a balancing act on the part of the state to uphold the ideology of racial distinction while simultaneously addressing economic challenges – and this was reflected in the reform initiatives under Botha. Plastic and reconstructive surgery as evident in the work of Jack Penn is intertwined with this narrative of apartheid, modernisation and reform. It demonstrated Western prowess, with medicine and development a perceived bulwark against Communism. It also served as a means for the modernising apartheid state to initiate, maintain or enhance alliances with other states in the face of mounting isolation and international condemnation. The career of Jack Penn, then, is a

lens through which the contradictions, complexities and anxieties of twentieth-century South Africa are exposed.

Mentoring in Nursing through Narrative Stories Across the World African Books Collective

While vast numbers of nurses across the globe contribute in all areas of healthcare delivery from primary care to acute and long-term care in community settings, there are significant differences in how they are educated, as well as the precise nature of their practice. This comprehensive handbook provides a research-informed and international perspective on the critical issues in contemporary nurse education. As an applied discipline, nursing is implemented differently depending on the social, political and cultural climate in any given context. These factors impact on education, as much as on practice, and are reflected in debates around the value of accredited programmes, and on-the-job training, apprenticeship, undergraduate and postgraduate pathways

into nursing. Engaging with these debates amongst others, the authors collected here discuss how, through careful design and delivery of nursing curricula, nurses can be prepared to understand complex care processes, complex healthcare technologies, complex patient needs and responses to therapeutic interventions, and complex organizations. The book discusses historical perspectives on how nurses should be educated; contemporary issues facing educators; teaching and learning strategies; the politics of nurse education; education for advanced nursing practice; global approaches; and educating for the future. Bringing together leading authorities from across the world to reflect on past, present and future approaches to nurse education and nursing pedagogy, this handbook provides a cutting-edge overview for all educators, researchers and policy-makers concerned with nurse education.

Department of Health, for the Year Ending ...
 Springer Nature

This book examines the complex history of

Adventism in Africa, situating it within the context of African traditions and culture. From a small movement with origins in the United States, the Seventh-day Adventist Church has grown worldwide. It is one of several Christian denominations present in Africa and yet the history of Seventh-day Adventism in the global South has been largely unexplored by scholars. The book highlights the discrepancies between western traditions exhibited in the missionary enterprise and African religious systems. It also explores the intricate relation between colonialism and African Adventism in line with established studies in African Christianity. It will be of interest to scholars of religion and theology, particularly church history and mission studies, as well as African studies.

Juta's Statutes of South Africa Springer Publishing Company

Telemedicine networks to support healthcare workers in resource-limited settings (often for humanitarian purposes) have evolved over the last decade or so in a largely autonomous way. Communication between them has been informal

and relatively limited in scope. This situation could be improved by developing a comprehensive approach to the collection and dissemination of information. A recent review identified seven telemedicine networks, each of which had been in operation for at least five years and which provided store-and-forward telemedicine services to doctors in low- and middle-income countries. These networks provide clinically useful services and improved healthcare access. However, like much of telemedicine, the formal evidence for their cost-effectiveness remains weak. Topics of current research interest therefore include the cost-effectiveness of telemedicine in resource-limited settings. Outcomes data (and methods for gathering it) such as patient quality of life following a telemedicine episode, the knowledge-gain of healthcare staff involved in telemedicine, and staff recruitment and retention in rural areas are also of interest. Finally, there is little published information about the performance of these telemedicine networks (and methods for

measuring it), about how best to manage them, and about how to share resources between them. A collection of articles reporting the current evidence supporting the use of telemedicine in resource-limited settings would build the evidence base and should provide a focus for future research. It would also serve to raise the profile of this potentially important research field.

Education Academic Press

"The South African nursing experience over 90 years has been adequately documented and may be found on the shelves of public libraries, university libraries and hospital libraries as well as between the pages of "struggle literature" such as *Critical Health*. This book does not attempt academic analysis per se, rather is it an authentic oral and written account of the experiences, which shaped the careers of black nurses. The sample of respondents was picked at random across the country, as time and private purse allowed. They were assured anonymity in that only first or nicknames would be used as a rule, except where a surname carries historical significance. In

1994, when the winds of changes blew democracy across the political landscape, the South African nursing profession too was gusted along the road of revolution. It was no longer a question of whether change would come, but when. Nonceba Lubanga in her chapter "Nursing in South Africa" has been given a detailed account of the struggle of black nurses, referring to them as "the unsung heroes of the African struggle in South Africa."-- P. [4] of cover.

Tabbner's Nursing Care
IGI Global

This evidence-based book focuses on contemporary issues related to human health and well-being. Drawing on the first-hand experiences of academics and researchers, it provides a holistic perspective on the importance of both mental and physical health for quality of life. It is divided into seven sections: changing perspectives on well-being; the mental health of students; the well-being of elderly people and marginalized populations; the role of family and teachers; psycho-social support; the right to health; and future perspectives. Covering current topics, such as the

challenges posed by pandemics like COVID-19, the book discusses future strategies for addressing contemporary and emerging health issues and the overall well-being of the general public, an area not covered in any of the previous volumes. Furthermore, it explores the need for the involvement of multidisciplinary professionals in examining general health and well-being issues. Given its scope, it is an indispensable resource for a wide range of professionals and researchers from various fields, such as the social sciences, law, public health, medicine, education, and environmental studies. In addition, the book appeals to health policymakers, educational administrators, law enforcement agencies, as well as health workers, psychologists, and social workers dealing with clients in hospitals, educational institutions, and at the community level.

Provides the most comprehensive account since the early 1960s of South Africa's black

middle class.

Lahlekile Taylor & Francis

This volume focuses on the activities on Health Telematics Education. In Europe, coordinated activities in healthcare informatics education started in the late 1980's with the establishment of European Courses in Health Telematics. At the same time the European Commission foresaw the need for spreading the knowledge of IT in the Healthcare Sector. Therefore the EC, since then, have supported the initiatives that aim to create awareness, stimulate diffusion, educate and train the users (healthcare professionals) in the application of Information Technology to the Healthcare Sector. Such an initiative is the NIGHTINGALE project which is an essential project in the planning and implementation of strategy timing the Nursing profession in using and applying healthcare information systems, as well as, the IT EDUCTRA project which covers a more wide spectrum of the Health Telematics Education. The objective of this book is to promote the appropriate use of the developed

Telematics infrastructure across Europe by educating and training healthcare professionals in a harmonising way across Europe in the upcoming field of Health and Nursing Informatics. For achieving this objective the European Commission established a series of European Conferences on Health Telematics Education, and Workshops by experts (users, developers and policymakers). In this book the Proceedings of the first European Conference in 'Health Telematics Education' (HTE'96), organised by the NIGHTINGALE project and supported by the IT EDUCTRA project, are included as well as the minutes and the presentations of the NIGHTINGALE Workshops. Handbook of Research on Protecting and Managing Global Indigenous Knowledge Systems Bloomsbury Publishing Vols. for 1967-70 include as a section: Who's who of Rhodesia, Mauritius, Central and East Africa. *Emergency and Trauma Care for Nurses and Paramedics* CRC Press Antibiotic Materials in Healthcare provides significant information on antibiotic related issues, accurate solutions, and

recent investigative information for health-related applications. In addition, the book addresses the design and development of antibiotics with advanced (physical, chemical and biological) properties, an analysis of materials, in vivo and in vitro applications, and their biomedical applications for healthcare. Provides information on all aspects of antibiotic related issues Offers a balanced synthesis of basic and clinical science for each individual case, presenting clinical courses and detailed microbiological information for each infection Describes the prevalence and incidence of global issues and current therapeutic approaches Seventh-Day Adventism in Africa Springer Nature Telecommunications bring the potential to improve both the quality of and access to health care in the remotest areas of the developing world. Telemedicine offers solutions for emergency medical assistance, long distance consultation, administration and logistics, supervision and quality assurance and education and training for health-care professionals

and providers. Telehealth in the Developing World aims to balance the relative lack of published information on successful telehealth solutions in the developing world. It is written for all e-health and telehealth proponents interested in learning about, or contributing to the implementation of, appropriate solutions for 80% of the world's population. Topics featured include:

Teledermatology in Cambodia
Telepediatrics in Chechnya
Telepathology in India - using digital cameras and email
HealthNet networks in Nepal
Medical missions for Children in Mongolia
International HIV/AIDS discussion lists
The Aga Khan Telehealth Network in Pakistan
Access to mobile phones and internet in the Philippines
Exchanging X-ray images in Ghana
Web-based oncology registries and a virtual oncology hospital in Brazil
Surgical training in the developing world
The iPath international email network

Resources in Education
Frontiers Media SA
This volume investigates the uptake of 'open learning' in South African Technical Vocational Education and Training (TVET) colleges and

higher education institutions. Comprised of 16 studies focused on activities at a range of colleges and universities across the country, these chapters aim to promote a better understanding of open learning practices across the Post-School Education and Training (PSET) sector, including issues such as: recognition of prior learning, access for students with disabilities, work integrated learning, professional development, novel student funding mechanisms, leadership for open educational practices, institutional culture, student support, blended and online learning, flexible learning, online assessment, open educational resource development models and funding, and micro-credentials. This collection of peer-reviewed chapters contributes to understanding the ways in which South African PSET institutions and educators are interpreting 'open learning' as a means of advancing social justice. It includes a historical and contemporary understanding of the economic, cultural and political obstacles facing PSET, drawing on Nancy Fraser's theory of social justice as 'participatory

parity' to better understand the ways in which 'open learning' may address systemic social injustices in order to allow South African students and educators to thrive. This volume emerges from research conducted by the Cases on Open Learning (COOL) project, an initiative by the Department of Higher Education and Training in partnership with the Centre for Innovation in Learning and Teaching (CILT) at the University of Cape Town (UCT) in South Africa.

Handbook of Health and Well-Being Springer
Nature
'We can say without fear of being contradicted by history, that June 16, 1976 heralded the beginning of the end of the centuries-old white rule in this country.'
Nelson Mandela
Originally banned on publication by the apartheid government, *Year of Fire, Year of Ash* is an eye-opening account of how, in June 1976, 20,000 school students faced down the tanks and guns of a vicious racist regime, in a revolt that galvanized the black working-class and became a pivotal turning point for the anti-apartheid movement. More than this, the book

overturns much of the conventional logic that served to explain the event at the time, showing it was not simply a student protest, but part of a wider uprising. Released in this new edition to mark the fortieth anniversary, *Year of Fire, Year of Ash* provides an unparalleled insight into the origins and events of the uprising, from its antecedents in the 1920s to its role in inspiring global solidarity against apartheid. As South Africa experiences a new wave of popular discontent, and as new forms of black consciousness come to the fore in movements around the world, Baruch Hirson's book provides a timely reminder of the Soweto revolt's continued significance to struggles against oppression today. *A History of African Higher Education from Antiquity to the Present* Elsevier Health Sciences

Emergency and Trauma Care for nurses and paramedics is a highly respected emergency care text for nursing and paramedicine students and clinicians in Australia and New Zealand. Now in its fourth edition, it provides the most up-to-date and comprehensive coverage of the spectrum

of emergency and trauma care. The text spans prehospital and hospital care, enabling students to understand the patient journey and equipping them for their role in a multidisciplinary team. Coverage includes assessment, triage and management of trauma, physiology of emergency care, and the recognition and management of specific body system emergencies, as well as the fundamentals of emergency care such as quality and safety, ethics, leadership, research and patient education. Fully revised to reflect the dynamic and evolving nature of emergency and trauma care, this book is ideal for students, prehospital care providers, rural, remote and urban emergency and trauma care nurses, and other disaster management clinicians. Endorsed by the College of Emergency Nursing Australasia Written by internationally recognised clinicians, researchers and leaders in emergency care Latest evidence-based research and practice across the emergency care continuum Case studies to consolidate knowledge apply theory to practice Practice tips highlight

cultural considerations and communication issues Aligns to NSQHSS 2e, NMBA and PBA Standards Includes Elsevier Adaptive Quizzing for Emergency and Trauma Care for Nurses and Paramedics 4e Instructor resources: Image collection PowerPoint slides Case study questions and answers Additional case studies with answers and rationales Additional paramedic case studies with answers and rationales Paramedic test bank Test bank Instructor and student resources: Additional case studies Additional paramedic case studies Videos *Routledge International Handbook of Nurse Education* Routledge You strike a woman, you strike a rock. On the 44th anniversary of the women's defiance campaign, this book pays tribute to the many women who have shaped the history of South Africa.

The New Black Middle Class in South Africa Bloomsbury Publishing USA

Note to Readers: Publisher does not guarantee quality or access to any included digital components if book is purchased through a third-party seller. This

innovative text delivers more than 40 evidence-based teaching strategies that educators can use to engage nursing students and enhance their learning in a variety of teaching environments. It provides a wealth of new teaching designs both novice and experienced faculty can use to inspire and motivate learners in the classroom through simulation, online, and in community or hospital settings. Strategies developed by leading clinical nursing and health educators characterize nursing education as a dynamic and highly specialized field that stems from meaningful interactions between learners and educators. For ease of comparison, each practical teaching strategy is organized in a consistent format to include student-centered competencies and nursing education accreditation standards. The text also provides a template and a step-by-step guide on how to customize the strategies to fit the needs of learners and educators. The designs include an emphasis on applications of technologically enhanced innovations in nursing education, interdisciplinary collaboration, and the use

of the humanities and art. This text answers the ongoing call for interprofessional education necessary to prepare the next generation of expert nurses in the rapidly changing environment of healthcare. Key Features: Evidence-based research used in the development of each teaching strategy Groundbreaking practices in a variety of environments will challenge the discipline and spark additional innovations throughout nursing Each chapter provides optimal learning outcomes and teaching objectives, preparation resources, modules of implementation, methods to evaluate the effectiveness of each strategy, outlined limitations, and accreditation standards Instructor's Manual included [Year of Fire, Year of Ash](#) IOS Press A detailed history of how agrarian reform has manifested in South Africa and how it will progress into the future. In the *Shadow of Policy* explores the interface between the policy of land and agrarian reform and its implementation and between the decisions of policy "experts" and

actual livelihood experiences in the fields and homesteads of land reform projects. Starting with an overview of the sociohistorical context in which land and agrarian reform policy has evolved in South Africa, the volume presents empirical case studies of land reform projects in the Northern, Western, and Eastern Cape provinces. These draw on multiple voices from various sectors and provide a rich source of material and critical reflections to inform future policy and research agendas. Notions of land and agrarian reform are now well entrenched in postapartheid South Africa. But what this reform actually means for everyday life is not clearly understood, nor the way it will impact the political economy.

Telehealth in the Developing World Wits University Press

In an era of globalization, population growth, and displacements, migration is now a fact of life in a constantly shifting economic and political world order. This book contributes to the discourse on the beneficiaries, benefactors, and the casualties of African displacement.

While the few existing studies have emphasized economic motivation as the primary factor triggering African migration, this volume treats a range of issues: economic, socio-political, pedagogical, developmental, and cultural. Organized with a multidisciplinary thrust in mind, this book argues that any discussion of African migration, whether internal or external, must be conceived as only one aspect of a more complex, organic, and global patterning of "flux and reflux" necessitated by constantly shifting dynamics of world socio-economic, cultural, and political order.

Healthcare

Professionalism Elsevier Health Sciences Step-by-step instructions show how to use the Guide to Nursing Diagnoses and Guide to Planning Care sections to create a unique, individualized plan of care. UNIQUE! Care plans are provided for NANDA-I© approved nursing diagnoses. Evidence-based interventions and rationales include recent or classic research and references supporting the use of each intervention. Examples of and

suggested NIC interventions and NOC outcomes are presented in each care plan. 150 NCLEX® exam-style review questions are available on the Evolve website. Easy-to-follow Sections I and II guide you through the nursing process and selection of appropriate nursing diagnoses. Clear, concise interventions are usually only a sentence or two long and use no more than two references. Safety content emphasizes what must be considered to provide safe patient care. List of NANDA-I© Diagnoses on the inside front cover of the book provides quick reference to page numbers. Alphabetical thumb tabs allow quick access to specific symptoms and nursing diagnoses. Appendixes provide valuable information in an easy-to-access location.
