The desire to preserve to future ages the memory of past achievements is a universal human instinct, as witness the clay tablets of old Chaldea, the hieroglyphs of the obelisks, our

countless thousands of manuscripts and printed volumes, and the gossiping old story-teller of the village or the backwoods cabin. The reliability of the record depends chiefly on the truthfulness of the recorder and the adequacy of the method employed. In Asia, the cradle of civilization, authentic history goes back thousands of years; in Europe the record begins much later, while in America the aboriginal narrative, which may be considered as fairly authentic, is all comprised within a thousand years. The peculiar and elaborate systems by means of which the more cultivated ancient nations of the south recorded their histories are too well known to students to need more than a passing notice here. It was known that our own tribes had various ways of depicting their mythology, their totems, or isolated facts in the life of the individual or nation, but it is only within a few years that it was even suspected that they could have anything like continuous historical records, even in embryo. The fact is now established, however, that pictographic records covering periods of from sixty to perhaps two hundred years or more do, or did, exist among several tribes, and it is entirely probable that every leading mother tribe had such a record of its origin and wanderings, the pictured narrative being compiled by the priests and preserved with sacred care through all the shifting vicissitudes of savage life until lost or destroyed in the ruin that overwhelmed the native governments at the coming of the white man. Several such histories are now known, and as the aboriginal field is still but partially explored, others may yet come to light.

The Truth About Children and Divorce Rutherford Publishing House

Nationally recognized expert Robert Emery applies his twenty-

five years of experience as a researcher, therapist, and mediator to offer parents a new road map to divorce. Dr. Emery shows how our powerful emotions and the way we handle them shape how we divorce—and whether our children suffer or thrive in the long run. His message is hopeful, yet realistic—divorce is invariably painful, but parents can help promote their children’s resilience. With compassion and authority, Dr. Emery explains: • Why it is so hard to really make divorce work • How anger and fighting can keep people from really separating • Why legal matters should be one of the last tasks • Why parental love—and limit setting—can be the best “therapy” for kids • How to talk to children, create workable parenting schedules, and more

A Cup Of Coffee With 10 Of The Top Personal Injury Attorneys In The United States - This book is for anyone who has been seriously injured in an accident. Ten of the top personal injury attorneys in the United States will provide you with valuable insights, guide you through the hazardous steps of filing a claim, and shepherd you around the landmines when dealing with insurance companies. If you are the victim of an accident that was due to the negligence of another person or company, you are entitled to compensation for your injuries. Unfortunately, most

people don't realize that insurance companies have no incentive to be fair or to fully compensate you for your injuries. Their unstated goal is to find ways to deny your claim or minimize their liability, and pay you as little as possible. We asked 10 of the best personal injury attorneys to share their insights about what you should know before you settle your claim. I personally believe this is the most powerful and enlightening book ever written on the subject.

The Texas Model for Comprehensive School Counseling Programs is a resource to develop effective and high quality comprehensive school counseling programs that align with Texas statutes and rules governing the work of school counselors. It outlines a process for tailoring school counseling programs to meet the varying needs of students across an array of school districts through implementation of the four components of school counseling programs, Guidance Curriculum, Responsive Services, Individual Planning, and System Support. With this resource, a school counselor will learn to use campus-specific data to identify the unique needs of a campus and design a comprehensive school counseling program to meet those needs. Recognizing the important roles of the entire educational community, the Texas Model for Comprehensive School Counseling Programs provides examples of how parents, teachers, administrators, principals and school counselors can best contribute to implementation of each of the four components of comprehensive school counseling programs. It provides a developmental framework for a school counseling program curriculum that includes activities at each grade level to enhance students' educational, career, personal

and social development.

The most important thing you can do to give your child a future is to remain a full parent in their lives. To retain equal time to show them love and to teach them through your daily example. Children do best in life when they have two fit parents active in their lives. Your right to the care, custody and control over your child is a Fundamental Liberty, just as your right to free speech is, or your right to freedom of religion is a Fundamental Liberty. Your child has the right to associate with you and to have you as a parent, not a visitor, in their life. You and your child have privacy rights in your family life that are between you and your child as individuals. They do NOT come from the marriage, and, if you are a natural parent, they do NOT come from the Government. If you let them, the State will take your rights and do with them what they please. Knowledge is Power! Know your Rights! Protect Your Children

Not in the Child's Best Interest

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a

number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
