**Adaptive Leadership: The Heifetz Collection (3 Items)** SAGE Publications, Incorporated

Organizational Theory for Equity and Diversity covers the full range of organizational theories as applied to educational leadership practice and research, exploring not only traditional perspectives but also critically oriented epistemologies including Critical Race Theory; LatCrit, Asian, Tribal Crit, and Black Crit; Disability Studies theories; feminist theories; Queer Theory, and theories of intersectionality. Each chapter features teaching suggestions, discussion questions, and questions to help aspiring leaders critically analyze their leadership strengths and limitations in order to understand, apply, and integrate theories into practice. This valuable text provides aspiring school leaders and administrators with the theory and tools for creating equitable and diverse schools that are effective and sustainable.

*The Essentials Of Leadership* SAGE

Toxic leaders, both political, like Slobodan Milosevic, and corporate, like Enron's Ken Lay, have always been with us, and many books have been written to explain what makes them tick. Here leadership scholar Jean Lipman-Blumen explains what makes the followers tick, exploring why people will tolerate--and remain loyal to--leaders who are destructive to their organizations, their employees, or their nations. Why do we knowingly follow, seldom unseat, frequently prefer, and sometimes even create toxic leaders? Lipman-Blumen argues that these leaders appeal to our deepest needs, playing on our anxieties and fears, on our yearnings for security, high self-esteem, and significance, and on our desire for noble enterprises and immortality. She also explores how followers inadvertently keep themselves in line by a set of insidious control myths that they internalize. For example, the belief that the leader must necessarily be in a position to "know more" than the followers often stills their objections. In addition, outside forces--such as economic depressions, political upheavals, or a crisis in a company--can increase our anxiety and our longing for charismatic leaders. Lipman-Blumen shows how followers can learn critical lessons for the future and survive in the meantime. She discusses how to confront, reform, undermine, blow the whistle on, or oust a toxic leader. And she suggests how we can diminish our need for strong leaders, identify "reluctant leaders" among competent followers, and even nurture the leader within ourselves. Toxic leaders charm, manipulate, mistreat, weaken, and ultimately devastate their followers. *The Allure of Toxic Leaders* tells us how to recognize these leaders before it's too

late.

**A Practical Guide to Theoretical Frameworks for Social Science Research** Simon and Schuster

This book serves to provide a detailed exploration of the various leadership styles exhibited today. In order to better comprehend the organic link between styles of leadership, this book deals with almost all models of leadership and demonstrates how dynamic these forms of leadership actually are. It is an essential and extensive reference point for both academics and practitioners.

This practical book offers a guide to finding, choosing, and applying theoretical frameworks to social sciences research, and provides researchers with the scaffolding needed to reflect on their philosophical orientations and better situate their work in the existing landscape of empirical and theoretical knowledge. Using a multifaceted approach, the book provides clear definitions, primary tenets, historical context, highlights of the challenges and contemporary discussion and, perhaps more importantly, concrete and successful examples of studies that have drawn on and incorporated each theoretical framework. The authors define and explain the connections among such concepts as ontology, epistemology, paradigm, theory, theoretical frameworks, conceptual frameworks, and research methodology; describe the process of finding and effectively using theoretical and conceptual frameworks in research; and offer brief overviews of particular theories within the following disciplines: sociology, psychology, education, leadership, public policy, political science, economics, organizational studies, and business. The book also has a dedicated chapter on critical theories, and for each theory, provides a definition, explores how the theory is useful for researchers, discusses the background and foundations, outlines key terms and concepts, presents examples of theoretical applications, and gives an overview of strengths and limitations. This book offers a useful starting point for any researcher interested in better situating their work in existing conceptual and theoretical knowledge, but it will be especially useful for graduate students and early career researchers who are looking for clear definitions of complex terms and concepts, and for an introduction to useful theories across disciplines.

*Leadership: Theory and Practice* by Peter G. Northouse presents an academically robust account of the major theories and models of leadership with a focus on how theory can inform practice. Northouse uses a consistent structure for each chapter that allows readers to easily compare and contrast different theories. Case studies and questionnaires provide students with practical examples and opportunities to deepen their understanding of their own leadership style. The fully updated Ninth Edition features a new chapter on inclusive leadership, 17 new real-world cases that profile leaders from across the globe, a new discussion on leadership and morality, and examples of timely issues such as leadership during the COVID-19 pandemic. This title is accompanied by a complete teaching and learning package.

*Introduction to Leadership* SAGE

A leader's singular job is to get results. But even with all the leadership training programs and "expert" advice available, effective leadership still eludes many people and organizations. One reason, says Daniel Goleman, is that such experts offer advice based on inference, experience, and instinct, not on quantitative data. Now, drawing on research of more than 3,000 executives, Goleman explores which precise leadership behaviors yield positive results. He outlines six distinct leadership styles, each one springing from different components of emotional intelligence. Each style has a distinct effect on the working atmosphere of a company, division, or team, and, in turn, on its financial performance. Coercive leaders demand immediate compliance. Authoritative leaders mobilize people toward a vision. Affiliative leaders create emotional bonds and harmony. Democratic leaders build consensus through participation. Pacesetter leaders expect excellence and self-direction. And coaching leaders develop people for the future. The research indicates that leaders who get the best results don't rely on just one leadership style; they use most of the styles in any given week. Goleman details the types of business situations each style is best suited for, and he explains how leaders who lack one or more of these styles can expand their repertoires. He maintains that with practice leaders can switch among leadership styles to produce powerful results, thus turning the art of leadership into a science. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world--and will have a direct impact on you today and for years to come.

*Cases in Leadership* Routledge

This leadership primer describes major leadership theories and the relative merits or criticisms of each. Included are chapters on

leadership defined by traits, skills, style, and situation. Other chapters describe theories of contingency, path-goal, leader-member exchange, transformational leadership, and team leadership. Also covered are the psychodynamic approach, women's leadership, and ethics. Each chapter includes case studies, a self-test, a bibliography, and suggestions for applying theory to practice.

Edited by David Platt, Daniel L. Akin, and Tony Merida, this new commentary series, projected to be 48 volumes, takes a Christ-centered approach to expositing each book of the Bible. Rather than a verse-by-verse approach, the authors have crafted chapters that explain and apply key passages in their assigned Bible books. Readers will learn to see Christ in all aspects of Scripture, and they will be encouraged by the devotional nature of each exposition.

**Leadership Case Studies in Education** Jones & Bartlett Learning

For 15 years and through two editions, this handbook has been indispensable for serious students of leadership. Now, in this third edition, Bass introduces a decade of new findings on the newest theories and models of leadership. With over 1,200 pages of essential information, Bass & Stogdill's Handbook of Leadership will continue to be the definitive resource for managers for years to come.

*Bass & Stogdill's Handbook of Leadership* Harvard Business Press From one of the pioneers in the field of leadership studies comes a provocative reassessment of how people lead in the digital age: in *The End of Leadership*, Barbara Kellerman reveals a new way of thinking about leadership—and followership—in the twenty-first century. Building off of the strengths and insights of her work as a scholar and a teacher, Kellerman critically reexamines our most strongly-held assumptions about the role of leadership in driving success. Revealing which of our beliefs have become dangerously out-of-date thanks to advances in social media culture, she also calls into question the value of the so-called “leadership industry” itself. Asking whether leadership can truly be taught, Kellerman forces us to think critically and expansively about how to thrive as leaders in a global information age.

**The Allure of Toxic Leaders** Corwin

Anyone who has worked for a large organization understands that all bureaucracies demand to be fed. Some of these bureaucracies can develop insatiable appetites, and when they do, the defining aspect between success and failure is often good leadership. But what is good leadership? Leaders are responsible for making sense of the ambiguity that emerges from the complex relationships that define organizations. They provide the frames to help us understand what we see. But when meaning and purpose begin to fade from the day-to-day taskers, special projects and reports, we are left to wonder whether we are observing mere nonsense or something else we just don't understand. How can we know? We must ask questions -- good questions. Any meaningful attempt to understand the complexities of organizational life requires considerable reflection upon one's own thinking. Through a collection of stories, *The 52nd Floor: Thinking Deeply About Leadership* takes readers on a reflective journey where they can discover for themselves the right questions to ask to create a path to become a better leader. Welcome to the 52nd Floor. Reviews (Five stars) A must read for those who want a new approach to leadership.--Midwest Book Review (July 8, 2009) *Thinking Deeply About Leadership* is a perfect subtitle for this book. Why? Because as you read and get actively involved with the process which Levy, Parco, and Blass have created, you will think deeply about what leadership means to you. This book on leadership is all about you and your leadership point of view, not about the authors and their leadership point of view. Wow! What a learning opportunity. --Ken Blanchard, Legendary Co-Author of *The One Minute Manager & Leading at a Higher Level* Whether in the locker room or the board room, on the field or in the office, leaders constantly influence behavior. This book is ideal for anyone who has ever wondered about what it means to lead. Levy, Parco, and Blass, have given us much to think about - their book is a winner! --Coach Bobby Bowden, College Football Hall of Fame Leadership is certainly a subject that requires deep thinking because it determines success or failure in every human endeavor. *The 52nd Floor* is a non-traditional approach that provides the reader with a unique glimpse into leadership. A must read for those serious about developing as effective leaders. --Bill Looney, General (ret.), U.S. Air Force, Author of *Exceeding Expectations* An absolutely fascinating look into leadership. Levy, Parco and Blass have fully grasped the entire picture and spectrum of leadership that has taken me a lifetime to discern. This book will make you think. --Michael J.C. Roth, President Emeritus, USAA Investment Management Company It takes courage and imagination to write such a book. I can only hope that more will follow. I like the way the questions have been posed, how myths have been shattered, and the emphasis on thinking deeply rather than repeating trivialities. Very well done. --Amnon Rapoport, Ph.D., Distinguished Professor of Management, University of California-Riverside Bravo! The authors have written a brilliant and wholly

unique leadership book! The inclusiveness and participatory nature of the book will inspire anyone who is interested in management. Once you get started, you won't be able to put it down! --Robert N. Mishev, McKinsey & Co. Finally, a leadership book that will actually improve one's leadership! *The 52nd Floor* sees leadership as a journey, a practice what real people do in real time to create practical value right now. Here is a natural and realistic practice that we can take to make our leadership journeys successful. --James R. Barker, PhD., Editor, *Management Communication Quarterly*

For thirty-three years and through three editions, Bass & Stogdill's Handbook of Leadership has been the indispensable bible for every serious student of leadership. Since the third edition came out in 1990, the field of leadership has expanded by an order of magnitude. This completely revised and updated fourth edition reflects the growth and changes in the study of leadership over the past seventeen years, with new chapters on transformational leadership, ethics, presidential leadership, and executive leadership. Throughout the Handbook, the contributions from cognitive social psychology and the social, political, communications, and administrative sciences have been expanded. As in the third edition, Bernard Bass begins with a consideration of the definitions and concepts used, and a brief review of some of the betterknown theories. Professor Bass then focuses on the personal traits, tendencies, attributes, and values of leaders and the knowledge, intellectual competence, and technical skills required for leadership. Next he looks at leaders' socioemotional talents and interpersonal competencies, and the differences in these characteristics in leaders who are imbued with ideologies, especially authoritarianism, Machiavellianism, and self-aggrandizement. A fuller examination of the values, needs, and satisfactions of leaders follows, and singled out for special attention are competitiveness and the preferences for taking risks. In his chapters on personal characteristics, Bass examines the esteem that others generally accord to leaders as a consequence of the leaders' personalities. The many theoretical and research developments about charisma over the past thirty years are crucial and are explored here in depth. Bass has continued to develop his theory of transformational leadership -- the paradigm of the last twenty years -- and he details how it makes possible the inclusion of a much wider range of phenomena than when theory and modeling are limited to reinforcement strategies. He also details the new incarnations of transformational leadership since the last edition. Bass has greatly expanded his consideration of women and racial minorities, both of whom are increasingly taking on leadership roles. A glossary is included to assist specialists in a particular academic discipline who may be unfamiliar with terms used in other fields. Business professors and students, executives in every industry, and politicians at all levels have relied for years on the time-honored guidance and insight afforded by the Handbook. *Leadership* Christian Faith Publishing, Inc.

In times of constant change, adaptive leadership is critical. This Harvard Business Review collection brings together the seminal ideas on how to adapt and thrive in challenging environments,

from leading thinkers on the topic—most notably Ronald A. Heifetz of the Harvard Kennedy School and Cambridge Leadership Associates. The Heifetz Collection includes two classic books: *Leadership on the Line*, by Ron Heifetz and Marty Linsky, and *The Practice of Adaptive Leadership*, by Heifetz, Linsky, and Alexander Grashow. Also included is the popular Harvard Business Review article, “Leadership in a (Permanent) Crisis,” written by all three authors. Available together for the first time, this collection includes full digital editions of each work. Adaptive leadership is a practical framework for dealing with today’s mix of urgency, high stakes, and uncertainty. It has been used by individuals, organizations, businesses, and governments worldwide. In a world of challenging environments, adaptive leadership serves as a guide to distinguishing the essential from the expendable, beginning the meaningful process of adaption, and changing the status quo. Ronald A. Heifetz is a cofounder of the international leadership and consulting practice Cambridge Leadership Associates (CLA) and the founding director of the Center for Public Leadership at the Harvard Kennedy School. He is renowned worldwide for his innovative work on the practice and teaching of leadership. Marty Linsky is a cofounder of CLA and has taught at the Kennedy School for more than twenty-five years. Alexander Grashow is a Senior Advisor to CLA, having previously held the position of CEO.

Leadership is a daunting subject for most developing leaders, but eventually all followers will be called upon to lead. Where do we start? What model or theory do we utilize? The choices become overwhelming for anyone attempting online searches. Everywhere you look are leadership books, programs, degrees, workshops, seminars, boot camps, and even mobile apps! Many organizations at Air University are utilizing the full range of leadership approach. Initially introduced by James MacGregor Burns in 1978 and Bernard Bass in 1985, these transformational and transactional leadership styles have sustained nearly four decades. Through (1) idealized transformational leader behaviors, one may raise the levels of his or her ethical and moral values while committing to "doing the right thing" for himself or herself and his or her followers: (2) by using inspirational motivation, leaders learn to articulate a vision to energize followers to accomplish more than they ever thought possible; (3) by intellectually stimulating followers, leaders will challenge followers to create and innovate as they reframe problems with renewed visions; and by providing individualized consideration, leaders may learn to incorporate each member's distinct gifts and talents as individual contributors to the organizational team. These transformational behaviors can offer connections to reaching (4) authentic transformational leadership by incorporating not only ethics and values but also, according to John Sosik, virtues and character strengths to refine one's leadership acumen, ameliorating leader-follower dynamics
