With the emphasis firmly on Richard's monarchy rather than on his personal life, Gillingham's history aims to explain why the Lionheart's reputation has

fluctuated more than that of any other monarch. The study places Richard in Europe, the Mediterranean and Palestine and demonstrates that few rulers had more enemies or more influence.

Fossil Forensics

Haynes Manuals N. America, Incorporated
In Fossil Forensics,

acclaimed Christian author and scientist Jerry Bergman examines the many claims about evolution in the fossil record and shows why they don't stand up to the evidence. The book includes photographs, diagrams, illustrations, and in-depth descriptions showing why the fossils give better evidence to creation instead of evolution.

**Internal Combustion
Engines** [Hamden,

Conn.] : Archon Books
This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the

introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO₂ emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements

in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Lord Brougham and the Whig Party

Marine Diesel Basics 1

This is a re-issue of the official factory manual and includes the following publications: MGF Workshop Manual - RCL 0051ENG (8th edition), 'K' Seroes Engine Overhaul Manual - RCL0057ENG (6th Edition), PG1 Manual Gearbox Overhaul Manual - RCL 0124 (2nd edition).

Covers all components and tasks in great detail for both minor and major repairs.

Engines covered: 1.6 MPi, 1.8 MPi, 1.8VVC.

Babel Golden Books

Currently, the modelling and control of mechatronic and robotic systems is an open and challenging field of investigation in both industry and

academia. The book encompasses the kinematic and dynamic modelling, analysis, design, and control of mechatronic and robotic systems, with the scope of improving their performance, as well as simulating and testing novel devices and control architectures. A broad range of disciplines and topics are included, such as robotic manipulation, mobile systems, cable-driven robots, wearable and rehabilitation devices, variable stiffness safety-oriented mechanisms, optimization of robot performance, and energy-saving systems.

Pat the Zoo (Pat the Bunny) Createspace Independent Publishing Platform

This Manual will cover the JCB Backhoe Loader - the iconic 'yellow' digger, variants of which have now been in production for over 50 years. The book will be produced with the full co-operation of JCB, who are likely to take approx 2,000 copies to use for promotional activity to celebrate the company's 70th anniversary in October 2015 (a year of celebrations is planned running until October 2016). JCB has an extensive archive from which material will be drawn for use in the book, and it is envisaged that the 'project vehicle' will be a 'classic' 1979 3C Backhoe Loader - revered by enthusiasts, and the machine that took JCB from leading British manufacturer to

a global player.

 CarTech Inc
 This book provides a wealth of detailed information that collectors, investors, and restorers of imported cars will not find in any other book. This massive volume spans the marques of imported vehicles. The list includes such familiar names as Alfa Romeo, Aston Martin, Bentley, Citroen, Jaguar, Lamborghini, Porsche, Rolls-Royce, Saab, and Volkswagen. Also in these pages, you'll find details on such lesser-known yet

no less intriguing marques as Abarth, DAF, Frazer Nash, Humber, Iso, Nardi, Panhard, Peerless, Sabra and Skoda. The book also highlights model changes and corporate histories and provides value information on the most popular models of imported cars.

Richard I Calder
Publications Limited
FOOD ETHICS, 2E
explores the ethical choices we make each time we eat. With twenty-six readings that bring together a diverse group of voices, this textbook dives into issues such as genetically modified foods, animal rights, population and consumption, the food industry's impact on pollution, centralized versus localized production, and more.

In addition, this edition includes new introduction, new readings, a comprehensive index, and study questions that frame these significant issues for discussion and reflection. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

A Bibliography and Reader's Guide to the First Editions of P. G. Wodehouse BP Books

In *How to Super Tune and Modify Holley Carburetors*, best selling author Vizard explains the science, the function, and most importantly, the tuning expertise required to get your Holley carburetor to perform its best for your

performance application.

Nero & Other Plays

Woodhead Publishing
 Author Vizard covers blending the bowls, basic porting procedures, as well as pocket porting, porting the intake runners, and many advanced procedures. Advanced procedures include unshrouding valves and developing the ideal port area and angle.

Aspen Publishers
 Primary experience, gained through the senses, is our most basic way of understanding reality and learning for ourselves. Our culture, however, favors the indirect knowledge gained from secondary experience, in which information is selected, modified, packaged, and presented to us by

others. In this controversial book, Edward S. Reed warns that secondhand experience has become so dominant in our technological workplaces, schools, and even homes that primary experience is endangered. Reed calls for a better balance between firsthand and secondhand experience, particularly in our social institutions. He contends that without opportunities to learn directly, we become less likely to think and feel for ourselves. Since the scientific revolution of the seventeenth century, Western epistemological tradition has rejected primary experience in favor of the abstractions of secondhand

experience. Building on James Gibson's concept of ecological psychology, Reed offers a spirited defense of the reality and significance of ordinary experience against both modernist and postmodernist critics. He expands on the radical critiques of work, education, and art begun by William Morris and John Dewey, offering an alternative

vision of meaningful learning that places greater emphasis on unmediated experience, and he outlines the psychological, cultural, and intellectual conditions that will be needed to foster that crucial change.
