One of the feature stories of the Cthulhu Mythos, "The Shadow Out of Time" is the tale of a professor of political economics that is thrown into a mind-shattering journey through time and space, while his body is held hostage by an alien mind. Horrified and panic-stricken by the implications of his experiences, he hopes against all reason and evidence that he has merely lost his mind.

Drawing on historical sources, myth and folklore, *Fantastic*

Creatures in Mythology and Folklore explores the roles of fantastical beasts - particularly the unicorn, the mermaid, and the dragon - in a series of thematic chapters organised according to their legendary dwelling place, be this land, sea, or air. Through this original approach, Juliette Wood provides the first study of mythical beasts in history from the medieval period to the present day, providing new insights into the ways these creatures continue to define our constantly changing relationship to both real and imagined worlds. It places particular emphasis on the role of the internet, computer games, and the cyberspace community, and in doing so, demonstrates that the core medieval myth surrounding these creatures remains static within the ever-increasing arena of mass marketing and the internet. This is a vital resource for undergraduates studying fantastic creatures in history, literature and media studies.

The #1 New York Times and Wall Street Journal bestseller, named one of the best books of the year by The Boston Globe and National Geographic: acclaimed journalist Douglas Preston takes readers on a true adventure deep into the Honduran rainforest in this riveting narrative about the discovery of a lost civilization -- culminating in a stunning medical mystery. Since the days of conquistador Hernán Cortés, rumors have circulated about a lost city of immense wealth hidden somewhere in the Honduran interior, called the White City or the Lost City of the Monkey God. Indigenous tribes speak of ancestors who fled there to escape the

Spanish invaders, and they warn that anyone who enters this sacred city will fall ill and die. In 1940, swashbuckling journalist Theodore Morde returned from the rainforest with hundreds of artifacts and an electrifying story of having found the Lost City of the Monkey God—but then committed suicide without revealing its location. Three quarters of a century later, bestselling author Doug Preston joined a team of scientists on a groundbreaking new quest. In 2012 he climbed aboard a rickety, single-engine plane carrying the machine that would change everything: lidar, a highly advanced, classified technology that could map the terrain under the densest rainforest canopy. In an unexplored valley ringed by steep mountains, that flight revealed the unmistakable image of a sprawling metropolis, tantalizing evidence of not just an undiscovered city but an enigmatic, lost civilization. Venturing into this raw, treacherous, but breathtakingly beautiful wilderness to confirm the discovery, Preston and the team battled torrential rains, quickmud, disease-carrying insects, jaguars, and deadly snakes. But it wasn't until they returned that tragedy struck: Preston and others found they had contracted in the ruins a horrifying, sometimes lethal and incurable disease. Suspenseful and shocking, filled with colorful history, hair-raising adventure, and dramatic twists of fortune, **THE LOST CITY OF THE MONKEY GOD** is the absolutely true, eyewitness account of one of the great discoveries of the twenty-first century.

We hear routinely about dinosaurs unearthed in the Gobi Desert, about new marsupials found in the forests of Madagascar, about

darling deep sea squid in the polar regions. These discoveries tend to be accompanied by wondrous feats of adventuring scientists. But just as one can experience the world in a backyard, or farther reaches of the world with a good book and a comfy armchair, scientists themselves know that the natural history museums of the world contain some of the best terrain for discovering new species. In recent years scientists have found in museum drawers and cabinets a new rove beetle collected by Darwin, a tiny lungless salamander thinner than a matchstick, a monkey from the Brazilian rainforest, and a 40 million year old beardog. The Lost Species shares the thrill of spelunking in museum basements, digging in museum trays, and breathing new life in taxidermied beings—a in a days' adventure for the scientists in this book. These discoveries help tell the story of life, and the priceless collections of natural history museums.

What made Athena furious with a local weaver that she transformed her into Greek mythology's first spider woman, Arachne? What is the tall tale behind Filipino folklore's sea serpent Bakunawa, who flies through the night skies devouring moons? What is the symbolism behind French folktale's infamous night rider, Cheval Mallet? We have all been exposed to a mythological beast in one form or another. Whether it is the three headed guard dog Fluffy in J.K. Rowling's Harry Potter series, or even the story of Smaug in J.R.R. Tolkien's Middle Earth in *The Hobbit*; all these pop culture mythical creatures have a deep connection to the mythologies and folktales of ancient cultures. Where did they come from? What relevance do they serve in mythology? Why are some so obscure, while others become pop-culture enigmas? Get the answer to these questions, and learn about beasts from different world cultures. Folklorist Zayden Stone dives deep into the stories of these magical beasts and provides a fictional anecdote, a retelling of the original myths, an analysis of the symbolism and relevance of the creatures, and then pairs it with some beautiful black and white illustrations reimagined by artist Herdian. In the *Mythical Creatures and Mythological Beasts* book, the illustrated guide takes you through six themes that have been specifically chosen since they are consistent across cultures. The categories include: arthropods for insects, crustaceans, and arachnids; avian for birds; canines for wolves and dogs; serpents for snakes and dragons; ungulates for hooved animals like horses and cows; and aquatic for water

dwelling beasts. Presenting the creatures in categories makes it easier to see what the beasts have in common. You will find some overlapping themes across ancient cultures that point to universal ideas in how humans perceive the world. If you wonder where your favorite creature is, you will probably find them within these pages, even if they do not have their own chapter. For example, the ever-popular Pegasus can be found in the tale of the Gorgon sisters. He also had a half-brother, Arion, who features in the ungulates section. There is also a brilliant white-winged horse from Islamic tradition which may sound very familiar to Pegasus as well. If you have a love for the myths and want to learn about the unique beasts that dwell within them, this book is a great way to do it. Not only will you learn about ones you may have never heard of, but you will also be able to draw parallels between cultures and see how they interpreted their surroundings through stories of mythical creatures and magical beasts.

“A novelistic mosaic that simultaneously reads like a thriller and like a strange, dreamlike excursion into the subconscious.” —The New York Times Years ago, when *House of Leaves* was first being passed around, it was nothing more than a badly bundled heap of paper, parts of which would occasionally surface on the Internet. No one could have anticipated the small but devoted following

this terrifying story would soon command. Starting with an odd assortment of marginalized youth -- musicians, tattoo artists, programmers, strippers, environmentalists, and adrenaline junkies -- the book eventually made its way into the hands of older generations, who not only found themselves in those strangely arranged pages but also discovered a way back into the lives of their estranged children. Now this astonishing novel is made available in book form, complete with the original colored words, vertical footnotes, and second and third appendices. The story remains unchanged, focusing on a young family that moves into a small home on Ash Tree Lane where they discover something is terribly wrong: their house is bigger on the inside than it is on the outside. Of course, neither Pulitzer Prize-winning photojournalist Will Navidson nor his companion Karen Green was prepared to face the consequences of that impossibility, until the day their two little children wandered off and their voices eerily began to return another story -- of creature darkness, of an ever-growing abyss behind a closet door, and of that unholy growl which soon enough would tear through their walls and consume all their dreams.
