**The Personnel and Guidance Journal** BoD – Books on Demand  
A Brookings Institution Press and Russell Sage Foundation publication Education is one of the largest sectors of the U.S. economy--yet scholars, educators, policymakers, and parents do not agree about what the money spent on education really buys. In particular, they do not agree on how much education improves children's ability to learn or whether the things children learn in school truly improve their chances for success as adults. If schooling increases how much students know and what they

know does pay off later, then it is important to ask what schools can do to increase students' learning and earning. The essays in this book report estimates of the effects of learning on earnings and other life outcomes. They also examine whether particular aspects of schooling--such as the age at which children begin school, classroom size, and curriculum--or structural reform--such as national or statewide examinations or school choice--affect learning. Taken together, their findings suggest that liberals are correct in saying that more investment is needed in early education, that class sizes should be further reduced, and that challenging national or state standards should be established. But they also provide support for conservatives who ask for a more demanding curriculum and greater school choice.

Contributors include John Bishop, Eric Hanushek, James Heckman, Christopher Jencks, Caroline Minter Hoxby, Fred Mosteller, and Christopher Winship.

From June 22 to June 24, 2021, Hasso Plattner Institute, Potsdam, hosted the seventh European MOOC Stakeholder Summit (EMOOCs 2021) together with the eighth ACM Learning@Scale Conference. Due to the COVID-19 situation, the conference was held fully online. The boost in digital education worldwide as a result of the pandemic was also one of the main topics of this year's EMOOCs. All institutions of learning have been forced to transform and redesign their educational methods, moving from traditional models to hybrid or completely online models at scale. The learnings, derived from practical experience and research, have been explored in EMOOCs 2021 in six tracks and additional workshops, covering various aspects of this field. In this publication, we present papers from the conference's Experience Track, the Policy Track, the Business Track, the International Track, and the Workshops.

Empowering Midwives and Obstetric Nurses is a practical approach to understanding the health of women and newborns. It supports learning and prepares readers for the challenges faced in contemporary midwifery healthcare. Written by experts in the field, this book provides an overview, highlights important

features, and brings to light certain contemporary issues pertaining to the science and art of midwifery.

Transcultural Research in Mental Health Handbook of Reagents for Organ

Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

*Leadership and Management of Quality in Higher Education* Abrams

This book is a comprehensive survey of all aspects and dimensions of higher education in Africa.

*Language and Literature for Communication in Human Societies* University of Hawaii Press

Clinical Sports Nutrition 5e is a cornerstone of the Sports Medicine series offered by McGraw-Hill. This complete practical and clinical reference provides the latest sports nutrition information, drawing on scientific research from around the globe. All chapters have been substantially revised and updated with contributions from leading academics, physicians and sports

dietitians in Australia, Canada, the United States and the United Kingdom. In addition there are seven new commentaries: · A molecular view of exercise · Female athlete triad and energy availability · Measuring energy availability · Treating low energy availability · Vegetarian eating · Antioxidant supplementation and exercise · Fluid guidelines This respected reference work is an invaluable asset for students and instructors in the discipline of sports nutrition, and is also essential reading for elite athletes, sports professionals and trainers who need to keep their knowledge current.

**The Quantity Surveyor's Bible** World Bank Publications

The Forest Dames is a novel based on war experiences that must be told in order to free the mind, disseminate information and prick the conscience of war agitators. It is a true life story fictionalised to reduce impact. The book tells the story of a young girl who lived with her parents in the relatively calm and peaceful British colony of Nigeria, where shortly after independence compatriots went for each other's throats. This soon exploded into a full blown civil war and from that time onwards, nothing was ever the same again. The war came with ugly incidences, one of which was the hunt for and abduction of girls and women to be forcibly converted to bed mates. Families sought hiding places for their 'eligible' females but these hide-outs were soon discovered through the power of and intimidation from the gun. Two women however decided that their daughters will never be made victims. They found a 'safe haven' for their daughters the evil forest where the roars of wild animals were continually heard. But this is nothing compared to the brutal termination of lives and wanton destruction of properties through air, land and

marine attacks; including starvation that was the order of the day, and which placed the final death mark on the people. The forest dames, four in number, survived the war and one of them decides to tell the unfortunate story of the elasticity of human suffering. All four dames are still alive and can be reached for further interactions. One of the brave mothers is also still living. TO FIND OUT MORE, READ BOOK!!!

**Tears of a Bride** McGraw-Hill Education Australia

The papers in this volume were selected from the Silver Jubilee edition of the Annual Conference of the Linguistic Association of Nigerian (LAN) which was held at the Nigerian Educational Research and Development Council (NERDC), Abuja, Nigeria. The Silver Jubilee edition is dedicated to the father of Nigerian Linguistics, Professor Emeritus Ayo Bamgbose. Professor Emeritus Bamgbose was the first indigenous Professor of Linguistics in Nigeria, and the first black African to teach linguistics in any known university south of the Sahara. He was there from the very beginning, and together with co-operation of people such as the late Professor Kay Williamson, he nurtured Nigerian linguistics. He is not just a foremost Nigerian linguist, but also a most famous, respected, celebrated, distinguished, and cherished African linguist of all times. To be candid, Nigerian linguistics is synonymous with Professor Emeritus Bamgbose. In 58 well-written chapters by experts in their fields, the book covers aspects of Nigerian languages, linguistics, literatures and culture. The papers have not been categorized into sections; rather they flow, hence there is some overlapping in the arrangement. The book is an essential resource for all who are interested to learn about current trends in the study of languages, linguistics and

related subject-matters in Nigeria.

**The Forest Dames** Elsevier

The purpose of this monograph is to introduce the Occupational Performance Model (OPM) (Australia) in its current stage of development. The structure of the model is viewed as an alternate representation of contemporary ideas about occupational performance.

This book provides a range of case studies concerning the leadership and management of quality development in higher education. It captures the experiences of senior administrators and managers to the complexity of problems that quality development involves. The authors draw attention to the human-centred approach to quality, as they argue that in any activity there is a need to take account of human values and attitudes. Experiences from experts in the field Guide to resources that are utilized in the higher education industry Auditors' perceptions Occupational Performance Model (Australia) Springer

This book explores the theoretical foundations of gamification in learning and education. It has become increasingly difficult to engage and motivate students. Gamification not only makes learning interesting, but also allows game players to solve problems and learn lessons through repeated attempts and failures. This "positive failure" can motivate students to attempt a difficult mission. Chapters in this volume cover topics such as the definition and characteristics of gamification, gamification in learning and education, theories, research on gamification, framework, strategy, and cases.

*A Kannada-English Dictionary* M & J Grand Orbit Communications

Case studies presented by international experts assess the worldwide impact of land transformation on ecosystems, analyzing and evaluating problems created by various forms of land use (agricultural, sewerage, landscaping, mining, etc.). Also explores land reclamation and areas in which further research is needed.

Career Development and Systems Theory: Connecting Theory and Practice offers practitioners, researchers and students a comprehensive introduction to, and overview of, career theory; introduces the Systems Theory Framework of career development; and demonstrates its considerable contemporary and innovative application to practice. A number of authors have identified the framework as one of a small number of significant innovations in the career development literature. The Systems Theory Framework of career development was developed to provide coherence to the career development field by providing a comprehensive conceptualisation of the many existing theories and concepts relevant to understanding career development. It is not designed to be a theory of career development; rather systems theory is introduced as the basis for an overarching, or metatheoretical, framework within which all concepts of career development, described in the plethora of career theories, can be usefully positioned and utilised in both theory and practice. It has been applied to the career development of children, adolescents and women. Since its first publication, the Systems Theory Framework has been the basis of numerous publications focusing on theoretical application and integration, practice and research, with a growing number of these by authors other than the

framework developers. Its application across cultures also has been emphasised. The theoretical and practical unity of the Systems Theory Framework makes this book a worthy addition to the professional libraries of practitioners, researchers and students, new to, or experienced in, the field of career development.

Lonely Days Springer

The Yoruba people of Nigeria and Benin, over 15 million strong, are heirs to one of the oldest and greatest artistic traditions in West Africa. This text offers a look at Yoruba civilization. Over 200 photographs illustrate rarely seen objects from museums and private collections.

Oxidizing and Reducing Agents S. D. Burke University of Wisconsin at Madison, USA R. L. Danheiser Massachusetts Institute of Technology, Cambridge, USA Recognising the critical need for bringing a handy reference work that deals with the most popular reagents in synthesis to the laboratory of practising

organic chemists, the Editors of the acclaimed Encyclopedia of Reagents for Organic Synthesis (EROS) have selected the most important and useful reagents employed in contemporary organic synthesis. Handbook of Reagents for Organic Synthesis: Oxidizing and Reducing Agents, provides the synthetic chemist with a convenient compendium of information concentrating on the most important and frequently employed reagents for the oxidation and reduction of organic compounds, extracted and updated from EROS. The inclusion of a bibliography of reviews and monographs, a compilation of Organic Syntheses procedures with tested experimental details and references to oxidizing and reducing agents will ensure that this handbook is both comprehensive and convenient.
