Rethinking Economics Starting from the Commons John Wiley & Sons

This volume proposes a reconsideration of ecological and environmental aspects of the work and ideas of various heterodox authors and traditions in the history of economic thought, including the field of economic development. Many of the contributors to this book focus on thinkers and works which are not typically considered as part of the ecological sphere, while others consider such economists in a new light or domain. Thus, the book elucidates a new and useful research field of reconsidering ecological dimensions in the traditional history of economic thought as well as helping to delineate alternative views for ongoing debates on ecological themes. Did Veblen, Keynes, Sraffa, C. Furtado and other key economists and schools of thought of our age have relevant and useful insights with respect to environmental issues? Which aspects of their intellectual legacies should eventually be discarded in the face of our new environmental challenges? On the contrary, what aspects of their economic theories can be updated and adapted to a better interpretation of our present ecological concerns? How do they differ, and why? The essays contained in this book will help to answer these questions, by means of recovering, analysing and updating the work of some of the most relevant heterodox economists and schools of thought of our time. This book will be of great interest for readers in the history of economic thought, ecological economics, environmental economics and economic development.

A History of Masculinity International Monetary Fund

Finance & Development, September 2019

Bilingual Dictionary of Terms Springer Nature

This book examines security cooperation between Western states. Security cooperation occurs between Western (i.e. European and North American) states as a coping mechanism, as an imperfect substitute for integration. The book investigates the reasons for

cooperation, what Aristotle called the 'final cause', as well as the material, formal, and efficient causes of cooperation. Such a causal explanation is based on a Critical Realist philosophy of social science. The book is also based on an embedded multiple-case study; the states studied are the United States, France, and Luxembourg. Within each state, the embedded subcases are three types of state security organizations: the armed forces, law enforcement, and intelligence agencies, which have rarely been compared in this way. Comparing different types of states and different types of state security organizations has allowed temporal, spatial, national, and functional variation in cooperation to be identified and theorized. The empirical evidence studied includes participant observations at the North Atlantic Treaty Organization and documents such as state policy documents, annual reports by organizations, reports by parliaments and non-governmental organizations, autobiographies, books by investigative journalists, and articles by newspapers and magazines. The book is also based on a score of elite interviews with ambassadors, diplomatic liaisons, ministerial advisors, foreign ministry officials, and military commanders. This book will be of much interest to students of security studies, intelligence studies, military studies and International Relations in general. *Français langue étrangère. Le FLE côté Pro ! 'Exhilarating . . . a work of scholarship, but also inspiration. . . Go and read Jablonka and change the world' Christina Patterson, Sunday Times 'An unexpected bestseller in France. . . it has sparked conversations' Challenges A highly acclaimed, bestselling work from one of France's preeminent historians What does it mean to be a good man? To be a good father, or a good partner? A good brother, or a good friend? In this insightful analysis, social historian Ivan Jablonka offers a re-examination of the patriarchy and its impact on men. Ranging widely across cultures, from Mesopotamia to Confucianism to Christianity to the revolutions of the eighteenth century, Jablonka uncovers the origins of our patriarchal societies. He then offers an updated model of masculinity based on a theory of gender justice which aims for a redistribution of gender, just as social justice demands the

redistribution of wealth. Arguing that it is high time for men to be as involved in gender justice as women, Jablonka shows that in order to build a more equal and respectful society, we must gain a deeper understanding of the structure of patriarchy - and reframe the conversation so that men define themselves by the rights of women. Widely acclaimed in France, this is an important work from a major thinker.

Le petit Finance ADJURIS - International Academic Publisher Repère indispensable à tout étudiant ou professionnel confronté à la gestion financière, cet ouvrage en récapitule de façon pratique et synthétique les informations et données fondamentales. Sa présentation en 20 fiches comportant de nombreux tableaux et schémas permet un repérage facile et une compréhension immédiate.

Le petit Finance Éditions Jouvence

Brexit has irrevocably transformed British politics, yet its effects are not confined to relations between the UK and the EU. Venturing beyond the already vast literature on Brexit, this dynamic Handbook explores the implications of the UK's withdrawal from the EU for the EU itself, single countries within and beyond Europe, and the international system, as well as different social groups, generations, and territories within the UK. *Process Engineering Renewal 3* John Benjamins Publishing Company

Cet ouvrage s'adresse à toute personne ayant déjà un niveau intermédiaire en français langue étrangère mais souhaitant être plus à l'aise pour mieux comprendre et s'exprimer en français dans son milieu professionnel. Il permet de façon systématique via des thématiques actuelles liées au monde de l'entreprise, des situations du quotidien et des documents concrets : - de travailler à la fois la compréhension et la production écrite - d'améliorer ses connaissances lexicales - de renforcer son niveau en grammaire Les plus : - deux fichiers audio à télécharger gratuitement sur le site des éditions Ellipses - Site internet de l'auteur permettant d'accéder à davantage de ressources

The Suspended Disaster Columbia University Press

'The Commons' explores the many forms of development being championed by Africa's residents, users, and citizens. In addition

to managing property and shared tangible and intangible resources collectively, communities are experimenting with a concept of 'commoning' founded on values such as community, engagement, reciprocity, and trust. In practice, their approach takes the form of land-based commons, housing cooperatives, hybrid cultural spaces or places for innovation, and collaborative digital platforms. The purpose of this book, where observation of historical and recent practices converges with new theories within commons scholarship, is not to promote commons themselves. Rather, it examines the tensions, drivers of change, and opportunities that surround commons dynamics in Africa. This book highlights the abundance of commons-based entrepreneurial processes in Sub-Saharan Africa and shows that partnerships between African public authorities and communities involved in the commons can be powerful drivers of sustainable development for the continent.

La lutte contre le terrorisme : ses acquis et ses défis / The fight against terrorism: achievements and challenges Oxford University Press

This volume contains the scientific papers presented at the Tenth International Conference „Perspectives of Business Law in the Third Millennium” that was held on 8 November 2019 in online format on Zoom. The conference is organized each year by the Faculty of Law of the Bucharest University of Economic Studies together with the Society of Juridical and Administrative Sciences. The scientific studies included in this volume are grouped into five chapters: Commercial law; Labor law; Criminal law; European and international law. The present volume is addressed to practitioners, researchers, students and PhD candidates in juridical sciences, who are interested in recent developments and prospects for development in the field of business law at international and national level.

Youth Squad Dunod

Les défis associés à l'impact environnemental des énergies renouvelables sont redoutables et multiples, tant l'exploitation de formes d'énergie diffuses va nécessiter de remodeler nos modes de vie et nos infrastructures. Réduire leur impact environnemental est un impératif qui nécessite de mobiliser l'ensemble des leviers d'action disponibles. Au-delà de l'analyse de ces défis, cet ouvrage présente un panorama des leviers d'action qui devraient permettre de les relever, en croisant les

champs des sciences humaines, des géosciences et de l'ingénierie. Les leviers d'action examinés sont multiples : à la fois techniques (par substitution ou appel à des low tech) et économiques et sociaux (par développement du recyclage ou découplage). L'ouvrage traite également de la question de leur efficacité et de leur impact global.

L'économie des ressources minérales et le défi de la soutenabilité
2 Gilad James Mystery School

Akademische Arbeit aus dem Jahr 2019 im Fachbereich BWL - Investition und Finanzierung, Universität de Parakou, Sprache: Deutsch, Abstract: Le texte présente l'institution de microfinance et productivité agricole dans la région du nord Bénin. Dans les pays de l'Afrique subsaharienne notamment ceux de l'UEMOA, l'agriculture est essentiellement pluviale. Cette dépendance de la pluie expose les productions agricoles aux effets du changement climatique avec des conséquences de sécheresse, d'inondations, la dégradation des ressources naturelles et de la fertilité des sols, l'accès aux facteurs de production. Alors, la problématique de développement qui fonde les Orientations Stratégiques de Développement (OSD), met l'accent sur l'accélération de la croissance économique du Bénin qui repose en priorité sur la promotion du secteur agricole. Ainsi, les petites exploitations agricoles ont besoin de s'intensifier, de se moderniser et d'adopter les innovations techniques, organisationnelles et des technologies pour améliorer leurs revenus agricoles. L'application de ces innovations et nouvelles technologies requiert de financement adapté. Or, la seule capacité d'autofinancement des petites exploitations agricoles ne suffit pas à financer cette modernisation car les revenus obtenus sont substantiels (destiné à la survie familiale).

Herminie and Fanny Pereire BRILL

Headline: The Globe and Mail: Legal challenge halts Canadian, U.S. and U.K. release of book critical of Chinese Communist Party by Robert Fife That said it all. The hands of the Chinese Communist Party were going on the offence. The 48 Group Club a China friendly group of former UK ambassadors and Prime Ministers were embarrassed by their connections to a Club founded by key members of the Chinese Communist Party of Britain who's chair Stephen Perry suggested that China's approach to world order and rule was superior to democracy and the UK should embrace them. Asked if he believed the lawsuit

was an effort by the Chinese government to stop the publication of his book, Mr. Hamilton said: "I have no evidence of that, although it should be noted that the Chinese government has used lawfare in the past." Lawfare is the use of legal action as part of a campaign against a target. Governments around the world are in the early stages of a repositioning of power, as China rises and the United States is drawn into direct competition. However, some are beginning to wonder whether, for all of the economic benefits, engaging with China carries unseen dangers. The Chinese Communist Party is now determined to reshape the world in its image. The party is not interested in democracy. It divides the world into those who can be won over and enemies. They have already lured many leaders to their corner; others are weighing up a devil's bargain. Through its exercise of 'sharp power,' the party is weakening global institutions, aggressively targeting individual corporations, and threatening freedom of expression from the arts to academia. At the same time, security services are increasingly worried about incursions into our communications infrastructure. Indeed, the vaunted Great Firewall is a temporary measure, only necessary until the party has transformed the global conversation. In December 2019, the CCP's obsession with social control led it to suppress expert warnings about the coronavirus outbreak in Wuhan. Most alarming for the West was the active collaboration of the WHO in spreading the CCP's version of events. It was a shocking example of the widespread co-optation of global institutions by the CCP, as described in Hidden Hand. As soon as Beijing thought it had the virus under control, it began a global propaganda blitz, presenting China's authoritarian system as a model for the rest of the world. Western media and pundits soon began echoing the Party line. Hidden Hand is a detailed and devastating expose of Chinese Communist Party influence in the West, including Canada. It could not arrive at a better time in Canada, with relations between Ottawa and Beijing reaching breaking point after two years of mounting tension. China's bullying behaviour, and the mobilising of people loyal to the Chinese Communist Party on the streets of Canada's cities, has caused deep disquiet among Canadians. But the government seems paralyzed. Hidden Hand shows how Canada's political, business, academic and cultural elites have over many years been co-opted by the Chinese Communist Party and its agencies. They are confused about what is in Canada's

national interests and frequently do Beijing's bidding. *Hidden Hand* shows how the Chinese Communist Party represents a profound threat to Western democracy. It's vital reading for Canadians who want to understand what is really happening, and points to a way of carving out a new diplomatic course with China. But the question remains: Does the government have the will to stand up to Beijing and its proxies in Canada or is it too late?

Les Petits Macarons ADJURIS – International Academic Publisher
Herminie and Fanny Pereire were sisters-in-law, married to the eminent Jewish bankers and Saint-Simonian socialists Emile and Isaac. They were also mother and daughter. This book, a companion to the author's acclaimed *Emile and Isaac Pereire* (2015), sheds new light on elite Jewish families in nineteenth-century France. Drawing on the family archives, it traces the Pereires across a century of major social and political change, from the Napoleonic period to the cusp of the First World War, revealing the active role they played as bourgeois women both within and outside the family. It offers insights into Jewish assimilation, embourgeoisement and gender relations, through the lens of one of the most fascinating families of the century.

This book proposes a new approach to economics, starting from the commons and based on the Economy of Francesco (EoF), a worldwide movement of young people who aim to change the current economic models and working towards a fair, sustainable, and inclusive economic system. EoF was convened by Pope Francis and is inspired by the example of St. Francis of Assisi, featuring Franciscan economic roots and institutions, as well as theories of the social sciences. The authors raise and answer several important questions throughout the volume, such as: What if the economic courses taught in the universities across the globe focused their attention on the topics of the commons rather than on private goods? What if social businesses, rather than being considered as a hybrid form of businesses, became the normal approach, and ethical and green finance ruled over the standard financial sector? Is it possible to move away from the primacy of the consumers to the preeminence of ethical consumers who express their preferences for an inclusive, sustainable, and workers-friendly economic system with their daily choices? Using a unique approach, the book includes the contributions of prominent scholars which are integrated and

discussed by young international scholars, providing a fresh analysis with a glance of hope for the future. The book is a must-read for students, scholars, and researchers of economics and related disciplines interested in alternatives to the current economic mainstream in general, and the Economy of Francesco in particular.

Banking Law in the 21st Century Edward Elgar Publishing
After Algeria's president Abdelaziz Bouteflika announced his intention to run for a fifth term in early 2019, a popular peaceful uprising erupted calling for change. Bouteflika, who had been in office since 1999, was eventually forced to resign, but the Hirak ("movement") continued to protest the country's inequalities and entrenched ruling elite. *The Suspended Disaster* examines the dynamics of the Algerian political system, offering new insights into the last years of Bouteflika's rule and the factors that shaped the emergence of an unexpected social movement. Thomas Serres argues that the Algerian ruling coalition developed a mode of government based on the management of a seemingly never-ending crisis, marked by an obsession with security and the ever-present possibility of unrest, violence, and economic collapse. Identifying this form of rule as "governance by catastrophization," he shows how attempts to preserve the status quo through emergency policies and constant reforms can also lay the groundwork for a revolutionary situation. Serres contrasts the government's portrayal of perpetually imminent disaster with the uncertainty, precarity, and indignity experienced by much of the population, which fueled the rejection of ruling elites, a profound mistrust toward institutions, and new spaces for grassroots opposition. Based on extensive fieldwork and theoretically novel, *The Suspended Disaster* sheds new light on the political, economic, and social processes underlying an uprising that changed the face of Algerian politics.

Hidden Hand Oxford University Press
In *Public Health Systems in the Age of Financialization*, Ana Carolina Cordilha unpacks policy shifts that have transformed public health systems into vehicles for financial speculation and capital accumulation. While it is commonly thought that these systems are being cut back in the period of financialization, the author shows that current changes in public health financing go far beyond budget cuts and privatization measures. She examines how public health systems are adopting financial instruments and

participating in financial accumulation strategies, with harmful impacts on transparency, democratic accountability, and health service provision. With an in-depth study of both the French and Brazilian systems, Cordilha explores the different ways in which this process unfolds in central and peripheral countries.

Government Finance Statistics Manual 2014 Taylor & Francis
Through an examination of the work of great scholars from fields including philosophy, literature, philology, semiology, quantum physics, history, and anthropology, this book argues that building on the contribution of non-economists can open new areas of reflection in economics beyond the usual schools of thought. The purpose of the book is twofold. First, it offers a critique and discussion of the limits of contemporary economic discourse, both mainstream and self-styled alternative theories. The central theme on which the book is built is that the discipline of economics fails to examine the nature of social reality in a systematic way. This prompts the economists to become fully aware of the methodology on which they base their representation, analysis, and argumentation in a way that economists currently are not. Second, the book proposes alternative ways of thinking that can help readers of economics to overcome the current limitations of their discipline. This means going beyond various dominant dualities – orthodox/heterodox, micro/ macro, epistemology/ontology – because it is not a question of doing 'the economy' differently, but of overcoming the economy as a representation of the world that strives to submit everything to its realm. Thus, the book does not simply propose a broader conceptual framework than that portrayed by mainstream economists or those who propose an alternative approach but raises questions that do not usually come from the minds of economists at all. The book will be of particular interest to readers of economic methodology and pluralism, philosophers of science, and other social scientists interested in methodological issues.

Le petit finance Manchester University Press
A General History of Horology describes instruments used for the finding and measurement of time from Antiquity to the 21st century. In geographical scope it ranges from East Asia to the Americas. The instruments described are set in their technical

and social contexts, and there is also discussion of the literature, the historiography and the collecting of the subject. The book features the use of case studies to represent larger topics that cannot be completely covered in a single book. The international body of authors have endeavoured to offer a fully world-wide survey accessible to students, historians, collectors, and the general reader, based on a firm understanding of the technical basis of the subject. At the same time as the work offers a synthesis of current knowledge of the subject, it also incorporates

the results of some fundamental, new and original research.

Comparative Multidisciplinary Perspectives on Omnibus Legislation International Monetary Fund

Process engineering emerged at the beginning of the 20th Century and has become an essential scientific discipline for the matter and energy processing industries. Its success is incontrovertible, with the exponential increase in techniques and innovations. Rapid advances in new technologies such as artificial

intelligence, as well as current societal needs sustainable development, climate change, renewable energy, the environment are developments that must be taken into account in industrial renewal. Process Engineering Renewal 3 presents a prospective analysis that demonstrates the significant disruptions linked to sustainable development, global warming, etc. These constraints may trigger changes in the social regulation system, which in turn applies pressure on actors of process engineering to evolve and adapt to these developments.
