FORD FINN

Nature's Nightmare Penguin Group

As little as a decade ago, radicals were regarded as interesting reactive intermediates with little synthetic use. However, recent results show that radicals have an enormous potential for applications in stereoselective reactions - it's all a matter of knowing what method to use and how to apply it. Three world experts in the field have combined their expertise and present the concepts to understand and even to predict the course of stereoselective radical reactions. In addition, guidelines are established which will enable the readers to plan and carry out their own stereoselective syntheses with radicals. A comprehensive list of references provides an easy access to the primary literature. The Stereochemistry of Radical Reactions is a highly topical introduction to this burgeoning field of research. Both advanced students and researchers active in the field will welcome this book as a source of concepts and ideas.

The Unlikely Hero of Room 13B S. Karger AG (Switzerland)
This volume presents a unique compilation of reviews on cell volume regulation in health and disease, with contributions from leading experts in the field. The topics covered include mechanisms and signaling of cell volume regulation and the effect of cell volume on cell function, with special emphasis on ion channels and transporters, kinases and gene expression. Several chapters elaborate on how cell volume regulatory mechanisms participate in the regulation of epithelial transport, urinary concentration, metabolism, migration, cell proliferation and apoptosis. Last but not least, this publication is an excellent guide to the role of cell volume in the pathophysiology of hypercatabolism, diabetes mellitus, brain edema, hemoglobinopathies, tumor growth and metastasis, to name just a few. Providing deeper insights into an exciting area of research which is also of clinical relevance, this publication is a valuable addition to the library of those interested in cell volume regulation.

The Islamic Conception of Justice Vireo Book, A

An award-winning and extraordinary story of a boy who protects a baby whale that locals believe is threatening their livelihood.

Winner of the Margaret Mahy Book of the Year New Zealand Book Awards for Children and Young Adults 2015 Young Adult Category Winner New Zealand Book Awards for Children and Young Adults 2015 Storylines Notable Young Adult Fiction Award 2015 Will Jackson is hiding out, a city boy reluctantly staying with his uncle in small town New Zealand while he struggles to recover from a brutal attack and the aftermath of a humiliating YouTube clip gone viral. After he discovers a young abandoned orca whale his life is further thrown into chaos, when he rallies to help protect it against hostile, threatening interests. This threatens to tear apart the small fishing community and forever changes Will's life. The boy and the whale develop a special bond, linked by Will's love of singing. With echoes of classic book and film *The Whalerider* this powerful connection is utterly convincing on the page. An exciting plot-driven story full of drama, tension and romance, this magical book captures both heart and mind to hold the reader enthralled from start to finish. These qualities, along with its lyrical use of language and its compelling and persuasive exploration of many global concerns, makes this a beautifully touching, rich and multi-layered story by an award-winning writer for young adults. *Singing Home the Whale* will appeal to all readers of high-quality New Zealand fiction.

Inside V Thieme

Quantum mechanics can describe the detailed structure and behavior of matter, from electrons, atoms, and molecules, to the whole universe. It is one of the fields of knowledge that yield extraordinary precessions, limited only by the computational resources available. Among these methods is density functional theory (DFT), which permits one to solve the equations of quantum mechanics more efficiently than with any related method. The present volume represents the most comprehensive summary currently available in density functional theory and its applications in chemistry from atomic physics to molecular dynamics. DFT is currently being used by more than fifty percent of computational chemists.

9th European Conference on Thermoelectrics: ECT2011 Springer Science & Business Media

This book is an up-to-date, comprehensive review of the neuropsychiatry of different types of cognitive impairment by active authorities in the field. There is an emphasis on diagnostic and management issues. Cognitive impairment both with and without criteria for dementia is covered. A critical appraisal of the methodological aspects and limitations of the current research on the neuropsychiatry of cognitive impairment and dementia is included. Unanswered questions and controversies are addressed. Non-pharmacological and pharmacological aspects of management are discussed, to provide robust information on drug dosages, side effects and interaction, in order to enable the reader to manage these patients more safely. Illustrative cases provide real life scenarios that are clinically relevant and engaging to read. *Neuropsychiatric Symptoms of Cognitive Impairment and Dementia* is aimed at neurologists, psychiatrists, gerontologists, and general physicians. It will also be of interest to intensive care doctors, psychologists and neuropsychologists, research and specialist nurses, clinical researchers and methodologists.

Heroes of the Argonne JHU Press

Katie likes to believe she's invisible. It seems so much safer than being exposed as who she is: shy, poor, and vulnerable. So getting up in front of audience as the lead in her school's production of *The Taming of the Shrew* should be complete torture. But as Katie tells it, something totally unexpected happened when she stepped on stage: "My head exploded. I loved it. Acting hit me like a sucker punch and I loved, loved, loved it! Invisible Katie became visible Katherina." Evan is, as they say, another story. He knows just what it takes to get noticed, and he uses every one of the skills he's perfected from years of being the new kid at yet another new school. Rich, smart, and ridiculously charming, he's like nothing and no one Katie has ever encountered. How then could someone like him possibly be interested in someone like her? But before she knows it they are inseparable. Over the dizzying course of their relationship, Katie must confront the fact that the power of love can conceal darker

truths.

Beyond the Blue Border Elsevier

Dust storms are a vital component of the environment. This book explores and summarises recent research on where dust storms originate, why dust storms are generated, where dust is transported and deposited, the nature of dust deposits and the changing frequency of dust storms over a range of time-scales. It is the first global study of causes and effects of dust storms, which are one of the increasing nature catastrophes.

Neuropsychiatric Symptoms of Cognitive Impairment and Dementia Academic Press

Hanna and Andreas will do anything to leave oppressive East Germany behind. There's one escape route open to them, but can they survive it? Hanna and Andreas have always been friends. When they're expelled from school for activism directly challenging the socialist state in East Germany, they end up doing factory work. But what kind of life do they have to look forward to without education or opportunity? Especially when they aren't allowed a voice? The choice to risk imprisonment or death by escaping to the democratic West seems like a risk worth taking. They set out to swim twenty-five hours across the choppy waters of the Baltic Sea. Linke's storytelling achieves a delicate balance between heightened moments of danger--searchlights, jellyfish, a Russian helicopter, a violent summer storm--and the monotony, ineffable fatigue, physical pain, cramping, fear, and hope that fill the rest of the journey. A memorable tale of two people risking all for a chance at freedom.

Proton and Carbon Ion Therapy Springer Science & Business Media

This book describes the photocatalytic mechanism, factors affecting photocatalytic activity, design and preparation of different kinds of nanostructured photocatalysts, and their applications in the environmental and energy fields. Further, it illustrates a broad range of modification methods including ion-doping, heterojunction, noble metal deposition, morphological control and sensitizations, which are used to extend the light absorption range of photocatalysts and reduce recombination between electrons and holes. Promising applications include water splitting, contaminant decomposition and photocatalytic reduction of CO₂, which are closely related to environmental redemption and new energy development. The book offers an

intriguing and useful guide for a broad readership in various fields of catalysis, material sciences, environment and energy.

The Bankers' Conspiracy! Etruscan Press

Proceedings of the NATO Advanced Study Institute, Bonas, France, June 26-July 7, 1979

Shattered Glass University of Toronto Press

Mycobacterium tuberculosis in an attempt to understand the extent to which the bacilli has adapted itself to the host and to its final target. On the other hand, there is a section in which other specialists discuss how to manipulate this immune response to obtain innovative prophylactic and therapeutic approaches to truncate the intimal co-evolution between Mycobacterium tuberculosis and the Homo sapiens.

Calcium Channel Pharmacology John Wiley & Sons

Paula Priamos' detective noir memoir investigates a daughter's love for a father who drinks, hustles, and rages through life.

MRI and CT of the Female Pelvis Springer Science & Business Media

Majid Khadduri, one of the world's preeminent authorities on Islamic justice and jurisprudence, presents his extensive study and reflection on Islamic political, legal, ethical, and social philosophy. This book is both a magisterial historical synthesis and an illumination of the beliefs and practices of modern Islam. (World Religion)

Liquid Film Coating Springer

European Thermoelectric Conferences are promoted by the European Thermoelectric Society for favoring the dissemination of scientific and technical progresses in the field of Thermoelectrics, enhancing the communication between research institutions and industries for promotion of TE applications, providing a forum for exchange of information and achievements.

The Incredible Here and Now Giramondo Publishing

A multidisciplinary index covering the journal literature of the arts and humanities. It fully covers 1,144 of the world's leading arts and humanities journals, and it indexes individually selected, relevant items from over 6,800 major science and social science journals.

Things Japanese, Being Notes on Various Subjects Connected with Japan, for the Use of Travellers and Others John Wiley & Sons

The critically acclaimed Vascular Diagnosis of Ultrasound returns in a new two-volume second edition, offering the most

comprehensive information available on the broad spectrum of vascular ultrasound applications. Volume 1: Cerebral and Peripheral Vessels retains the accessible design and structure of the first edition to discuss the available ultrasound technologies, including continuous and pulsed-wave Doppler mode, b-mode, and conventional and color-coded duplex analysis in frequency and amplitude power modes. This text covers anatomy, physiology, normal and abnormal findings, test accuracy and sensitivity, providing the reader with the information essential to managing common clinical situations. Highlights: Provides comprehensive coverage of vascular ultrasonography in the arteries and veins of the cerebral circulation and the peripheral upper and lower limb circulation Compares other diagnostic methods used in each region, such as conventional and noninvasive MR angiography Assesses recent developments in ultrasound technology, including tissue perfusion studies, 3D and 4D imaging, contrast enhancement and microbubble applications, and their diagnostic, technological, and therapeutic implications Features new challenging case studies for both the novice and the expert to review With contributions from experts in the field and more than 500 line drawings and images, this text is an indispensable reference for radiologists, vascular surgeons, and residents and students in these specialties.

Marine Fishes of Arctic Canada Springer Science & Business Media

Marine Fishes of Arctic Canada is an accessible and up-to-date study on the diverse marine fish population existing in Canadian waters.

Understanding Tuberculosis Orca Book Publishers

Michael's older brother dies at the beginning of the summer he turns 15, but as its title suggests *The Incredible Here and Now* is a tale of wonder, not of tragedy. Presented as a series of vignettes, in the tradition of Sandra Cisneros' Young Adult classic *The House on Mango Street*, it tells of Michael's coming of age in a year which brings him grief and romance; and of the place he lives in Western Sydney where 'those who don't know any better drive through the neighbourhood and lock their car doors', and those who do, flourish in its mix of cultures. Through his perceptions, the reader becomes familiar with Michael's community and its surroundings, the unsettled life of his family, the girl he meets at the local pool, the friends that gather in the McDonalds parking

lot at night, the white Pontiac Trans Am that lights up his life like a magical talisman.

Live Food in Aquaculture Penguin

This proceedings volume includes selected papers presented at the international symposium 'Live Food Organisms in Marine Larviculture' held in Nagasaki, Japan, September 1-4 1996. This

international symposium focused on live food organisms for the larval rearing of marine animals. Recent achievements in the fundamental biology (such as physiology, ecology, taxonomy, life cycle and nutrition) of live planktonic animals used as feed in aquaculture were combined with recent technological advances on larval rearing methods. This volume also provides future

directions for the application of basic science to the rearing of aquatic animals.

Tribes of the Hindoo Koosh Springer

Captures advancements in the vascular cognitive impairment approach to dementia, providing clear guidelines in diagnoses and management.
