Reasons to Believe OUP Oxford

This book unravels mysteries, corrects misunderstandings, and offers thoughtful, straightforward responses to common objections about the Catholic faith. Bestselling author Scott Hahn, a convert to Catholicism, has experienced the doubts that so often drive discussions about God and the Church. In the years before his conversion, he was first a nonbeliever and then an anti-Catholic clergyman. In *REASONS TO BELIEVE*, he explains the "how and why" of the Catholic faith—drawing from Scripture, his own struggles and those of other converts, as well as from everyday life and even natural science. Hahn shows that reason and revelation, nature and the supernatural, are not opposed to one another; rather they offer complementary evidence that God exists. But He doesn't merely exist. He is someone, and He has a personality, a personal style, that is discernible and knowable. Hahn leads readers to see that God created the universe with a purpose and a form—a form that can be found in the Book of Genesis and that is there when we view the natural world through a microscope, through a telescope, or through our contact lenses. At the heart of the book is Hahn's examination of the ten "keys to the kingdom"—the characteristics of the Church clearly evident in the Scriptures. As the story of creation discloses, the world is a house that has a Father, a palace where the king is really present. God created the cosmos to be a kingdom, and that kingdom is the universal Church, fully revealed by Jesus Christ.

Encyclopaedia of Religion and Ethics OUP Oxford

I highly recommend this edited collection. It is a timely intervention when universities around the world are facing changes akin to the newspaper industry a decade ago. The authors remind us of the potential power of the lecture and that there does not need to be a trade off between the size of the class and the quality of the delivery... Professor James Arvanitakis 2012 recipient of the Prime Minister's Teaching and Learning Award, University of Western Sydney, Australia This is the first book of its kind that considers the complex issues of large classes. As such, it makes a very important contribution and provides a deep insight into large class pedagogy from a conceptual and practical perspective. Dr Mandia Menits Massey University, New Zealand If the thought of teaching large classes fills you with dread; if you think that pedagogic innovation is impossible in the face of burgeoning student numbers; or if you

simply wish to understand more about the dynamics of this increasingly common environment in Higher Education, then this is the book for you. Written by highly experienced academics, it is a valuable (and long overdue!) resource for supporting good practice in the large class context. Dr Jenny Hadingham
