The Pose Method of Triathlon Techniques  
 Fernhurst Books Limited  
 In Run Forever, Boston Marathon winner and former Runner's World editor-in-chief Amby Burfoot shares practical advice and wisdom on how to run with greater joy and health for an entire lifetime. Everyone learns how to run at an early age. It's naturally wired into your body. Yet in recent years, running has become complicated by trendy gadgets and doctrine. With a Boston Marathon win and over 100,000 miles run on his resume, Amby Burfoot steers the sport back to its simple roots in Run Forever. From a warm and welcoming perspective, Burfoot

provides clear, actionable guidance to runners of every age and ability level. Whether you are a beginner runner or experienced marathoner, Run Forever will show you how to motivate yourself, avoid injuries, increase speed and endurance, and reach your goals. Best of all, you'll enjoy optimal health throughout your life. Runner's World How to Make Yourself Poop  
 Simon and Schuster  
 In Running with the Whole Body, Heggie proposes a thirty-day exercise program that will not only prevent you from injuring yourself in a new way, but enable you to become a smoother, and more powerful runner. The exercises presented isolate the workings of the various parts of the body to show how each part of the body balances and works in concert with the others. The result is a body whose torso, hips, pelvis and shoulders all move freely

in the act of running. You will discover how to unleash the power of the large, strong muscles of the hips, spine and shoulders to power your running.

Natural Running is the middle ground runners have been looking for. By learning to run the barefoot way, while wearing shoes, runners will become more efficient, stronger, and healthier runners. Backed by studies at MIT and Harvard, running form and injury expert Danny Abshire presents the natural running technique, form drills, and an 8-week transition plan that will put runners on the path to faster, more efficient, and healthier running. In Natural Running, Abshire explains how modern running shoes distort the efficient running technique that humans evolved over thousands of years. He reviews the history of running shoes and injuries, making the

case for barefoot running but also warning about its dangers. By learning the natural running technique, runners can enjoy both worlds: comfortable feet, knees, and legs and an efficient running form that reduces impact and injuries. *Natural Running* teaches runners to think about injuries as symptoms of poor running form. Abshire specifies the overuse injuries that are most commonly associated with particular body alignment problems, foot types, and form flaws. Runners will learn how to analyze and identify their own characteristics so they can start down the path to natural running. Abshire explains the natural running technique, describing the posture, arm carriage, cadence, and land-lever-lift foot positioning that mimic the barefoot running style. Using Abshire's 8-week transition plan and a tool kit of strength and form drills, runners will move from heel striking to a midfoot or forefoot strike. *Natural Running* is the newest way to run and also the oldest. By discovering how they were meant to run, runners will become more efficient, stronger, and healthier runners.

"Combining the winning elements of proven training approaches, motivational stories, and innovative recipes, *No Meat Athlete* is a unique guidebook, healthy-living cookbook, and nutrition primer for the beginner, every day, and serious athlete who wants to live a meatless lifestyle. Author and popular blogger, Matt Frazier, will show you that there are many benefits to embracing a meat-free athletic lifestyle, including: Weight loss, which often leads to increased speed; Easier digestion and faster recovery after workouts; Improved energy levels to help with not just athletic performance but your day-to-day life; Reduced impact on the planet. Whatever your motivation for choosing a meat-free lifestyle, this book will take you through everything you need to know to apply your lifestyle to your training. Matt Frazier provides practical advice and tips on how to transition to a plant-based diet while getting all the nutrition you need; uses the power of habit to make those changes last; and offers up menu plans for high performance, endurance, and recovery. Once you've mastered the basics, Matt delivers a training manual of his own design for runners of all abilities and ambitions. The manual provides training plans for common race distances and shows runners how to create healthy habits, improve performance, and avoid injuries. *No Meat Athlete* will take you from the start to finish line, giving you encouraging tips, tricks, and advice along

the way"--

Although running is becoming one of the most popular sports, learning to run properly can take time, energy and consistency. You need to do it regularly to become good at it and until you have achieved a certain level of competence, it is unlikely that you will enjoy it very much, or for very long. For many runners physical and mental barriers can stop progress. This book's ultimate aim is to help you enjoy to run - to enjoy the feeling of movement, to overcome inertia, to renew yourself and to boost energy as a result. *Master the Art of Running* is based on the proven principles of the Alexander Technique that encourage good body use and greater awareness of the way your body functions and moves. The technique teaches you how to release tension from your back and neck and how to run without suffering from injuries. The authors' perspective on the sport takes them into areas rarely touched on in conventional manuals. Instead of placing importance on speed, targets and goals it emphasises the importance of the way you run so you can transform your training and performance.

#### *No Meat Athlete* Harmony

A straightforward, easy-to-follow look at the anatomy, biomechanics, and nutrition of running. Dr. Cucuzzella "aims to improve the fitness and well-being of all, from the uninitiated to beginners to veterans who still have new tricks to learn" (Amby Burfoot, Boston Marathon winner, writer at large for *Runner's World* magazine, and author of *The Runner's Guide to the Meaning of Life*). Despite our natural ability and our human need to run, each year more than half of all runners suffer injuries. Pain and discouragement inevitably follow. Cucuzzella's book outlines the proven, practical techniques to avoid injury and reach the goal of personal fitness and overall health. With clear drawings and black-and-white photographs, the book provides illustrated exercises designed to teach healthy running, along with simple progressions and a running schedule that shows the reader how to tailor their training regimen to their individual needs and abilities.

#### *The Run Walk Run® Method* Harper Collins

Running is America's most popular participatory sport, yet more than half of those who identify as runners get injured every year. Falling prey to injuries from overtraining, faulty form, poor eating, and improper footwear, many runners eventually, and reluctantly, abandon the sport for a less strenuous pastime. But for the first time in the United States, Hiroaki

Tanaka's *Slow Jogging* demonstrates that there is an efficient, healthier, and pain-free approach to running for all ages and lifestyles. Tanaka's method of easy running, or "slow jogging," is an injury-free approach to running that helps participants burn calories, lose weight, and even reverse the effects of Type-2 diabetes. With easy-to-follow steps and colorful charts, *Slow Jogging* teaches runners to enjoy injury-free activity by:

- Maintaining a smiling, or niko niko in Japanese, pace that is both easy and enjoyable
- Landing on mid-foot, instead of on the heel
- Choosing shoes with thin, flexible soles and no oversized heel
- Aiming for a pace of 180 steps per minute
- And trying to find time for activity every day

Accessible to runners of all fitness levels and ages, *Slow Jogging* will inspire thousands more Americans to take up running and will change the way that avid runners hit the pavement.

#### *Dr. Nicholas Romanov's Pose Method of Running* Pose Tech Corp.

From a two-time Olympic coach and creator of the Pose Method who has trained the running elite, an essential guide for all runners seeking to go faster and farther without injury Christopher McDougall's *Born to Run*—and the wildly popular natural running trend it sparked—changed the way we think about running, but it has also prompted many questions: Have we been running the wrong way? And, have we been running in the wrong kind of shoe? What is the safest type of foot strike? How many types are there? And what is a foot strike anyway? No existing guide has clearly addressed these concerns—until now. The *Running Revolution* provides both beginning and experienced runners with everything they need to know in order to safely and efficiently transition to and master a safer and more biomechanically efficient way of running that is guaranteed to improve performance and minimize wear and tear on the body. More than a one-size-fits-all guide, *The Running Revolution* provides readers with clear instructions, complete with helpful illustrations, that they can easily integrate into their unique running histories in order to run safely, intelligently, and efficiently for many years to come.

#### *How Bad Do You Want It?* Crown

For readers of *Born to Run* by Christopher McDougall, *The Barefoot Running Book* lends practical advice on the minimalist running phenomenon Ditch those cushiony running shoes—they're holding you back and hurting your feet! You've heard about barefoot running and how it can reduce injury and allow for better form. Maybe

you've even tried it and learned how shedding those heavy, overly-manufactured shoes can make running more enjoyable. Regardless of your expertise level, Jason Robillard—a leading expert on barefoot running education and director of the Barefoot Running University—synthesizes the latest research to ease you from barefoot walking to slow running to competitive and trail running vis-à-vis simple drills, training plans, and useful hints from fellow barefoot runners. Practical, easy-to-follow, and illustrated with black-and-white photographs throughout, *The Barefoot Running Book* shows how everyone can transition to barefoot and minimalist shoe running—safely and optimally. *Runner's World Run Less Run Faster* Fair Winds Press (MA)

Explains how to determine an ideal training pace, provides pacing tables for individual races, suggests race strategies, and offers guidelines to protect against injury.

The greatest athletic performances spring from the mind, not the body. Elite athletes have known this for decades and now science is learning why it's true. In his fascinating new book *How Bad Do You Want It?*, coach Matt Fitzgerald examines more than a dozen pivotal races to discover the surprising ways elite athletes strengthen their mental toughness. Fitzgerald puts you into the pulse-pounding action of more than a dozen epic races from running, cycling, triathlon, XTERRA, and rowing with thrilling race reports and revealing post-race interviews with the elites. Their own words reinforce what the research has found: strong mental fitness lets us approach our true physical limits, giving us an edge over physically stronger competitors. Each chapter explores the how and why of an elite athlete's transformative moment, revealing powerful new psychobiological principles you can practice to flex your own mental fitness. The new psychobiological model of endurance performance shows that the most important question in endurance sports is: how bad do you want it? Fitzgerald's fascinating book will forever change how you answer this question and show you how to master the psychology of mind over muscle. These lessons will help you push back your limits and uncover your full potential. *How Bad Do You Want It?* reveals new psychobiological findings including: Mental toughness determines how close you can get to your physical limit. Bracing yourself for a tough race or workout can boost performance by 15% or

more. Champions have learned how to give more of what they have. The only way to improve performance is by altering how you perceive effort. Choking under pressure is a form of self-consciousness. Your attitude in daily life is the same one you bring to sports. There's no such thing as going as fast as you can—only going faster than before. The fastest racecourse is the one with the loudest spectators. Faith in your training is as important as the training itself. Athletes featured in *How Bad Do You Want It?*: Sammy Wanjiru, Jenny Simpson, Greg LeMond, Siri Lindley, Willie Stewart, Cadel Evans, Nathan Cohen and Joe Sullivan, Paula Newby-Fraser, Ryan Vail, Thomas Voeckler, Ned Overend, Steve Prefontaine, and last of all John "The Penguin" Bingham ChiRunning Pose Tech Corp.

2,200 miles. 47 days. One remarkable journey. In July 2015, ultramarathon legend Scott Jurek smashed the world record for running the Appalachian Trail, the sprawling mountain path that runs nearly the entire length of the United States. For nearly seven weeks straight, Jurek battled the elements to run, hike and stumble 50 miles every single day. A tale of mind-boggling physical exertion, pressure and endurance, North reveals the extraordinary lengths to which we can push our bodies and our minds. Instant New York Times Bestseller \_\_\_\_\_ 'Pure suspense, adventure, and inspiration . . . His story of plunging into the wilderness in pursuit of a dream is both heartwrenching and spellbinding.' Christopher McDougall, author of *Born to Run* 'Probably America's greatest ever ultrarunner.' Guardian 'Scott Jurek's record-setting journey on the Appalachian Trail was the most punishing, most demanding, most gruelling feat I've ever personally witnessed . . . An immersive and engaging book.' Aron Ralston, author of *127 Hours* 'I'm a huge fan . . . North is tremendous.' A unique fitness program from a highly respected spiritual leader that blends physical and spiritual practice for everyone - regardless of age, spiritual background, or ability - to great benefits for both body and soul. As a Tibetan lama and leader of Shambhala (an international community of 165 meditation centers), Sakyong Mipham has found physical activity to be essential for spiritual well-being. He's been trained in horsemanship and martial arts but has a special love for running. Here he incorporates his spiritual practice with running, presenting basic meditation instruction and fundamental principles he has developed. Even though both activities can be complicated, the lessons here are simple and designed to show how the melding of internal practice with physical movement can be used by anyone - regardless of age, spiritual background, or ability - to benefit body and soul.

**The Running Revolution** Rodale Books  
A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of *Born to Run* lies a mysterious

tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.
