Move from feeling anxious about the oil crisis to developing a positive vision and taking traction action to create a more self-reliant existence with this ground-breaking book. We live in an oil-dependent world, and have become reliant in a very short space of time, using vast reserves of oil in the process – and without planning for when the supply is not so plentiful. Most of us avoid thinking about what happens when the oil runs out (or becomes prohibitively expensive), but the reality may not be as bad as we think. The Transition Handbook shows how the inevitable and profound changes ahead could have a positive effect. Written by permaculture expert Rob Hopkins, he discusses the possibility of a rebirth of local communities, which will generate their own fuel, food and housing. These will encourage the development of local currencies, to keep money in the local area, and unleash a local 'skilling-up', so that people have more control over their lives. The growth in interest in the Transition model continues to be exponential. There are now more than 35 formal Transition Initiatives in the UK, including towns, cities, islands, villages and peninsulas, with more joining as the idea takes off. With little proactivity at government level, communities are taking matters into their own hands and acting locally. If your community has not yet become a Transition Initiative, this upbeat guide, filled with beautiful black and white photographs, offers you the tools to get started. The Transition Handbook is the perfect manual to guide communities, as they begin this 'energy descent' journey.

A History of Women Photographers Taylor & Francis

Dwellers of Memory is an ethnographic study of how urban youth in Colombia came to be at the intersection of multiple forms of political, drug-related, and territorial violence in a country undergoing forty years of internal armed conflict. It examines the ways in which youth in the city of Medellin reconfigure their lives and, cultural worlds in the face of widespread violence. This violence has transgressed familiar boundaries and destroyed basic social supports and networks of trust. This volume attempts to map and understand its patterns and flows. The author explores how Medellin's youth locate themselves and make, sense of violence through contradictory and shifting memory practices. The violence has not completely taken over their cultural worlds or their subjectivities. Practices of remembering and forgetting are key methods by which these youth rework their identities and make sense of the impact of violence on their lives. While the experience of violence is rooted in urban space and urban youth, the memory dwellers use a sense of place, oral histories of death, and narratives of fear as survival strategies for inhabiting violent neighborhoods. The book also examines fissures in memory, the contradictory constructions of young people's subjective selves, and practices of gendered violence and terror. All have and continue to pose risks to the historical

memory and cultural survival of the residents of Medellin.

Dwellers of Memory offers an alternative ethnographic approach to the study of memory and violence, one that calls into question whether the role of the ethnographer of violence is to be a mere witness of terror, or to oppose it by writing against it. It will be of interest to sociologists, anthropologists, and students of, ethnography.

Dr. Paul Wolff Taylor & Francis

First published in 1933, "The Shape of Things to Come" is science fiction novel written by H. G. Wells. Within it, world events between 1933 and 2106 are speculated with a single superstate representing the solution to all humanity's problems. A classic example of Wellsian prophesy, this volume is highly recommended for fans of his work and of the science fiction genre. Herbert George Wells (1866 - 1946) was a prolific English writer who wrote in a variety of genres, including the novel, politics, history, and social commentary. Today, he is perhaps best remembered for his contributions to the science fiction genre thanks to such novels as "The Time Machine" (1895), "The Invisible Man" (1897), and "The War of the Worlds" (1898). Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this book now in an affordable, modern, high-quality edition complete with a specially commissioned new biography of the author.
