Dr. Suzuki questioned why all vocalists vocalize every day to improve their voices, but instrumentalists do not do so every day with their instruments. He believes that on any instrument, one needs to practice to make a more beautiful tone. First he talks about playing a beautiful resonant tone with the bow while plucking the string with a finger. When a pizzicato is played, the resonance goes on for a long time. Students should listen to that resonance and play the same kind of clear beautiful sound. He talks about how to make a difference in the tone by using a different bow speed, how to practice to find the resonance point, how to change the weight of the arm on the bow to produce a different kind of tone, and how to change tone color. This book includes all of Dr. Suzuki's basic ideas about tone.

The studies for viola by Franz Anton Hoffmeister (1754-1812) can be considered as one of the most important works written for viola players in this period nearly to the 19th century. This urtext edition is made from a complicated source, it is a facsimile of the first edition of the twelve studies that are divided into two books, therefore, this version tries to get as close as possible to the real intentions of Hoffmeister to provide interpretation opportunities to both professional and amateur musicians in a clear and spacious manner, also presents a musical text that is not limited by the philosophy of over-publishing of the 19th century. Convenient page turns for individual study and some parenthetical suggestions for slurs, dynamics and tempo have been offered by the editor.
