ROMAN DARIO

Viva Voce on Medical Physiology (Practical) Elsevier India

Explains the basic aspects of experimental pharmacology In the form of simple questions and answers. Aimed at both the undergraduate as well as the postgraduate students, this book presents the following key features: - Choice of animal species for a particular disease model. - Ethical Issues related to animal experimentation. - Basic concepts for applying statistics in pharmacology. - General pharmacological techniques such as blood withdrawal, administration of drugs, and anaesthetic techniques. - Experimental designing, bioassays and toxicity studies. - Basic aspects of DRC and In vivo experiments. - Biochemical analysis In pharmacology. - Advanced techniques useful in pharmacology, including radioligand binding studies, and patch clamp technique. - Immunohistochemistry. - In situ hybridization.

What criteria are used to assess the scholarly merit of a thesis? What is the level of conceptualization that is expected in doctoral theses? How can you prepare to defend your thesis? What is the most effective route to achieving your doctorate? The starting point to achieving your doctorate is to appreciate how your thesis will be examined. The criteria that examiners use, the questions they ask in vivas and their reports provide templates against which theses are judged. So, why not start from this endpoint as you plan, undertake, write and defend your research? This book focuses specifically on how you, as a doctoral candidate, can raise your level of thinking about your chosen topic. Doing so will improve the quality of your research and ultimately contribute to knowledge. It also explores the nature of conceptualization which is sought by examiners in theses. As a candidate, the book provides those essential characteristics of doctorateness that examiners expect to find in your thesis. The book will also appeal to supervisors, examiners and those who conduct workshops for doctoral candidates and supervisors. This practical book includes extracts from theses, examiner reports and cameo accounts from doctoral examiners, supervisors and candidates. It also contains numerous visual models that explain relationships and processes for you to apply and use in your doctoral journey. Based upon contemporary practice, Stepping Stones to Achieving your Doctorate is an essential tool for doctoral candidates, supervisors and examiners.

The Oxford Magazine Independently Published

To date, more than a million insect species have been described, with probably at least another 5-8 million species waiting in the wings for a name. Insects are a fascinatingly diverse and beautiful spectrum of animals. They range in size from the tiny parasitic wasp, measuring a mere 139µm, to the aptly named Titan beetle, which can reach lengths of up to 17cm. They can be found on all continents of the world, from the Sahara Desert to the frozen wastes of Antarctica; in caves, under the ground, inside plants, other insects and vertebrates, in rivers, streams, lakes and ponds, in puddles, in the watery interiors of pitcher plants; and in our houses. While no insects live beneath the waves, the intrepid sea skaters skim the surface of some of the world's oceans. This Very Short Introduction explores the extraordinary world of insects. It analyses insect evolution, taxonomy and development, and describes their behaviour, their life styles, and the interactions they have with other insects and other animals. As Simon Leather shows, insects are the bedrock on which human civilisation rests; without them we would almost certainly not exist. Although they can be seen as pests of our crops plants, they are also invaluable for pollinating our flowering plants and are an invaluable link in all land ecosystems. As they face challenges from climate change and pesticides it has never been more important to understand these oft-dismissed creatures. Very Short

Introductions: Brilliant, Sharp, Inspiring ABOUT THE SERIES: The Very Short Introductions series from

Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Oxford University Gazette Jaypee Brothers, Medical Publishers Pvt. Limited

1. Basic Laboratory Techniques 1. To cut a glass tube or glass rod, 2. To bend the glass rod at an angle, 3. To draw a glass jet from a glass tube 4. To bore a cork and fit a glass tube into it Viva-Voce 2. Characterisation and Purification of Chemical Substances 1. To determine the melting point of the given unknown organic compound and its identification (simple laboratory technique) Viva-Voce 2. To determine the boiling point of a given liquid when available in small quantity (simple laboratory method) Viva-Voce 3. To prepare crystals of pure potash alum [K₂SO₄.Al₂(SO₄)₃.24H₂O] from the given impure sample 4. To prepare the pure crystals of copper sulphate from the given crude sample 5. To prepare pure crystals of benzoic acid from a given impure sample Viva-Voce 3. Measurement of pH Values 1. To determine the pH value of vegetable juices, fruit juices, tap water and washing soda by using universal pH paper 2. To determine and compare the pH values of solutions of strong acid (HCl) and weak acid (CH₃COOH) of same concentration 3. To study the pH change in the titration of strong base Vs. strong acid by using universal indicator paper 4. To study the pH change by common ion (CH₃COO⁻ ion) in case of weak acid (CH₃COOH) 5. To determine the change in pH value of weak base (NH₄OH) in presence of a common ion (NH₄⁺) Viva-Voce 4. Chemical Equilibrium 1. To study the shift in equilibrium between ferric ions and thiocyanate ions by changing the concentrations of either of the ions 2. To study the shift in equilibrium between [Co(H₂O)₆]²⁺ and Cl⁻ ions by changing the concentrations of either of the ions Viva-Voce 5. Quantitative Analysis 1. To prepare M/10 oxalic acid solution by direct weighing method 2. To prepare M/10 solution of sodium carbonate by direct weighing method 3. To determine the strength of given solution of sodium hydroxide by titrating it against N/10 or M/20 solution of oxalic acid 4. To determine the strength of a given solution of hydrochloric acid by titrating it against a standard N/10 or M/20 sodium carbonate solution Viva-Voce 6. Qualitative Analysis Analysis of Anions Analysis of Cations Viva-Voce 7. Detection of Elements in Organic Compounds 1. To detect the presence of nitrogen, sulphur and halogens in a given organic compound by Lassaigne's test 2. To detect the presence of nitrogen, sulphur and halogens in the given organic compound sample number by Lassaigne's test Viva-Voce INVESTIGATORY PROJECTS 1. Checking of Bacterial Contamination in Water 1. To check the bacterial contamination in drinking water by testing sulphide ions Viva-Voce 2. Methods of Water Purification 1. To purify water from suspended impurities by using sedimentation 2. To purify water by boiling 3. To purify water by distillation method 4. To purify water by reverse osmosis technique 5. To purify water by GAC method 6. To purify water by bleach treatment 7. To purify water by oxidising agent 8. To purify water by ozone treatment method Viva-Voce 3. Water Analysis 1. To test the hardness of different water samples Viva-Voce 4. Foaming Capacity of Various Soaps 1. To compare the foaming capacity of different washing soaps 2. To study the effect of addition of sodium carbonate on foaming capacity of washing soap Viva-Voce 5. Tea Analysis 1. To study the acidity of different samples of tea leaves (tea) by using pH paper Viva-Voce 6. Analysis of Fruits and Vegetable Juices 1. To analyse the fruit and vegetable juices for the constituent present in them Viva-Voce 7. Rate of Evaporation 1. To study the rate of evaporation of different liquids Viva-Voce 8. Effect of Acids and Bases on Tensile Strength of Fibres 1. To compare the tensile strength of natural fibres and synthetic fibres 2. To study the effect of acids and bases on tensile strength of different fibres Viva-Voce

EXAMINATION ORIENTED PHYSIOLOGY AND BIOCHEMISTRY Routledge

The book is a brief presentation of the questions and answers predominantly asked by an undergraduate medical student in the viva voce examination of Anatomy. It deals with all the

aspects of Anatomy including general anatomy, histology, embryology, and living anatomy and radiology. Provides rapid revision of the subject just before the practical examination Helps students to understand basic concepts and practical aspects in a short period of time Difficult to remember facts presented in a tabular format Separate sections on histology and embryology are just optimum for a typical viva voce examination New to the Third Edition Must-know questions highlighted in all the chapters New chapter on Radiological Anatomy and Imaging More questions and answers added in existing chapters

Learning to Teach in Higher Education JP Medical Ltd

This is one of enumerable self-help or how to books with an emphasis on Engineering Physics Practical. The basic premise of the book is that there are certain simple experiments, involving no more than rudimentary Physics laws and the very basic laws of Engineering Physics for undergraduate college engineering students. But these practical are often not done or taken lightly, for several reasons. First, people don't realize how easy they are to do. Second, and more fundamental, they are not done because it does not occur to people to do them. Finally, and tragically, no one in their elementary, middle, or high school educational experience has stressed the importance of doing them, and of course neither did they teach to do them. This book is to reveal to you what the experiments are, make them readily understandable, and by means of a very easy-to-use illustrations. The main thing you should expect from this book is the theories and practical related small information more precisely about experiments. You will get a rudimentary understanding of the basic concepts behind the Engineering Physics experiment that governs the fundamental daily life questions that challenge us in life. The book is divided into seven major categories and Fifteen chapters. In this book the students will find solutions to experimental obstacles normally faced by undergraduate college engineering students. students. In summary, you don't need any special background or ability to profit from this book.

Sure Success in Ophthalmology Viva Voce and Practical Examination JP Medical Ltd

This book primarily aims to render quick revision of Anatomy, Histology, and Embryology for the rapid-fire round of viva voce examination. It will assist students to learn numerous concepts and practical aspects of the subject in short period of time, before they appear for university examination. This edition like its predecessor is a selective collection of the most frequently asked questions. The text has been extensively updated and new illustrations have been added. A new chapter on Living Anatomy has been included. About the Author : - S. D. Gangane, Professor, Department of Anatomy, Grant Medical College & Sir J. J. Group of Hospitals, Byculla, Mumbai, India *The Cheltonian* Springer Nature

Second edition of this book is updated as per guidelines of National Medical Commission in accordance with the Competency-Based Medical Education (CBME) of Community Medicine. This book continues to be must-have for all MBBS students as it prepares them for practical examination along with theory viva. • Chapters on vaccination; contraception; drugs of public health importance; nutrition; details of specific clinicosocial cases; and nutritional assessment of individual, family and community; and annexure II: health-related important indicators of India have been revised thoroughly. • Logical flow, in easy-to-understand language and systemic presentation of complete theory in Question-Answer format helps in revision and self-assessment before examination. • Practical part of the book includes spotters with figures and tables, exercises with solutions, exercises for practice prepares students for both practical and viva examination. • Clinicosocial cases with details of specific cases covered in the book and impart practical-focused learning. Salient Features • Significant content enhancement and re-organization in line with revised curriculum, to ensure continued relevance and renewed focus on application-based learning. • New chapters on family adoption programme (FAP); formulating research question for study; planning, implementation and evaluation of health education programme; training of health workers in disease prevention and control; application of computers in epidemiology; and essential medicine have been added as per CBME curriculum. • Pointwise, specific, and detailed-illustrated answers to progressively building-up, intuitive questions on each topic. Additional Features • Complimentary access to full ebook at www.medenact.com • Additional practical and viva questions along with answers. • Links to useful websites for further learning. • Complementary images of community medicine for greater retention of knowledge. • Topics such as OSCE/OSPE, food adulteration and tips useful for PPT presentation with relevant syllabus helps in quick learning.

Mysore University Calendar JAYPEE BROTHERS PUBLISHERS

The idea of writing this book of VIVA VOCE/ORALS IN BIOCHEMISTRY is that, it should be much helpful to the MBBS and M.Sc. (Medical Science) students and postgraduate students for the preparation of examination. Though it is not a textbook of Medical Biochemistry, it is framed in the form of questions and answers in a simplified way. The book will definitely help the students for the preparation of their examinations. This book is also aimed at the level of general practitioners, clinicians and medical students and technicians for applying the knowledge of clinical biochemistry in the clinical side, as much emphasis is given in the clinical biochemistry. The list of clinical biochemistry topics include interpretation of laboratory data and biochemical features of some clinical diseases like metabolic syndrome, diabetes mellitus, anaemias, jaundice, porphyrias and the disturbances of electrolyte and acid base balance.

The Lancet Thieme

This bestselling book is a unique introduction to the practice of university teaching and its underlying theory. This new edition has been fully revised and updated in view of the extensive changes which have taken place in higher education over the last decade and includes new material on the higher education context, evaluation and staff development. The first part of the book provides an outline of the experience of teaching and learning from the student's point of view, out of which grows a set of principles for effective teaching in higher education. Part two shows how these ideas can enhance educational standards, looking in particular at four key areas facing every teacher in higher education: • Organising the content of undergraduate courses • Selecting teaching methods • Assessing student learning • Evaluating the effectiveness of teaching. Case studies of exemplary teaching are used throughout to connect ideas to practice and to illustrate how to ensure better student learning. The final part of the book looks in more detail at appraisal, performance indicators, accountability and educational development and training. The book is essential reading for new and experienced lecturers, particularly those following formal programmes in university teaching, such as courses leading to ILT accreditation.

Viva Voce In Anatomy, 3/e Elsevier India

A short case is a clinical case which does not require details of patient history or physical examination to make a clinical diagnosis. Practical Surgery Short Clinical Cases is the third edition of

this highly illustrated question-and-answer guide to a range of cases. This book is excellent exam preparation for postgraduate medical students taking surgical examinations. This revised and updated edition is comprised of 13 chapters, covering 95 specific short cases. The chapters cover swellings, ulcers, fistulas, sinuses, bleeding and miscellaneous cases. A new chapter on non-clinical practical examination has been added to this edition. Each clinical case is presented in a systematic format, beginning with clinical diagnosis, potential viva-voce questions and answers, followed by discussion on the case including its pathology, clinical features, investigations, complications and treatment modalities. Practical Surgery Short Clinical Cases includes 394 full colour illustrations and images, enhancing each of the 95 cases featured and providing excellent revision material for MBBS and MS (General Surgery) students. Key Points Features 95 short cases in a question-and-answer format 394 full colour images and illustrations New chapter on non-clinical practical examination New edition

Viva Voce In Anatomy CBS Publishers & Distributors Pvt Limited, India

Clinical Oncology is a guide for oncology residents. An oncologist's work starts from the point of diagnosis to achieving a cure or palliation by using the available resources most meaningfully. Oncology examinations aim at finding how much a trainee is fluent in such work before gifting him/her to the society. This needs the idea of pathology, basics of hematology, radiology, and genetics. All these important topics are addressed in the form of 12 short chapters. Case discussions are made interesting by sharing important and relevant points in eight long cases in question and answer format, including history, differential diagnosis, initial investigations, and their logical utilization in approaching a diagnosis. We hope this book is equally helpful for those preparing for oncology entrance examinations and first-year residents as well as final-year students who are going to give practical examinations and ESMO examination. Key Features A clinically focused book packed with all the essential information to help in timely diagnosis and management of patients Explains the important concepts for quick revision for the viva day A useful compendium for ESMO exam, which is globally undertaken by oncology residents and young oncologists

The Examination Statutes, Rev. to June, 17 New Age International

Physics Viva Voce: A Comprehensive Guide is the ultimate resource for students looking to ace their Physics Viva Voce exam. This book is designed to provide a comprehensive and practical guide for anyone preparing for their Physics Viva Voce. With over 500 questions and answers covering all topics in Physics, this guide will help students to gain a deep understanding of the subject and to prepare for any question that may be asked during the exam. The Physics Viva Voce is a critical component of any Physics degree program, and it is a time where students are expected to demonstrate their understanding of the subject in a live, face-to-face setting. The Physics Viva Voce is a challenging and nerve-wracking experience, and it can be difficult to know how best to prepare for it. This book is designed to provide students with the tools and knowledge they need to feel confident and prepared on exam day. The book is divided into six chapters, each of which covers a different topic in Physics. Chapter 1 covers Mechanics, Chapter 2 covers Thermal Physics, Chapter 3 covers Waves, Chapter 4 covers Optics, Chapter 5 covers Electricity and Magnetism, and Chapter 6 covers Modern Physics. Each chapter includes a comprehensive set of questions and answers that cover all the key concepts and topics within that area of Physics. In addition to the questions and answers, each chapter includes a detailed explanation of the key concepts and principles within that area of Physics. This provides students with a deeper understanding of the subject matter and helps to reinforce their knowledge. At the end of the book, there is an appendix that includes a list of formulas and equations, as well as a glossary of key terms. This appendix is a useful resource for students to refer to during their exam preparation. One of the key features of this book is the practical and strategic advice it provides for students. The book includes tips and strategies for preparing for the exam, as well as advice on how to approach different types of questions. This advice is based on years of experience preparing students for their Physics Viva Voce exams, and it is designed to help students to feel confident and prepared on exam day. Overall, Physics Viva Voce: A Comprehensive Guide is an essential resource for any student preparing for their Physics Viva Voce exam. With its comprehensive set of questions and answers, practical advice, and detailed explanations of key concepts, this book is the ultimate tool for success. Whether you are a first-time student or a seasoned veteran of the Physics Viva Voce, this guide will help you to achieve your goals and succeed in your exam.

This book contains all the important Questions asked in all the various universities. It includes - Theory questions (Long Qs , short notes , Distinction Qs)- Practical/ Viva Questions

Physics Practical for Engineers with Viva-Voce BrownWalker Press

This edited book collection offers strong theoretical and philosophical insight into how digital platforms and their constituent algorithms interact with belief systems to achieve deception, and how related vices such as lies, bullshit, misinformation, disinformation, and ignorance contribute to deception. This inter-disciplinary collection explores how we can better understand and respond to these problematic practices. The Epistemology of Deceit in a Postdigital Era: Dupery by Design will be of interest to anyone concerned with deception in a 'postdigital' era including fake news, and propaganda online. The election of populist governments across the world has raised concerns that fake news in online platforms is undermining the legitimacy of the press, the democratic process, and the authority of sources such as science, the social sciences and qualified experts. The global reach of Google, YouTube, Twitter, Facebook, and other platforms has shown that they can be used to create and spread fake and misleading news quickly and without control. These platforms operate and thrive in an increasingly balkanised media eco-system where networks of users will predominantly access and consume information that conforms to their existing worldviews. Conflicting positions, even if relevant and authoritative, are suppressed, or overlooked in everyday digital information consumption. Digital platforms have contributed to the prolific spread of false information, enabled ignorance in online news consumers, and fostered confusion over determining fact from fiction. The collection explores: Deception, what it is, and how its proliferation is achieved in online platforms. Truth and the appearance of truth, and the role digital technologies play in pretending to represent truth. How we can counter these vices to protect ourselves and our institutions from their potentially baneful effects. Chapter 15 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.
