Providing practical guidance on what remains the single most important statutory basis for police duties and powers in England and Wales - the Police and Criminal Evidence Act (PACE) 1984 and its Codes of Practice - this is an essential reference source which the busy police officer or legal practitioner cannot afford to be without. The fifth edition includes all amendments to the Codes of Practice since the last edition, as well as the full text of the Act and Codes of Practice. Explanatory chapters have been updated in line with legislative changes, including the wide-ranging effect of the Policing and Crime Act 2017. With the aid of checklists, flow-charts, and illustrative examples, this book gives excellent guidance on how the procedures and requirements of the Act apply to common, everyday scenarios facing police officers, as well as other persons charged with the investigation of offences. The book forms part of the Blackstone's Practical Policing Series. The series, aimed at all operational officers, consists of practical guides containing clear and detailed explanations of the relevant legislation and practice, accompanied by case studies, illustrative diagrams, and useful checklists.

Modular products are products that fulfill various overall functions through the combination of distinct building blocks or modules, in the sense that the overall function performed by the product can be divided into sub-functions that can be implemented by different modules or components. An important aspect of modular products is the creation of a basic core unit to which different components (modules) can be fitted, thus enabling a variety of versions of the same module to be produced. The core should have sufficient capacity to cope with all expected variations in performance and usage. Components used in a modular product must have features that enable them to be coupled together to form a complex product. Modularity will promote: reduction in product development time; customization and upgrades; cost efficiencies due to amortization; quality design standardization; and reduction in order lead time. The purpose of this book is to develop a structured approach to the design of products using the concept of modularity, assembly, and manufacturability. The book has proposed and developed a structured and systematic approach to product and systems design using the modularity concept. Mathematical and genetic algorithm models are developed to support the developed methodology.

Looking for a programming guide for computer tablet use in the library setting? This book provides detailed plans and instructions with specific literacy goals for child, teen, and adult audiences—exactly what librarians seeking to integrate iPad and other tablet use into their programs need. Tablet computers are fast becoming a ubiquitous technology. These devices also represent a unique opportunity for librarians and teachers because they are relatively affordable, easy to configure and maintain, and highly adaptable. Written by a practicing digital literacy instruction librarian who is also a trained children's librarian, this book offers 50 practical programming scenarios that librarians can use to integrate iPads or other tablet devices into their programming, offering different plans for toddlers and pre-K child, school-aged patrons, teenagers, adults, and even seniors. The plans provide easy-to-follow, step-by-step instructions and are designed to be easily adaptable to serve specific audiences.

The book serves as a unique resource that helps librarians address digital literacy and bridge the digital divide by focusing on—and catering to—the needs of many age groups. Author Joel A. Nichols also provides annotated lists of apps that present librarians new to tablet computing simple and effective ways of integrating an iPad into their programs.

PACE: A Practical Guide to the Police and Criminal Evidence Act 1984 IGI Global

This book goes behind the closed doors of the garda station, providing a contemporary account of the role of criminal defence lawyers who represent those arrested, detained and questioned therein. It draws on the expert analysis and experience of authors Vicky Conway and Yvonne Daly, who developed and delivered specialist training for police station lawyers across Europe, and in-depth qualitative interviews that they conducted with 44 practising solicitors in Ireland. This book is a comprehensive guide for criminal defence lawyers offering insights on the breadth and importance of their role and focusing on the skills necessary to effectively fulfil all aspects of that role. You are led through the entire process from first contact, to deciding to attend, to pre-interview consultation and then the interview itself. Particular attention is paid to enhanced communication skills and to addressing the needs of vulnerable clients. Perennial issues such as pre-interview disclosure and the right to silence are also comprehensively explored. It is essential reading for practitioners who attend garda stations regularly, those looking to conduct more of that work or those starting out in law, as well as gardaí. For prosecutors, barristers and judges, it provides a great insight into the dynamics of the earliest stages of the criminal justice system. It will also be of interest to policymakers, academics and students in criminal justice, on both a domestic and international level, and those interested in learning more about the operation of the Irish criminal process. This title is included in Bloomsbury Professional's Irish Criminal Law online service.

In *An Engine, Not a Camera*, Donald MacKenzie argues that the emergence of modern economic theories of finance affected financial markets in fundamental ways. These new, Nobel Prize-winning theories, based on elegant mathematical models of markets, were not simply external analyses but intrinsic parts of economic processes. Paraphrasing Milton Friedman, MacKenzie

says that economic models are an engine of inquiry rather than a camera to reproduce empirical facts. More than that, the emergence of an authoritative theory of financial markets altered those markets fundamentally. For example, in 1970, there was almost no trading in financial derivatives such as "futures." By June of 2004, derivatives contracts totaling \$273 trillion were outstanding worldwide. MacKenzie suggests that this growth could never have happened without the development of theories that gave derivatives legitimacy and explained their complexities. MacKenzie examines the role played by finance theory in the two most serious crises to hit the world's financial markets in recent years: the stock market crash of 1987 and the market turmoil that engulfed the hedge fund Long-Term Capital Management in 1998. He also looks at finance theory that is somewhat beyond the mainstream—chaos theorist Benoit Mandelbrot's model of "wild" randomness. MacKenzie's pioneering work in the social studies of finance will interest anyone who wants to understand how America's financial markets have grown into their current form. *Fire and Life Safety Educator: Principles and Practice* CRC Press Television Field Production and Reporting provides an exciting introduction to the art of visual storytelling. Video Production Workshop is the first book written to be accessible and appealing to a younger, digitally savvy audience interested in learning the full range of skills involved in planning and executing a video project. It introduces all the digital tools and basic techniques in sequence for readers to build proficiency and gain a well-rounded mastery of the art and craft of video production. Author Tom Wolsky begins with lessons in video

editing and camera handling, and then moves on to scripting and storyboarding a production. Readers then step through a series of exercise projects. Separate chapters explore how to light different types of scenes as well as how to obtain well-recorded sound. The book is designed both for independent students as well as for classroom use, and it includes lessons on video journalism and its rights, responsibilities, and ethics. Related techniques for interviewing and working in a live studio are also presented. The book concludes with lessons in post-production techniques, especially motion graphics and special effects. The companion DVD is packed with DV footage for projects, plus demo plug-ins and free software.

Will you tell the world what God is doing? Whether we do ministry in a faraway country or a nearby neighborhood, we experience the work that God is doing in lives of people around the world. Yet when we try to communicate those stories to our friends at home, we often fall flat. How can we share what God is doing in a way that evokes the excitement He deserves? To experienced journalists-turned-missionaries Jim Killam and Lincoln Brunner, the answer is straightforward: We need to be reporters gathering information responsibly and crafting stories of God's goodness. The next time you are challenged to answer the question: "What happened on your mission trip?" or even: "What is happening in your ministry?" . . . be prepared to answer well. *Go Tell It* will equip you to tell a compelling story that allows others to see God's work in the world.
