 "The last great work of the age of reason, the final instance when all human knowledge could be presented with a single point of view ... Unabashed optimism, and unabashed racism, pervades many entries in the 11th, and provide its defining characteristics ... Despite its occasional ugliness, the reputation of the 11th persists today because of the staggering depth of knowledge contained with its volumes. It is especially strong in its biographical entries. These delve deeply into the history of men and women prominent in their eras who have since been largely forgotten - except by the historians, scholars"-- The Guardian, <https://www.theguardian.com/books/booksblog/2012/apr/10/encyclopedia-britannica-11th-edition>.

This comprehensive, fully illustrated Companion answers the need for an in-depth archaeology reference that provides authoritative coverage of this complex and interdisciplinary field. The work brings together the myriad strands and the great temporal and spatial breadth of the field into two thematically organized volumes. In twenty-six authoritative and clearly-written essays, this Companion explores the origins, aims, methods and problems

of archaeology. Each essay is written by a scholar of international standing and illustrations complement the text.

The Bankers Encyclopedia OUP Oxford
 Encyclopedia of Evolutionary Biology, Four Volume Set is the definitive go-to reference in the field of evolutionary biology. It provides a fully comprehensive review of the field in an easy to search structure. Under the collective leadership of fifteen distinguished section editors, it is comprised of articles written by leading experts in the field, providing a full review of the current status of each topic. The articles are up-to-date and fully illustrated with in-text references that allow readers to easily access primary literature. While all entries are authoritative and valuable to those with advanced understanding of evolutionary biology, they are also intended to be accessible to both advanced undergraduate and graduate students. Broad topics include the history of evolutionary biology, population genetics, quantitative genetics; speciation, life history evolution, evolution of sex and mating systems, evolutionary biogeography, evolutionary developmental biology, molecular and genome evolution, coevolution, phylogenetic methods, microbial evolution, diversification of plants and fungi, diversification of animals, and applied evolution. Presents fully comprehensive content, allowing easy access to fundamental information and links to primary research Contains concise articles by leading experts in the field that ensures current coverage of each topic Provides ancillary learning tools like tables, illustrations, and multimedia features to assist with the comprehension process

Cooper's dictionary of practical surgery and encyclopaedia of surgical science

How were Greek texts on the care and medical treatment of the horse transmitted from antiquity to the present day? Using the evidence of Byzantine manuscripts of the veterinary compilation known as the Hippitrica, Anne McCabe traces the journey of the texts from the stables to the medieval scriptorium and ultimately to the printed edition. Surviving manuscripts include both

magnificent presentation copies and plain ones intended for use in the field. The Hippitrica is a rich and little-known source of information about horses, medicine, and magic. This book provides a guide to its complex history as well as a host of fascinating details, and includes colour illustrations of a number of manuscript pages.

The Imperial Dictionary and Encyclopedia of Knowledge Unabridged

The first encyclopedia in the field, the International Encyclopedia of Ergonomics and Human Factors provides a comprehensive and authoritative compendium of current knowledge on ergonomics and human factors. It gives specific information on concepts and tools unique to ergonomics. About 500 entries, published in three volumes and on CD-ROM, are pre
