Dating Sucks, But You Don't Createspace Independent Pub
From renowned international dating coach comes an essential, must-have dating guide for men looking to gain confidence and find lasting love in the #MeToo era. Rejection. Ghosting. Not knowing how to talk to women. For many men, dating just sucks. But it doesn't have to. There's a simple, yet powerful, way to gain instant confidence and attract a great girlfriend: Be authentic. Whether you want to confidently approach women, get quality matches on dating apps, or learn how to avoid the "friend zone,"

Dating Sucks, but You Don't is your step-by-step blueprint for landing your soulmate. Using the power of "radical authenticity," you'll unlock your most awesome self and learn how to: -Be magnetic as you...even if you're not rich, tall, or great-looking - Always know what to say to ignite chemistry -Get dates and connect with great women without using creepy "pickup artist" tricks -Conquer fear and anxiety and confidently approach women (in a way they love) -Get great matches and dates on Tinder, Bumble, Match, Hinge, or any other dating app -Be a true gentleman of the #MeToo era who respects women and understands the boundaries surrounding consent -Create a healthy, supportive relationship with someone who loves you for you You definitely don't suck. And when you have total self-

confidence and great results, neither does dating.

"The Battle of Jericho: Myth or Fact?" is a comprehensive exploration into one of the most debated events in Biblical archaeology. Authored by a conservative Evangelical Christian Apologist and Biblical Archaeologist, this scholarly work delves deeply into the historical and archaeological evidence surrounding the ancient city of Jericho, famously known for its walls that collapsed at the blast of Joshua's trumpet as recounted in the Bible. Structured in a systematic and detailed manner, the book begins with an introductory overview of biblical archaeology, providing readers with essential methodologies, tools, and principles used in archaeological research. It establishes the foundational techniques for uncovering and interpreting historical data, emphasizing the comparative value of archaeology in illuminating biblical narratives. Subsequent chapters are devoted to a chronological examination of the key

archaeological expeditions at Jericho, from Charles Warren's pioneering 1868 excavation to the ongoing Italian-Palestinian Jericho Expedition's research up to 2023. Each chapter meticulously analyzes the objectives, findings, methodologies, and historical impacts of the respective excavations, presenting a critical assessment of their contributions to both archaeology and biblical scholarship. Particularly noteworthy is the detailed discussion of the contrasting findings and interpretations of archaeologists such as John Garstang, who supported the biblical timeline, and Kathleen Kenyon, whose conclusions challenged it. The book revisits Bryant G. Wood's critical contributions in the 1980s and 1990s, reevaluating earlier findings and offering new perspectives based on pottery analysis and radiocarbon dating techniques. The culmination of these discussions leads to an in-depth analysis of the walls of Jericho, examining their construction, the evidence of their destruction by fire, and the lessons these findings provide for both archaeology and faith. The narrative then synthesizes all archaeological data to address the central question: "Was the Battle of Jericho a myth or a historical fact?" Looking forward, the final chapters discuss the future of biblical archaeology with a focus on emerging trends, innovations, and the increasing role of digital tools in enhancing archaeological accuracy. It also considers the ethical implications of excavating sacred sites, emphasizing the need for collaborative endeavors that respect cultural and spiritual heritage. "The Battle of Jericho: Myth or Fact?" is designed for a diverse audience, appealing to academic scholars, students of archaeology and biblical studies, and lay readers interested in the historical validity of biblical events. This volume seeks to affirm

the historical reliability of the Bible through rigorous academic inquiry, grounded in a steadfast faith in its divine inspiration.

Down from the Trees: Man's Amazing Transition from Tree-Dwelling Ape Ancestors covers the evolution of man from tree-dwelling ape to Homo sapiens as he is today. Using easy-to-read language, the author takes complex, jargon-filled material and extracts the essence of the topic and conveys it in a clear and engaging manner. He approaches the subject of human evolution from three different disciplines: fossil evidence and its interpretation, evolutionary theory and its applicability, and genetic evidence and its ability to unlock prehistoric information. The third discipline has advanced unbelievably in the last few years, and this book includes the most up-to-date research. There is nothing more interesting to humans than the story of their origins. The evolutionary process of a tree-dwelling ape becoming a walking, talking man who has developed the technology to walk on the moon, transplant hearts, or modify living things is no trivial story. This book provides a fascinating and comprehensive view of what science has learned of human evolution.

Whether you call them gods, angels, ETs, or aliens, sufficient proof now exists that beings more advanced than humans have influenced our history. Evidence suggests that these outsiders shaped our religions, genes, technology, and cultures. In fact, they may have provided the impetus for modern civilization. Paul Von Ward investigates why modern science and religion refuse to address the possibility that humans interact with Advanced

Beings (ABs). He reviews sacred texts, myths and legends--from the Old Testament, Hebrew texts, and the Vedas, to the Greek myths, Sumerian tablets, and other historical sources to make the link between religions, their gods, and alien intervention. He shows how this history of AB intervention has been suppressed and challenges readers to reexamine the origins of notions like "divine revelation" to find common ground among the world's cultures and religions. Previously published as *God, Genes, and Consciousness*.

The perceived quality of a destination's cultural offering has long been a significant factor in determining tourist choices of destination. More recently, the need to present touristic offerings that include cultural experiences and heritage has become widely recognised, that this aspect of the tourism experience is an important differentiator of destinations, as well as being amongst the most manageable. This has also led to an increase in the management of such experiences through special exhibitions, events and festivals, as well as through ensuring more routine and controlled access to heritage sites. Reflecting the increasing application of cultural heritage as a driver for tourism and development, this book provides for the first time a cohesive volume on the subject that is theoretically rich, practically applied and empirically grounded. Written by expert scholars and practitioners in the field, the book covers a broad range of theoretical perspectives of cultural heritage tourism; regeneration, policy, stakeholders, marketing, socio-economic development, impacts, sustainability, volunteering and ICT. It takes a broad view, integrating international examples of sites,

monuments as well as intangible cultural heritage, motor vehicle heritage events and modern art museums. This significant book furthers knowledge of the theory and application of tourism within the context of cultural heritage and will be of interest to students, researchers and practitioners in a range of disciplines.

While researching why Freud failed to win a Nobel Prize at the Nobel Archives in Sweden, a psychiatrist makes an unusual discovery. Among the piles of papers in the 'Crackpot' file are letters addressed to the executor of Alfred Nobel's will, written by several notable Nobel laureates — including Rudyard Kipling and Marie Curie — each offering an explanation of why and how Stonehenge was constructed. Diligent research uncovers that Alfred Nobel added a secret codicil to his will, a prize for the Nobel laureate who solves the mystery of Stonehenge. Weaving together a wealth of primary sources — photos, letters, wills — *The Stonehenge Letters* tells the tale of a fascinating secret competition. Praise for *The Stonehenge Letters*: 'This little novel is a delight from its first word to its last. *The Stonehenge Letters* is by turns thoughtful, whimsical, haunting and laugh-out-loud funny. The Viking Diaspora presents the early medieval migrations of people, language and culture from mainland Scandinavia to new homes in the British Isles, the North Atlantic, the Baltic and the East as a form of 'diaspora'. It discusses the ways in which migrants from Russia in the east to Greenland in the west were conscious of being connected not only to the people and traditions of their homelands, but also to other migrants of Scandinavian origin in many other locations. Rather than the movements of armies, this book concentrates on the movements of people and the shared heritage and culture that connected them. This on-going contact throughout half a millennium can be traced in the laws, literatures, material culture and even environment of the various regions of the Viking diaspora. Judith Jesch considers all of these connections, and highlights in detail significant forms of cultural contact including gender, beliefs and identities. Beginning with an overview of Vikings and the Viking Age, the nature of the evidence available, and a full exploration

of the concept of 'diaspora', the book then provides a detailed demonstration of the appropriateness of the term to the world peopled by Scandinavians. This book is the first to explain Scandinavian expansion using this model, and presents the Viking Age in a new and exciting way for students of Vikings and medieval history.

Nothing makes more sense than a good relationship, and yet somehow nothing is more confusing than trying to get in, and stay in, one. Dating can sometimes feel like a battle ground, where two people show up but only one person, at best, walks away unscarred. But does it really have to be so taxing? Do we do it to ourselves? And what elementary, easily avoidable mistakes do we make that result in relationships so twisted that they would put Pilates-practicing-pretzels to shame? As you read this book, pay attention especially to the points that resonate with you most, making you re-think your approach to dating. By devoting yourself to implementing a few of these changes, you will find that your relationships become instantly easier, smoother, and a lot more enjoyable.

Phylogenesis of beauty by Pietro Gaietto is a scientific treatise on the origins and general evolutionary outcome of beauty, from the beginning of the world to the present. Beauty has never before been the object of scientific study, nor has its evolution. Gaietto

has integrated human products, including art, into the general evolution of beauty in nature, noting that man's object follow the same rules of evolutionary transformation found in organic and inorganic physical forms. Gaietto's hypothesis on the transformation of beauty concerns all the kingdoms of nature as they have appeared in chronological order from the earliest geological ages, and as discovered by geologists, paleontologists, and paletnologists. The book's scientific analysis of beauty in human artifacts excludes questions of quality, even if they exist, as well as the idea of ugliness, because man intentionally produces only beautiful things.

Contributors from a range of disciplines consider the disconnect between human evolutionary studies and the rest of evolutionary biology. The study of human evolution often seems to rely on scenarios and received wisdom rather than theory and methodology, with each new fossil or molecular analysis interpreted as supporting evidence for the presumed lineage of human ancestry. We might wonder why we should pursue new inquiries if we already know the story. Is paleoanthropology an evolutionary science? Are analyses of human evolution biological? In this volume, contributors from disciplines that range from paleoanthropology to philosophy of science consider the disconnect between human evolutionary studies and the rest of evolutionary biology. All of the contributors reflect on their own research and its disciplinary context, considering how their fields of inquiry can move forward in new ways. The goal is to encourage a more multifaceted intellectual environment for the understanding of human evolution. Topics discussed include paleoanthropology's history of procedural idiosyncrasies; the role of mind and society in our evolutionary past; humans as large mammals rather than a special case; genomic analyses; computational approaches to phylogenetic reconstruction;

descriptive morphology versus morphometrics; and integrating insights from archaeology into the interpretation of human fossils. Contributors Markus Bastir, Fred L.
