ORIGINAL DESCRIPTION (1961): " ...The rampant lion of Peugeot is really no newcomer to America. Modern Peugeot fans tend to date their pleasure from a March day in 1958, when the New York Motor Show opened its doors. A key display, to their way of thinking, was that of Peugeot; these were the first of the renowned 403 models to reach American hands on regular shipment from the French factory. But those "pioneer" buyers who thought themselves the first to recognize a worthy newcomer back in 1958 shouldn't take their bows too soon. That year was really Act II in the tale of Peugeot In America. The initial new world conquests carry much earlier datelines. The lion's first invasion dates clear back to 1913, when the Peugeot name was suddenly emblazoned in American motor sports headlines by a French race driver named Jules Goux.... .... If you want a symbol for Peugeot, apart from that golden lion, try a family tree. Both the management and the product draw their special qualities from an unbroken lineage rooted in an era that never even heard of the automobile..."

This book highlights recent findings in industrial, manufacturing and mechanical engineering, and provides an overview of the state of the art in these fields, mainly in Russia and Eastern Europe. A broad range of topics and issues in modern engineering are discussed, including the dynamics of machines and working processes, friction, wear and lubrication in machines, surface transport and technological machines, manufacturing engineering of industrial facilities, materials engineering, metallurgy, control systems and their industrial applications, industrial mechatronics, automation and robotics. The book gathers selected papers presented at the 6th International Conference on Industrial Engineering (ICIE), held in Sochi, Russia in May 2020. The authors are experts in various fields of engineering, and all papers have been carefully reviewed. Given its scope, the book will be of interest to a wide readership, including mechanical and production engineers, lecturers in engineering disciplines, and engineering graduates.
