Symmetries of Partial Differential Equations Now Publishers Inc  
Vols. for 1921-22, 1924-63 include an annual review number with  
title: Fishing gazette annual review and classified directory of  
marine and shore plant equipment (1921-60, Fishing gazette  
annual review number (varies slightly))

"Astronomy and Astrophysics Abstracts" appearing twice a year  
has become one of the fundamental publications in the fields of  
astronomy, astrophysics and neighbouring sciences. It is the most

important English-language abstracting journal in the mentioned  
branches. The abstracts are classified under more than a hundred  
subject categories, thus permitting a quick survey of the whole  
extended material. The AAA is a valuable and important  
publication for all students and scientists working in the fields of  
astronomy and related sciences. As such it represents a  
necessary ingredient of any astronomical library all over the  
world.

PC Magazine Springer Science & Business Media

PCMag.com is a leading authority on technology, delivering Labs-  
based, independent reviews of the latest products and services.  
Our expert industry analysis and practical solutions help you  
make better buying decisions and get more from technology.

**PC Mag** DIANE Publishing

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

#### Research Report

Describes several useful paradigms for the design and implementation of efficient external memory (EM) algorithms and data structures. The problem domains considered include sorting, permuting, FFT, scientific computing, computational geometry, graphs, databases, geographic information systems, and text and string processing.

#### **PC Mag**

Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

2 The authors of these issues involve not only mathematicians, but also specialists in (mathematical) physics and computer sciences. So here the reader will find different points of view and approaches to the considered field. A. M. VINOGRADOV 3 Acta Applicandae Mathematicae 15: 3-21, 1989. © 1989 Kluwer Academic Publishers. Symmetries and Conservation Laws of Partial Differential Equations: Basic Notions and Results A. M. VINOGRADOV Department of Mathematics, Moscow State University, 117234, Moscow, U. S. S. R. (Received: 22 August 1988) Abstract. The main notions and results which are necessary for finding higher symmetries and conservation laws for general systems of partial differential equations are given. These constitute the starting point for the subsequent papers of this volume. Some problems are also discussed. AMS subject classifications (1980). 35A30, 58005, 58035, 58H05. Key words. Higher symmetries, conservation laws, partial differential equations, infinitely prolonged equations, generating functions. o. Introduction In this paper we present the basic notions and results from the general theory of local symmetries and conservation laws of partial differential equations. More exactly, we will focus our attention on the main conceptual points as well as on the problem of how to find all higher symmetries and conservation laws for a given system of partial differential equations. Also, some general views and perspectives will be discussed.
