The coastal zone is subject to strong
pressures from a large number of users.
Populations are migrating to it in large

numbers. Industry wants to exploit it for
its space, water and manpower. Aggregate
miners want to exploit mineral resources
and health centers are multiplying. It is a
favorite area for tourism and recreation
worldwide. The zone can boom
economically. However, coastlines are
progressively receding worldwide, making
the zone fragile, vulnerable, and unstable.
The book presents methods of coastal
protection and beach restoration and
offers solutions to the various problems.

Essays on Indian Antiquities, Historic, Numismatic, and Palaeographic, of the Late James Prinsep Springer

This book is devoted to Agroecological Crop Protection, which is the declension of the principles of agroecology to crop protection. It presents the concepts of this innovative approach, case studies and lessons and generic keys for agroecological transition. The book is intended for a wide audience, including scientists, experimenters, teachers, farmers, students. It represents a new tool, proposing concrete keys of action on the basis of feedbacks validated scientifically. Beyond the examples presented, it is therefore of general scope and proposes recommendations for all temperate and tropical cropping systems. It contributes to the training and teaching

modules in this field and it is an updated information support for professionals and a teaching aid for students (agronomy, crop protection, biodiversity management, agroecology).

Biblical scholars have long claimed that

the Israelites "could not conceive of a disembodied nefesh [soul]." In this book, Richard C. Steiner rejects that claim based on a broad spectrum of textual, linguistic, archaeological, and anthropological evidence spanning the millennia from prehistoric times to the present. The biblical evidence includes a prophecy of Ezekiel condemning women who pretend to trap the wandering souls of sleeping people--a prophecy that has been only partially understood until now because of the obscure technical terms that it contains. The extrabiblical evidence suggests that a belief in the existence of disembodied souls was part of the common religious heritage of the peoples of the ancient Near East.
