This book effectively translates author John Green's YouTube video sensation of European History Crash Courses into guided question worksheets. Students follow along with John Green's online Crash Courses and reflect upon topics in European history using this interactive guiding question workbook. A quick type in on a Google search engine or YouTube of "Crash Course European History" will take one to the desired site of where 51 episodes can be found. Common Core European history standards are followed in all questions inside of the Crash Course European History: A Study Guide of Worksheets for European History workbook helping students tap into level 3 and 4 DOK (Depth of Knowledge) thinking skills in European history while actively learning and listening to John Green's European History Crash Course videos. This workbook can be used to focus students either with or without headphones on a laptop while watching the desired YouTube video thus eliminating distraction in a desired setting. Questions posed are in accordance with AP high school European history and college European history standards and can be used in order to improve test scores, content understanding, and effectively build upon essay structure in writing about topics in European history. Target audience includes but is not limited to native English speakers and English language learners ages 17-30. Note: Those without access to YouTube can still use these guiding questions as a guide in order find answers using their respective European history book, and by looking up answers using bolded key terms and vocabulary. Questions posed in this book are meant to inspire paragraph development including intro, thesis, body, and conclusion paragraph structure while affording the reader opportunities to analyze, evaluate, and reflect upon a wide number of topics found in European history.

AP U.S. Government and Politics Crash Course Princeton Review
 There is a considerable difference between real history and discourse history - this book stems from this idea. The author points out that history is constantly reconstructed, adapted and sometimes mythified from the perspective of the present day, of present states of mind and ideologies. Boia closely examines the process of historical culture and conscience in nineteenth and twentieth century Romania, particularly concentrating on the impact of the national ideology on history. Based upon his findings, the author identifies several key mythical configurations and analyses the manner in which Romanians have reconstituted their own highly ideologized history over the last two centuries.

The strength of History and Myth in Romanian Consciousness lies in the author's ability to fully deconstruct the entire Romanian historiographic system and demonstrate the increasing acuteness of national problems in general, and in particular the exploitation of history to support national ideology.

This book provides a concise, accurate, and lively portrait of Napoleon Bonaparte's character and career, situating him firmly in historical context. David Bell emphasizes the astonishing sense of human possibility--for both good and ill--that Napoleon represented. By his late twenties, Napoleon was already one of the greatest generals in European history. At thirty, he had become absolute master of Europe's most powerful country. In his early forties, he ruled a European empire more powerful than any since Rome, fighting wars that changed the shape of the continent and brought death to millions. Then everything collapsed, leading him to spend his last years in miserable exile in

the South Atlantic. Bell emphasizes the importance of the French Revolution in understanding Napoleon's career. The revolution made possible the unprecedented concentration of political authority that Napoleon accrued, and his success in mobilizing human and material resources. Without the political changes brought about by the revolution, Napoleon could not have fought his wars. Without the wars, he could not have seized and held onto power. Though his virtual dictatorship betrayed the ideals of liberty and equality, his life and career were revolutionary.

The Columbian Exchange (by) Alfred W. Crosby, Jr. Foreword by Otto Von Mering Research & Education Assoc.

"A brilliant and readable book...a rich study of humankind's restless spirit." —Candice Millard, New York Times Book Review Greeted with coast-to-coast acclaim on publication, Fernández-Armesto's ambitious history of world exploration sets a new standard. Presenting the subject for the first time on a truly global scale, Fernández-Armesto tracks the pathfinders who, over the past five millennia, lay down the routes of contact that have drawn together the farthest reaches of the world. The Wall Street Journal calls it "impressive...a huge story [told] with gusto and panache." To the Washington Post, "Pathfinders is propelled by an Argonaut of an author, indefatigable and daring. It's a wild ride." And in a front-page review, the Seattle Times hails its "tart and elegant presentation...full of surprises. Fernández-Armesto's lively mind, pithy phrasing, and stunningly thorough and diverse knowledge are a constant pleasure." A plenitude of illustrations and maps in color and black and white augment this rich history. In *Pathfinders*, winner of the 2007 World History Association Book Prize, we have a definitive treatment of a grand subject.

The Scientific Revolution in National Context Random House The Salem witch trials stand as one of the infamous moments in colonial American history. More than 150 people -- primarily women -- from 24 communities were charged with witchcraft; 19 were hanged and others died in prison. This second edition continues to explore the beliefs, fears, and historical context that fueled the witch panic of 1692. In his revised introduction, Richard Godbeer offers coverage of the convulsive ergotism thesis advanced in the 1970s and a discussion of new scholarship on men who were accused of witchcraft for explicitly gendered reasons. The documents in this volume illuminate how the Puritans' worldview led them to seek a supernatural explanation for the problems vexing their community. Presented as case studies, the carefully chosen records from several specific trials offer a clear picture of the gender norms and social tensions that underlie the witchcraft accusations. New to this edition are records from the trial of Samuel Wardwell, a fortune-teller or "cunning man" whose apparent expertise made him vulnerable to suspicions of witchcraft. The book's final documents cover recantations of confessions, the aftermath of the witch hunt, and statements of regret. A chronology of the witchcraft crisis, questions for consideration, and a selected bibliography round out the book's pedagogical support.

The 'scientific revolution' of the sixteenth and seventeenth century continues to command attention in historical debate. Controversy still rages about the extent to which it was essentially a 'revolution of the mind', or how far it must also be explained by wider considerations. In this volume, leading scholars of early modern science argue the importance of specifically national contexts for understanding the transformation in natural philosophy between Copernicus and Newton. Distinct political, religious, cultural and linguistic formations shaped scientific interests and concerns differently in each European state and explain different levels of scientific intensity. Questions of institutional development and of the transmission of scientific ideas are also addressed. The emphasis upon national determinants makes this volume an interesting contribution to the study of the Scientific Revolution.

Barron's AP European History Research & Education Assoc. Europe's relationship with culture, even at the most basic level, dates back to at least 20,000 BCE. The Venus of Willendorf and the cave paintings of Altamira and Lascaux are examples of the presence of civilization in Europe thousands of years ago. By 5000

BC, evidence proves that areas of Europe had begun to show hierarchical societies and a firm agricultural background had been formed by many of these societies.

History and Myth in Romanian Consciousness Springer Nature
A "marvelous history"* of medieval Europe, from the bubonic plague and the Papal Schism to the Hundred Years' War, by the Pulitzer Prize-winning author of *The Guns of August* *Lawrence Wright, author of *The End of October*, in *The Wall Street Journal*
The fourteenth century reflects two contradictory images: on the one hand, a glittering age of crusades, cathedrals, and chivalry; on the other, a world plunged into chaos and spiritual agony. In this revelatory work, Barbara W. Tuchman examines not only the great rhythms of history but the grain and texture of domestic life: what childhood was like; what marriage meant; how money, taxes, and war dominated the lives of serf, noble, and clergy alike. Granting her subjects their loyalties, treacheries, and guilty passions, Tuchman re-creates the lives of proud cardinals,

university scholars, grocers and clerks, saints and mystics, lawyers and mercenaries, and, dominating all, the knight—in all his valor and "furious follies," a "terrible worm in an iron cocoon." Praise for *A Distant Mirror* "Beautifully written, careful and thorough in its scholarship . . . What Ms. Tuchman does superbly is to tell how it was. . . . No one has ever done this better."—*The New York Review of Books* "A beautiful, extraordinary book . . . Tuchman at the top of her powers . . . She has done nothing finer."—*The Wall Street Journal* "Wise, witty, and wonderful . . . a great book, in a great historical tradition."—*Commentary* NOTE: This edition does not include color images.

Journey into Europe Research & Education Assoc.

An unprecedented, richly, detailed, and clear-eyed exploration of Islam in European history and civilization Tensions over Islam were escalating in Europe even before 9/11. Since then, repeated episodes of terrorism together with the refugee crisis have dramatically increased the divide between the majority population and Muslim communities, pushing the debate well beyond concerns over language and female dress. Meanwhile, the parallel rise of right-wing, nationalist political parties throughout the continent, often espousing anti-Muslim rhetoric, has shaken the foundation of the European Union to its very core. Many Europeans see Islam as an alien, even barbaric force that threatens to overwhelm them and their societies. Muslims, by contrast, struggle to find a place in Europe in the face of increasing intolerance. In tandem, anti-Semitism and other forms of discrimination cause many on the continent to feel unwelcome in their European homes. Akbar Ahmed, an internationally renowned Islamic scholar, traveled across Europe over the course of four years with his team of researchers and interviewed Muslims and non-Muslims from all walks of life to investigate questions of Islam, immigration, and identity. They spoke with some of Europe's most prominent figures, including presidents and prime ministers, archbishops, chief rabbis, grand muftis, heads of right-wing parties, and everyday Europeans from a

variety of backgrounds. Their findings reveal a story of the place of Islam in European history and civilization that is more interwoven and complex than the reader might imagine, while exposing both the misunderstandings and the opportunities for Europe and its Muslim communities to improve their relationship. Along with an analysis of what has gone wrong and why, this urgent study, the fourth in a quartet examining relations between the West and the Muslim world, features recommendations for promoting integration and pluralism in the twenty-first century. *Europe after Empire* Macmillan Higher Education
