### **GRIFFITH AYERS**

Democracy in Africa International Labour Organization

This volume covers aspects of sudden infant and early childhood death, ranging from issues with parental grief, to the most recent theories of brainstem neurotransmitters. It also deals with the changes that have occurred over time with the definitions of SIDS (sudden infant death syndrome), SUDI (sudden unexpected death in infancy) and SUDIC (sudden unexpected death in childhood). The text will be indispensable for SIDS researchers, SIDS organisations, paediatric pathologists, forensic pathologists, paediatricians and families, in addition to residents in training programs that involve paediatrics. It will also be of use to other physicians, lawyers and law enforcement officials who deal with these cases, and should be a useful addition to all medical examiner/forensic, paediatric and pathology departments, hospital and university libraries on a global scale. Given the marked changes that have occurred in the epidemiology and understanding of SIDS and sudden death in the very young over the past decade, a text such as this is very timely and is also urgently needed.

*Active Training* Simon and Schuster

While indigenous peoples make up around 370 million of the world's population – some 5 per cent – they constitute around one-third of the world's

900 million extremely poor rural people. Every day, indigenous communities all over the world face issues of violence and brutality. Indigenous peoples are stewards of some of the most biologically diverse areas of the globe, and their biological and cultural wealth has allowed indigenous peoples to gather a wealth of traditional knowledge which is of immense value to all humankind. The publication discusses many of the issues addressed by the Declaration on the Rights of Indigenous Peoples and is a cooperative effort of independent experts working with the Secretariat of the Permanent Forum on Indigenous Issues. It covers poverty and well-being, culture, environment, contemporary education, health, human rights, and includes a chapter on emerging issues.

*Police Use of Force, Tasers and Other Less-Lethal Weapons* Oxfam

Topics covered include background, evaluation, policy, organization and management for labour inspection, sectoral aspects such as child labour, agriculture, non-commercial service sector, construction industry, labour inspection and hazards prevention.

**The U.S. Navy SEAL Survival Handbook** Oxford University Press

Twelve years ago, Richard Yancey answered a blind ad in the newspaper offering a salary higher than what he'd made over the three previous years combined. It turned out that the job was for the Internal Revenue Service -- the most hated and feared organization in the federal government. So Yancey became the man who got in his car, drove to your house, knocked on your door, and made you pay. Never mind that his car was littered with candy wrappers, his palms were sweaty, and he couldn't remember where he stashed his own tax records. He was there on the authority of the

United States government. With "a rich mix of humor, horror, and angst [and] better than most novels on the bestseller lists" (Boston Sunday Globe), *Confessions of a Tax Collector* contains an astonishing cast of too-strange-for-fiction characters. But the most intriguing character of all is Yancey himself who -- in detailing how the job changed him and how he managed to pull himself back from the brink of moral, ethical, and spiritual bankruptcy -- reveals what really lies beneath those dark suits and mirrored sunglasses. This P.S. edition features an extra 16 pages of insights into the book, including author interviews, recommended reading, and more.

*Wong's Essentials of Pediatric Nursing* Routledge

The reduction of inequalities within and between countries stands as a policy goal, and deserves to take centre stage in the design of the Sustainable Development Goals agreed during the Rio+20 Summit in 2012. The 2013 edition of *A Planet for Life* represents a unique international initiative grounded on conceptual and strategic thinking, and -- most importantly -- empirical experiments, conducted on five continents and touching on multiple realities. This unprecedented collection of works proposes a solid empirical approach, rather than an ideological one, to inform future debate. The case studies collected in this volume demonstrate the complexity of the new systems required to accommodate each country's specific economic, political and cultural realities. These systems combine technical, financial, legal, fiscal and organizational elements with a great deal of applied expertise, and are articulated within a clear, well-understood, growth- and job-generating development strategy. Inequality reduction does not occur by decree; neither does it automatically arise through economic growth, nor through policies that equalize incomes downward via ill conceived fiscal policies. Inequality reduction involves a collaborative effort that must motivate all concerned parties, one that constitutes a genuine political and social innovation, and one that often runs counter to prevailing political and economic forces.

*The 13 Critical Tasks: An Inside-Out Approach to Solving More Gun Crime* DIANE Publishing

This is a book about the men and women who police contemporary South Africa. Drawing on rich, original ethnographical data, it considers how officers make sense of their jobs and how they find meaning in their duties. It demonstrates that the dynamics that lead to police abuses and scandals in transitional and neo-liberalising regimes such as South Africa can be traced to the day-to-day experiences and ambitions of the average police officer. It is about the stories they tell themselves about themselves and their social worlds, and how these shape the order they produce through their work. By focusing on police officers, this book positions the individual in primacy over the organisation, asking what policing looks like when motivated by the pursuit of ontological security in precarious contexts. It acknowledges but downplays the importance of police culture in determining officers' attitudes and behaviour, and reminds readers that most officers' lives are entangled in, and shaped by a range of social, political and cultural forces. It suggests that a job in the South African Police Service (SAPS) is primarily just that: a job. Most officers join the organisation after other dreams have slipped beyond reach, their presence in the Service being almost accidental. But once employed, they re-write their self-narratives and enact carefully choreographed performances to ease managerial and public pressure, and to rationalize their coercive practices. In an era where 'evidence' and 'what works' reigns supreme, and where 'cop culture' is often deemed a primary socializing force, this book emphasises how officers' personal histories, ambitions, and vulnerabilities remain central to how policing unfolds on the street.

*Victims of Crime Survey* Routledge

This is an open access title available under the terms of a [CC BY-NC-ND 4.0 International] licence. It is free to read at Oxford Clinical Psychology Online and offered as a free PDF download from OUP and selected open access locations. Attachment theory is among the most popular theories of human socioemotional development, with a global research community and widespread interest from clinicians, child welfare professionals, educationalists and parents. It has been considered "one of the most generative contemporary ideas" about family life in modern society. It is one of the last of the grand theories of human development that still retains an active research tradition. Attachment theory and research speak to fundamental questions about human emotions, relationships and development. They do so in terms that feel experience-near, with a remarkable combination of intuitive ideas and counter-intuitive assessments and conclusions. Over time, attachment theory seems to have become more, rather than less, appealing and popular, in part perhaps due to alignment with current concern with the lifetime implications of early brain development. Cornerstones of Attachment Research re-examines the work of key laboratories that have contributed to the study of attachment. In doing so, the book traces the development in a single scientific paradigm through parallel but separate lines of inquiry. Chapters address the work of Bowlby, Ainsworth, Main and Hesse, Sroufe and Egeland, and Shaver and Mikulincer. Cornerstones of Attachment Research utilises attention to these five research groups as a lens on wider themes and challenges faced by attachment research over the decades. The chapters draw on a complete analysis of published scholarly and popular works by each research group, as well as much unpublished material.

*Alternatives to Privatization* Skyhorse

This book provides the first comprehensive overview of the history of democracy in Africa and explains why the continent's democratic experiments have so often failed, as well as how they could succeed. Nic Cheeseman grapples with some of the most important questions facing Africa and democracy today, including whether international actors should try and promote democracy abroad, how to design political systems that manage ethnic diversity, and why democratic governments often make bad policy decisions. Beginning in the colonial period with the introduction of multi-party elections and ending in 2013 with the collapse of democracy in Mali and South Sudan, the book describes the rise of authoritarian states in the 1970s; the attempts of trade unions and some religious groups to check the abuse of power in the 1980s; the remarkable return of multiparty politics in the 1990s; and finally, the tragic tendency for elections to exacerbate corruption and violence.

*Reputation* Harvard Business Review Press

Research on gene drive systems is rapidly advancing. Many proposed applications of gene drive research aim to solve environmental and public health challenges, including the reduction of poverty and the burden of vector-borne diseases, such as malaria and dengue, which disproportionately impact low and middle income countries. However, due to their intrinsic qualities of rapid spread and irreversibility, gene drive systems raise many questions with respect to their safety relative to public and environmental health. Because gene drive systems are designed to alter the environments we share in ways that will be hard to anticipate and impossible to completely roll back, questions about the ethics surrounding use of this research are complex and will require very careful exploration. *Gene Drives on the Horizon* outlines the state of knowledge relative to the science, ethics,

public engagement, and risk assessment as they pertain to research directions of gene drive systems and governance of the research process. This report offers principles for responsible practices of gene drive research and related applications for use by investigators, their institutions, the research funders, and regulators.

*Law Enforcement Exploring Program* Oxford University Press

The American Psychiatric Association (APA) is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians.

*Handbook on Police Accountability, Oversight and Integrity* Springer Nature

*Principles of Management* is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the *Principles of Management* course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. Contributing Authors David S. Bright, Wright State University Anastasia H. Cortes, Virginia Tech University Eva Hartmann, University of Richmond K. Praveen Parboteeah, University of Wisconsin-Whitewater Jon L. Pierce, University of Minnesota-Duluth Monique Reece Amit Shah, Frostburg State University Siri Terjesen, American University Joseph Weiss, Bentley University Margaret A. White, Oklahoma State University Donald G. Gardner, University of Colorado-Colorado Springs Jason Lambert, Texas Woman's University Laura M. Leduc, James Madison University Joy Leopold, Webster University Jeffrey Muldoon, Emporia State University James S. O'Rourke, University of Notre Dame

*SIDS Sudden Infant and Early Childhood Death* John Wiley & Sons

At present, how to develop industries is a burning issue in Africa, where population growth remains high and economic development has thus far failed to provide sufficient jobs for many, especially young people and women. The creation of productive jobs through industrial development ought to be a central issue in steering economic activity across the continent. The authors of this book, consisting of two development economists and five practitioners, argue that the adoption of Kaizen management practices, which originated in Japan and have become widely used by manufacturers in advanced and emerging economies, is decisively the most effective first step for industrial development in Africa. This open access book discusses what Kaizen management is, why it is applicable to Africa, and why it can provide Africa with a springboard for sustainable economic growth and employment generation.

*Gender, Peacebuilding, and Reconstruction* Cambridge University Press

There is a vast literature for and against privatizing public services. Those who are against privatization are often confronted with the objection that they present no alternative. This book takes up that challenge by establishing theoretical models for what does (and does not) constitute an alternative to privatization, and what might make them 'successful', backed up by a comprehensive set of empirical data on public services initiatives in over 40 countries. This is the first such global survey of its kind, providing a rigorous and robust platform for evaluating different alternatives and allowing for comparisons across regions and sectors. The book helps to conceptualize and evaluate what has become an important and widespread movement for better public services in the global South. The contributors explore historical, existing and proposed non-commercialized alternatives for primary health, water/sanitation and electricity. The objectives of the research have been to develop conceptual and methodological frameworks for identifying and analyzing alternatives to privatization, and testing these models against actually existing alternatives on the ground in Asia, Africa and Latin America. Information of this type is urgently required for practitioners and analysts, both of whom are seeking reliable knowledge on what kind of public models work, how transferable they are from one place to another and what their main strengths and weaknesses are.

*Dynamics of Youth Agency in Times of Crisis* American Psychiatric Publishing

This collection of articles explores conflict prevention through development projects in places where resources are scarce, and age-old agreements between groups come under strain.

*Gene Drives on the Horizon* Springer

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the *Emergency Response Guidebook*. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

*Applying the Kaizen in Africa* National Academies Press

This convenient, money-saving package is a must-have for students training for a career in nursing. It includes the *Wong's Essentials of Pediatric Nursing* textbook and *Virtual Clinical Excursions 3.0*.

*CDL Study Guide Book* The Energy and Resources Institute (TERI)

As the elite of the military elite, U.S. Navy SEALs know that they can be deployed anywhere in the world at a moment's notice. Whether in a temperate, tropical, arctic, or subarctic region, they might find themselves alone in a remote area with little or no personal gear. In *The U.S. Navy SEAL Survival Handbook*, decorated Navy SEAL Team Six member Don Mann provides a definitive survival resource. From basic camp craft and navigation to fear management and strategies for coping with any type of disaster, it is an essential resource for all outdoorspeople. Complete with 150 color photographs, this comprehensive guide includes life-saving information on: - Making weapons and tools - Finding water - Wildlife for food -

Making shelters - Signaling - Sea survival - And much more

*Functional Somatic Symptoms in Children and Adolescents* Lulu.com

Police culture has been widely criticized as a source of resistance to change and reform, and is often misunderstood. This book seeks to capture the heart of police culture—including its tragedies and celebrations—and to understand its powerful themes of morality, solidarity, and common sense, by systematically integrating a broad literature on police culture into middle-range theory, and developing original perspectives about many aspects of

police work.

*Reducing Inequalities* John Wiley & Sons

This book describes the people, processes, and technologies needed to extract actionable intelligence from the inside, and outside, of crime guns.

[Practice Guideline for the Treatment of Patients with Schizophrenia](#) Routledge

This money-saving package includes the 8th edition of Wong's Essentials of Pediatric Nursing Text and Study Guide.
