which doesn't make things easy for Danny when he is charged with looking after her during his school holidays. Babysitting Nai Nai is NOT what he wants to be doing! by ghosts and ancestors, by the history of possessed bodies and possessed lands. Alongside them, we meet a young boy who is sent to a boarding school for the métis children of French expatriates, just before Vietnam declares its independence from colonial rule; two Frenchmen who are trying to start a business with the Vietnam War on the horizon; and the employees of the Saigon

Spirit Eradication Co., who find themselves investigating strange occurrences in a farmhouse on the edge of a forest. After On HarperCollins An NYPD robbery detective uses his insider cop knowledge to rob rich criminals. The latest from

Ben Sanders, following his novels American Blood and Marshall's Law. Rip-offs are a dangerous game, but heist man Miles Keller thinks he's found a good strategy: rob rich New York criminals and then retire early, before word's out about his true identity. New town, new name, no worries. Retirement can't come soon enough, though. The NYPD is investigating him for the

shooting of a hitman named Jack Deen, who was targeting Lucy Gates—a former police informant and Miles's ex-lover. Miles thinks shooting hitmen counts as altruism, but in any case a murder charge would make life difficult. He's ready to go to ground, but then Nina Stone reappears in his life. Nina is a fellow heist professional and the estranged wife of LA crime boss Charles Stone.

Miles last saw her five years ago, and since then her life has grown more complicated: her husband wants her back, and he's dispatched his go-to gun thug to play repo man. Complicating matters is the fact that the gun thug in question is Bobby Deen, cousin of the dead Jack Deen—and Bobby wants vengeance. The stakes couldn't be higher, but Nina has an offer that could be lucrative.

Maybe Miles can stick around a while longer...

Danny Chung Does Not Do Maths

Candlewick Press The Internet and smartphone are just the latest in a 250-year-long cycle of disruption that has continuously changed the way we live, the way we work and the way we interact. The coming Augmented Age, however, promises a level of disruption, behavioural shifts and changes that are unparalleled. While consumers today are

camping outside of an Apple store waiting to be one of the first to score a new Apple Watch or iPhone, the next generation of wearables will be able to predict if we're likely to have a heart attack and recommend a course of action. We watch news of Google's self-driving cars, but don't likely realise this means progressive cities will have to ban human drivers in the next decade because us humans are

too risky. Following on from the Industrial or machine age, the space age and the digital age, the Augmented Age will be based on four key disruptive themes—Artificial Intelligence, Experience Design, Smart Infrastructure, and HealthTech. Historically the previous ‘ages’ bought significant disruption and changes, but on a net basis jobs were created, wealth was enhanced, and the health and

security of society improved. What will the Augmented Age bring? Will robots take our jobs, and AI’s subsume us as inferior intelligences, or will this usher in a new age of abundance? Augmented is a book on future history, but more than that, it is a story about how you will live your life in a world that will change more in the next 20 years than it has in the last 250 years. Are you ready to

adapt? Because if history proves anything, you don’t have much of a choice. *I Am Jackie Chan Seven Stories Press* If your life was a song, what would it sound like? In the case of Gerald Barkley, it would be an elevator jingle. Barkley’s never been the most memorable guy. Even as a longtime Los Angeles homicide detective, people tend to forget him. And when his death draws

near in the form of a rare blood disease, he has to wonder...will anyone notice when he's gone? Add to that Barkley's latest case: The mysterious death of Julian Strange, a rock-and-roll icon with an obsession for cats. Renowned as a wild performer and a dabbler in the odd, Strange procured a copy of the world's oldest song. What does it have to do with his death? And what will

Gerald Barkley learn from it all? The debut novel from speculative fiction author Kyle A. Massa, "Gerald Barkley Rocks" examines music, fame, mortality, and the strangeness that composes them all. One part detective story, one part rock-and-roll elegy, and one part supernatural comedy, this book might just change your outlook on life—and death. *Living with Jackie Chan* Minotaur

In his Preface to "A Christmas Carol", Charles Dickens wrote that he tried "to raise the Ghost of an Idea" with readers and trusted that it would "haunt their house pleasantly". In December 1997, 154 Christmases later, the "New York Times Magazine" asked its own Edward Gorey to refurbish this enduring morality tale.
